I. MODEL NUMBERING SYSTEM

RATED POWER CONSUMPTION	2.0 WATTS / Max. 2.28 WATTS
RATED CURRENT	165 mA / Max. 190 mA
RATED VOLTAGE	12 VDC
OPERATING VOLTAGE RANGE	4.5~13.8 VDC
STARTING VOLTAGE	4.5 VDC (25 deg. C POWER ON/OFF)
OPERATING TEMPERATURE RANGE	-10 to + 70 deg. C
STORAGE TEMPERATURE RANGE	40 to + 70 deg. C

2. ELECTRIC CHARACTERISTIC

MOTOR DESIGN	2 phases, 4-poles Brushless DC motor
BEARING SYSTEM	Vapo bearing system
DIMENSIONS	See Page 6
MATERIALS OF FRAME	Thermoplastic PBT of UL 94V-0
MATERIALS OF FAN BLADE	Thermoplastic PBT of UL 94V-0
DIRECTION OF ROTATION	Counter-clockwise viewed from front of fan blade
MOUNTING HOLES	Diameter 4.3 mm in 8 holes
WEIGHT	96 g

3. PERFORMANCE CHARACTERISTIC

RATED SPEED	3000 RPM $\pm 10\%$ at rated voltage
AIR FLOW	51.5 CFM
STATIC PRESSURE	0.15 Inch-H ₂ O
ACOUSTIC NOISE	34 dB(A)
AIR FLOW V.S. PRESSURE	See Page 5
INSULATION CLASS	UL Class A
INSULATION RESISTANCE	10M ohm at 500 VDC between internal stator and lead wire (+)
Dielectric Strength	Applied AC 500 V for one minute or AC 600 V for 2 seconds between housing and lead wire (+)
LIFE EXPECTANCY	60,000 Hours at 40 deg. C, 65% humidity, 90% CI.
PROTECTION	<p><input checked="" type="checkbox"/> Automatic Restart</p> <p>Note: In a situation where the fan is locked by an external force while the electricity is on, an increase in coil temperature will be prevented by temporarily turning off the electrical power to the motor. The fan will automatically restart when the locked rotor condition is released.</p> <p><input type="checkbox"/> Polarity Protection</p>

建康書

A graph on a grid showing a vertical dashed line at $x=500$ and a horizontal dashed line at $y=500$. A solid line starts at $(0,0)$, goes up to $(500, 500)$, then down to $(750, 250)$, and back to $(0,0)$. The word "ROLL" is written below the x-axis between $x=400$ and $x=550$.

The "Life Expectancy" of SUNON fans is determined in SUNON's reliability test laboratory by using temperature chambers. The "Life Expectancy" of this fan has not been evaluated for use in combination with any end application. Therefore, the Life Expectancy Test Reports (L10 and MTF Report) that relate to this fan are only for reference.

6. LIFE EXPECTANCY

100G of force is applied in the 3 directions (X, Y, and Z) for 2 milliseconds each.

5. SHOCK PROOF TEST

The fan is operated in a testing chamber for 50 cycles. In each cycle, the temperature is gradually increased from -10°C to 70°C for 90 minutes, and subsequently operated at 70°C for 120 minutes. The temperature is then gradually decreased from 70°C to -10°C for 90 minutes, and subsequently operated at -10°C for 120 minutes.

4. THERMAL CYCLING TEST

Vibration with an amplitude 2mm and a frequency of 5-55-5Hz is applied in all 3 directions (X, Y, Z), in cycles of 1 hour each, for a total vibration time of 3 hours.

3. VIBRATION PROOF TEST

95% RH at 60°C ± 2°C.

The fan is operated for 96 continuous hours in an environment with humidity of 90% to

2. HUMIDITY PROOF TEST

Fans are packaged in a standard size shipping box and are dropped to the ground from certain heights and angles depending on the weight of the particular box.

1. DROP PROOF TEST

Explanation upon request.

The following is a general description of certain tests that are performed on representative SUNON fans. Nothing in this document is intended to suggest that these tests are performed on every model of SUNON fan. Moreover, the descriptions that follow each test are meant only to provide a general explanation of each test. If you would like a more detailed explanation as to any test identified in this Section, SUNON can provide such an explanation upon request.

III. OTHER SPECIFIED TESTING

Measured after continuous 10 minute operation at rated voltage in clean air (STATIC PRESSURE=0), and at ambient temperature of 25 degrees C under shaft horizontal condition.

