Description

The Akyga® AK-HD-15R cable was created to allow video and audio transmission from devices with micro HDMI input - most often used in smartphones or tablets - to a TV or monitor with an HDMI port. The product thus allows you to watch movies or photos stored in the device's memory, e.g. a telephone, on a large screen.

The HDMI technology used is characterized by the transmission of a digital signal, thanks to which the impact on the image and sound quality by external interference is minimized. The Akyga® product is available in the HDMI 1.4 version, which guarantees fast data transfer and allows access to the Internet. The cable has a length of 1.5 m.
