 - Low input current draw
 - High dv/dt capability
 - Integral transient voltage protection
 - High immunity to surges

DESCRIPTION

The AS 4-amp solid-state single inline (SIP) four-pin relays are designed for mounting on a printed circuit board. The relays offer built-in voltage protection and can withstand very high current overloads. The Series AS4 relays have a low zero-cross window. The compact size and triac output make the AS relay the perfect retrofit for electromechanical relays.

APPLICATIONS

- Interface applications
 - Vending machines
 - Light/lamp control
 - HVAC controls