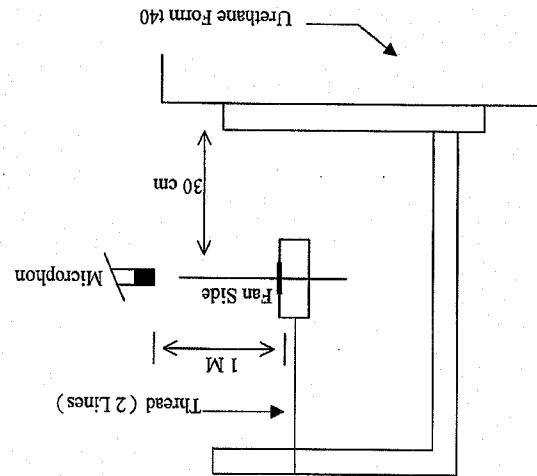

3. RATED CURRENT

Measured after continuous 10 minute operation at rated voltage in clean air (STATIC PRESSURE=0), and at ambient temperature of 25 degrees C under shaft horizontal condition.

2. INPUT POWER

The fan is running in free air under shaft horizontal condition with the microphone at distance of one meter from the fan intake.

1 METER FROM MICROPHONE TO FAN INTAKE

Measured in a semi-anechoic chamber with background noise level below 15dB(A).

1. ACOUSTICAL NOISE

This document is intended to suggest that these tests are performed on every model of Sunon fan. Moreover, the descriptions that follow each test are meant only to provide a general explanation of each test. If you would like a more detailed explanation as to any test identified in this Section, Sunon can provide such an explanation upon request.

IV. CHARACTERISTIC DEFINITION

4. RATED SPEED

Measured after continuous 10 minute operation at rated voltage in clean air (STATIC PRESSURE=0), and at ambient temperature of 25 degrees C under shaft

5. STARTING VOLTAGE

Measured the voltage which enables to start the fan in the clean air (static pressure = 0) by switching on at the voltage under shaft horizontal condition. It is not at continuously

6. LOCKED ROTOR CURR

Measured immediately after the fan blade is locked.

7. AIR FLOW AND STATIC PRESSURE

The performance specification of air flow and static pressure shown in this specification for approval is measured using the exhaust method. A double chamber is used in accordance with AMCA 210 standard or DIN 24163 specification. The values are recorded when the fan speed has stabilized at rated voltage.

• INSULATION RESISTANCE

2. ALUMINUM HOUSING:

Measured between internal stator and lead wire(+) .

9. DIELECTRIC STRENGTH

Measure between housing and lead wire(+) .

I. SAFETY

V. NOTE

1. DO NOT use or operate this fan in excess of the limitations set forth in this specification. SUNON is not be responsible for the non-performance of this fan and/or any damages resulting from its use, if it is not used or operated in accordance with the specifications.
2. SUNON recommends adding a protection circuit to the product or application in which this fan is installed, such as a thermo-fuse, or current-fuse or thermo-protector. The failure to use such a device may result in smoke, fire, electric shock by insulation degradation in cases of motor lead short circuit, over load, or over voltage, and/or other failure.
3. SUNON recommends installing a protection device to the product or application in which this fan is installed if there is a possibility of reverse connection between VDC (+) and GND (-). The failure to install such a device may result in smoke, fire, and/or destruction, although these conditions may not manifest immediately.
4. This fan must be installed and used in compliance with all applicable safety standards and regulations.
5. Use proper care when handling and/or installing this fan. Improper handling or installation of this fan may cause damage that could result in unsafe conditions.
6. Use proper care during installation and/or wiring. Failure to use proper care may cause damage to certain components of the fan including, but not limited to, the coil and lead wires, which could result in smoke and/or fire.
7. DO NOT use power or ground PWM to control the fan speed. If the fan needs to be adjusted, please contact SUNON to customize the product design for your application.
8. For critical or extreme environments, including non stop operation, please contact SUNON and we will gladly provide assistance with your product selection to ensure an appropriate cooling product for your application.

1. SUNON offers engineering assistance on fan installation and cooling system design.
2. All changes, modifications and/or revisions to the specifications, if any, are incorporated in the attached specifications.
3. No changes, modifications and/or revisions to these specifications are effective absent agreement, by both Sunon and the customer, in writing.
4. This fan will be shipped in accordance with the attached specification unless SUNON and the customer have agreed otherwise, in writing, as specified in paragraph 3, above.
1. When building your device, please examine thoroughly any variation of EMC, temperature rise, life data, quality, etc. of this product by shock/drop/vibration testing, etc. If there are any problems or accidents in connection with this product, it should be mutually discussed and examined.
2. Use proper care when handling this fan. Components such as fan holders or bearings may be damaged, if touched with fingers or other objects. Additionally, static electricity (ESD) may damage the internal circuits of the fan.
3. DO NOT operate this fan in proximity to hazardous materials such as organic silicon, cyanogen, formalin, phenol, or corrosive gas environments including, but not limited to, H₂S, SO₂, NO₂, or Cl₂.
4. SUNON recommends that you protect this fan from exposure to outside elements such as dust, condensation, humidity or insects. Exposure of this fan to outside elements such as dust, condensation, humidity or insects, may affect its performance and may cause safety hazards. SUNON does not warrant against damage to the product caused by outside elements.
5. This fan must be installed properly and securely. Improper mounting may cause harsh resonance, vibration, and noise.

