

Level Sensors Electromechanical Float Switches Types FS, Horizontal and Vertical Mount

- Float switches for liquid level sensing
- Horizontal or vertical mount
- Polypropylene, or polysulfone housings
- Maximum switching voltage: 200 VDC or 240 VAC
- Maximum switching current: 0.5 A (SPST)
- Suitable for specific gravities > 0.75

Product Description

The FS series of sensors are economical electromechanical float switches for liquid level sensing. Selectable normally open or normally closed outputs, along

with various mounting configurations and housing materials, allow the FS sensors to fit a wide variety of level applications.

Installation Guide

- FSH...types** Normally open or normally closed operation is selectable by orientation of the sensor in the tank. Normally open switching is obtained when the arrow on the mounting is pointed up, and vice versa, normally closed when the arrow is downward.
- FSV...types** Normally open or normally closed operation is selectable by inversion of the float on the shaft. The switches are shipped normally open otherwise indicated.
