

Subminiature Load Cell LCKD Series Rugged Industrial Design **LCKD**

- ✓ 5-Pt NIST Traceable Calibration Included
- ✓ Rugged All Stainless Steel Construction
- ✓ Temperature compensation
- ✓ Miniature Size, Low Profile
- ✓ Ranges from 1 kg to 1000 lb

Small in size but not in performance, NEWPORT's LCKD Series subminiature compression load cells are designed to measure load ranges from 1 kg to 1000 lb. Rugged all stainless steel construction and high performance strain gages assure superior linearity and stability. All models include a 5-pt NIST traceable calibration to assure an accurate installation. If need multiple load cells with no calibration see the economical LCKD-PK which contains 3 uncalibrated load cells. Temperature compensation is achieved through a miniature circuit board which is included in the load cell's cable. These units are designed to be mounted on a smooth, flat surface.

The LCKD is also available in metric configurations, with ranges from 0-10 to 0-5,000 N. Please contact our Pressure department for more information..