II. SPECIFICATION MODIFICATION

1. SUNON offers engineering assistance on fan installation and cooling system design.

2. All changes, modifications and/or revisions to the specifications, if any, are incorporated in the attached specifications.

3. No changes, modifications and/or revisions to these specifications are effective absent agreement, by both Sunon and the customer, in writing.

4. This fan will be shipped in accordance with the attached specification unless SUNON and the customer have agreed otherwise, in writing, as specified in paragraph 3, above.

1. When building your device, please examine thoroughly any variation of EMC, temperature rise, life data, quality, etc. of this product by shock/drop/vibration testing, etc. If there are any problems or accidents in connection with this product, it should be mutually discussed and examined.

2. Use proper care when handling this fan. Components such as fan holders or bearings may be damaged, if touched with fingers or other objects. Additionally, static electricity (ESD) may damage the internal circuits of the fan.

3. DO NOT operate this fan in proximity to hazardous materials such as organic silicon, cyanogen, formalin, phenol, or corrosive gas environments including, but not limited to, H₂S, SO₂, NO₂, or Cl₂.

4. SUNON recommends that you protect this fan from exposure to outside elements such as dust, condensation, humidity or insects. Exposure of this fan to outside elements such as dust, condensation, humidity or insects, may affect its performance and may cause safety hazards. SUNON does not warrant against damage to the product caused by outside elements.

III. OTHER

This fan is warranted against all defects which are proved to be fault in our workmanship and material for one year from the date of our delivery. The sole responsibility under the warranty shall be limited to the repair of the fan or the failures of its fans due to improper handling, misuse or the failure to follow specifications or instructions for use. In the event of warranty claim, the customer shall immediately notify SUNON for verification. SUNON will not be responsible for any consequential damage to the customer's equipment as a result of any fans proven to be ineffective.

VI. WARRANTY

10. The "Life Expectancy" of this fan has not been evaluated for use in combination with any end application. Therefore, the Life Expectancy Test Reports (L10 and MTF Report) that relate to this fan are only for reference.

9. SUNON reserves the right to use components from multiple sources at its discretion. The use of components from other sources will not affect the specifications as described herein.

8. DO NOT store this fan in an environment with high humidity. This fan must be stored in accordance with the attached specifications regarding storage temperature. If this fan is stored for more than 6 months, SUNON recommends functional testing before using.

7. Unless otherwise noted, all testing of this fan is conducted at 25°C ambient temperature and sixty-five percent (65%) relative humidity.

6. Fan guards may prevent injury during handling or installation of the fan and are available for sale with this fan.

No.	Substance	Criteria
2	Chlorinated Organic Solvent	Forbidden
1	CFCs & HCFCs (ozone depleting substances)	Forbidden
3	Lead and its compounds	<p>Plastic (Frame, Impeller, wire harness, etc.) $<100\text{ppm}$</p> <p>Solder $<1000\text{ppm}$</p> <p>Steel alloy $<1000\text{ppm}$</p> <p>Aluminum alloy $<4000\text{ppm}$</p> <p>Copper alloy $<4\text{wt\%}$</p> <p>Solder $<20\text{ppm}$</p> <p>Parts composed of metals containing zinc (e.g. brass, zinc for die casting) $<100\text{ppm}$</p> <p>Cadmium and its compounds $<5\text{ppm}$</p>
4	PBBS and PBBDEs	<p>PCN $<100\text{ppm}$</p> <p>Mirex $<100\text{ppm}$</p> <p>Mercury and its compounds $<100\text{ppm}$</p> <p>Absbestos $<1000\text{ppm}$</p> <p>Organic Tin compounds $<1000\text{ppm}$</p> <p>Azo compounds $<1000\text{ppm}$</p> <p>TBP-A in external case plastic parts of products (PCB is exempted) $<1000\text{ppm}$</p> <p>Nickel in external case parts, which are likely to result in prolonged skin exposure $<1000\text{ppm}$</p>

1. In accordance with the Restriction of Hazardous Substances (RoHS) Directive, Sunon product have complied with Law and discipline not to employ the forbidden substances, and restrict the allowable concentration of some limited substances deliberately in our components.
