C.A 5000 series

Analogue multimeters

The C.A 5000 Series of multimeters: for analogue fans

We have developed a range of multimeters to meet all the measurement requirements of today's electricians and electrical engineers.

- ▶ To meet the electrical safety requirements, they are totally protected and comply with the IEC 61010-1 standard, Category III 600 V.
- ▶ With their shockproof case equipped with the multi-purpose "Multistand™" accessory, they can be used both on the work site and in the laboratory.
- ▶ Lightweight and compact, they are easy to handle.
- ▶ Their current ranges are protected by HRC (high rupture capacity) fuses with indication of the condition of the fuses by "Fus" light.
- ▶ For the C.A 5003 and C.A 5005 the ohmmeter zero reset is automatic. To avoid any error in use, the "Voltest™" light indicates the presence of a voltage during resistance and continuity tests.

SAFETY ACCESSORIES

Numerous accessories* are available to extend your multimeter's applications or to give it new functions: crocodile clips, wire grips, voltage probes, current clamps, temperature probes...

Documentation on request.

* compliant with standard IEC 61010-031

1
Ø 4 mm safety
input terminals

2
"Fus" light

Test of the HRC fuses during current measurement.

3
Analogue scale

With antiparallax mirror for voltage scales.

4
"Voltest™" light

Indicates the presence of voltage on resistance measurement and continuity test.

5
Double isolation

In accordance with standard IEC 61010-1, rated voltage 600 V, installation category III, degree of pollution 2.

Connection with positive safety

It is essential to disconnect the leads before opening the cover for access to the battery and the fuses. Rapid opening by 1/4 turn screw, using a coin or a screwdriver.

Compact shockproof case

Equipped with a "MultiStand™" multi-purpose articulated stand on the back for positioning the instrument, fixing the test probes, etc.

You can also use the articulated stand to stow the test-probe leads.

▲ **Direct reading of the motor current with the C.A 5005 and its MN 89 miniclamp,** supplied as standard. The A AC ranges are marked by the  symbol and also the readout scale.

▲ **The articulated stand** holds the C.A 5003 in a vertical position for a reading close to the test point.

Continuity test™ of a fuse with the C.A 5001. The jointed clip is folded in place as a stand for use on the workbench. ▶

◀ **Voltage test with the C.A 5003.** The needle moves instantaneously for quick voltage testing.
