

Printed Circuit Board Connectors

Introduction

38999 Series I, II, II & 26482 II

Introduction

For many years, Aero Electric has been making mil circular connectors, and for nearly just as long, we have been supplying them with pc tail contacts. From all the applications we have supported with our pc tail connectors, and all the engineers we have worked with, we have finally taken all that we have learned and created a full product offering.

This product line is made in accordance with MIL-DTL-38999 and MIL-DTL-26482. This family of connectors offers multiple receptacle shell styles, and is available in several materials, such as aluminum, stainless steel, and for extreme corrosion environments, aluminum nickel bronze. The plating options are extensive as well, and that includes electroless nickel, olive drab cadmium, bright cadmium, hard anodized, black nickel, Zinc nickel, and Teflon nickel.

Features

1. Clinch nut options for more secure mounting to the panel
2. Stand-off with helicoils for best practice when supporting the pcb to the connector
3. Shell to PC board connection to allow for another ground path, if needed
4. Slots on the shells to allow for aqueous wash to run through and clean post wave soldering

MIL-DTL-38999 Series III Receptacle Connector, Wall Mount AE6520

Part Number Development

Aero Prefix	AE65	20	W	D	19	P	N-	2	4	H	1	3	5-	C1
Shell Type 20 = Wall Mount Receptacle														
Material Finish W = Aluminum, Olive Drab Cadmium Over Nickel F = Aluminum, Olive Drab Cadmium Over Nickel S = Stainless Steel, Electrodeposited Nickel, Firewall K = Stainless Steel, Passivated, Firewall E = Stainless Steel, Passivated (Non-Firewall) BN = Aluminum, Black Nickel (RoHS) BZ = Aluminum, Nickel Bronze (RoHS)														
Shell Size A=9, B=11, C=13, D=15, E=17, F=19, G=21, H=23, J=25														
Insert Arrangement Per MIL-STD-1560. See Pages 194 Thru 208 for Insert Selection.														
Contact Style P = Pin S = Socket														
Polarization (Keying) A, B, C, D & E (N = Normal)														
P.C. Tail Diameter 0=No Size 20 or 22D Contact size 20 & 22D : 1=.019, 2=.025, 3=.030 (with .033 min. stand-off dia. for contact size 22D, with .043 min. stand-off dia. o contact size 20)														
P.C. Tail Extension 1=.140, 2=.200, 3=.250, 4=.300, 5=.080														
Plating K = 30 Microinches Gold H = 50 Microinches Gold														
Stand-Off 0 = No Stand-Off 1 = .040 Stand-Off														
Minimum Solder Dip Length 0 = No Solder Dip, 1 = .100, 2 = .150, 3 = .200, 4 = .250														
P.C.Tail Diameter Blank = No Size 16 Contact size 16: 5=.040, 6=.062 . (with .065 Min. Stand-Off Dia. for contact size 16)														
Clinch Nuts (Self-Clinching) C1 = THD size 4-40 C2 = THD size 6-32 C3 = THD size M3 Blank = No Clinch Nuts

20	.019
16	.062

Alternate PC Tail diameters and lengths are available. Refer to PC Tail Specification section starting on 229-234 for further information, or consult Conesys/Aero Electric Connector for application support.

AEP55-105 Receptacle Connector, Jam Nut Mount

AEP55-106 Receptacle Connector, Jam Nut Mount with Dual Flange

AEP55-105

AEP55-106

* Standard PC tail extension length. For optional lengths, 229-234 for further information

Circular Connectors - PCB Contacts

MIL-DTL-38999 Series I, II and III

Insert Arrangements - Per MIL-STD-1560

The following table lists the most commonly used insert arrangements for printed circuit board applications using MIL-DTL-38999 circular connectors. Specific dimensional illustrations are included on the following pages for each of the insert arrangements in the table. For availability of other insert arrangements or for application support, please consult Conesys/Aero Electric Connector.

Circular Connectors - PCB Contacts

MIL-DTL-26482

Insert Arrangements - Per MIL-STD-1669

The following table lists the most commonly used insert arrangements for printed circuit board applications using MIL-DTL-26482 circular connectors. Specific dimensional illustrations are included on the following pages for each of the insert arrangements in the table. For availability of other insert arrangements or for application support, please consult Conesys/Aero Electric Connector.

Circular Connectors - PCB Contacts

MIL-DTL-38999 Series I, II, III, and MIL-DTL-26482 Series II

PC Tail Lengths

Standard contact length and diameter is identified on the main page for each PCB connector series/style (see pages 167 to 192 and 209 to 214). To choose an alternate contact length or diameter, locate the preferred length and diameter of contact in the tables on pages 229 Thru 234 select the modification code dash number specified for that contact configuration. Add the modification code to the end of the connector part number created from the part number builder.

For example: A connector using size 22 pin contacts in the standard configuration (standard diameter and length) would not require any modification to the part number. However, if a size 22 pin contact with a diameter of 0.019" and pc-tail length of 0.110" is required, the connector part number needs to be specified with a -1101 added to the end of the part number to specify the specific length and diameter required by the designer. Consult factory for further information or assistance.

Contact	Modification Code	Diameter	Tolerance	Tail Length	Tolerance
Size 22 Pin	Standard Config.	0.019	+/- .001	0.250	+/- .020
Size 22 Pin	-1101	0.019	+/- .001	0.110	+/- .020

Circular Connectors - PCB Contacts MIL-DTL-38999 Series I, II, III, and MIL-DTL-26482 Series II PC Tail Lengths

Standard contact length and diameter is identified on the main page for each PCB connector series/style (see pages 167 to 192 and 209 to 214. To choose an alternate contact length or diameter, locate the preferred length and diameter of contact in the tables on pages 229 Thru 234 select the modification code dash number specified for that contact configuration. Add the modification code to the end of the connector part number created from the part number builder.

For example: A connector using size 22 pin contacts in the standard configuration (standard diameter and length) would not require any modification to the part number. However, if a size 22 pin contact with a diameter of .0019" and pc-tail length of 0.110" is required, the connector part number needs to be specified with a -1101 added to the end of the part number to specify the specific length and diameter required by the designer. Consult factory for further information or assistance.

Circular Connectors - PCB Contacts

MIL-DTL-38999 Series I, II, III, and MIL-DTL-26482 Series II

PC Tail Lengths

Standard contact length and diameter is identified on the main page for each PCB connector series/style (see pages 167 to 192 and 209 to 214. To choose an alternate contact length or diameter, locate the preferred length and diameter of contact in the tables on pages 229 Thru 234 select the modification code dash number specified for that contact configuration. Add the modification code to the end of the connector part number created from the part number builder.

For example: A connector using size 22 pin contacts in the standard configuration (standard diameter and length) would not require any modification to the part number. However, if a size 22 pin contact with a diameter of .0019" and pc-tail length of 0.110" is required, the connector part number needs to be specified with a -1101 added to the end of the part number to specify the specific length and diameter required by the designer. Consult factory for further information or assistance.

Contact	Modification Code	Diameter	Tolerance	Tail Length	Tolerance
Size 20 Pin	Standard Config.	0.019	+/- .001	0.250	+/- .020
Size 20 Pin	-1201	0.019	+/- .001	0.110	+/- .020
