

## AC-DC Power Supplies Medical Type

# COSEL

PJMA

# PJMA-series

### ■ Feature

- 4kV isolation
- Economical design
- Suitable for BF application (Output-FG : 1MOPP, Input-Output : 2MOPP)
- Wide temperature range (-20°C to +70°C, Derating is required)
- Harmonic attenuator (Complies with IEC61000-3-2 class A)
- Universal input (AC85 - 264V, Derating is required)
- Low power consumption at no load

### ■ Safety agency approvals

ANSI/AAMI ES60601-1, EN60601-1 3rd

### ■ 5-year warranty (See Instruction Manual)

### ■ CE marking

Low Voltage Directive  
RoHS Directive

### ■ EMI

Complies with FCC-B, CISPR32-B, EN55011-B, EN55032-B, VCCI-B

### ■ EMS Compliance : EN61204-3, EN61000-6-2

IEC60601-1-2 (2014), IEC60601-1-2 (2015)

- EN61000-4-2
- EN61000-4-3
- EN61000-4-4
- EN61000-4-5
- EN61000-4-6
- EN61000-4-8
- EN61000-4-11

October 15, 2021

PJMA-1

# PJMA300F

Ordering information

① **PJM** ② **A** ③ **300** ④ **F** ⑤ **-** ⑥ **-**

Example recommended EMV/EMC filter  
**NAC-06-472**

High voltage pulse noise type : NAP series  
Low leakage current type : NAM series  
\* A higher current rating EMI/EMC filter may be recommended in view of the other devices that could be connected in parallel with the power supply.

- ① Series name
- ② Single output
- ③ Output wattage
- ④ Universal input
- ⑤ Output voltage
- ⑥ Optional \*6
  - C : with Coating
  - G : Low leakage current
  - V : External potentiometer for output voltage adjustment
  - R : Remote on/off (Required external power source)
  - F4: Low speed fan

See 5.1 in Instruction Manual.

\*Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

## SPECIFICATIONS

|                                    | MODEL                                                | PJMA300F-12                                                                                                  | PJMA300F-24                                                            | PJMA300F-36     | PJMA300F-48     |                 |

|                                    | HARMONIC ATTENUATOR *8                               | Complies with IEC61000-3-2 class A                                                                           |                                                                        |                 |                 |                 |

## SPECIFICATIONS

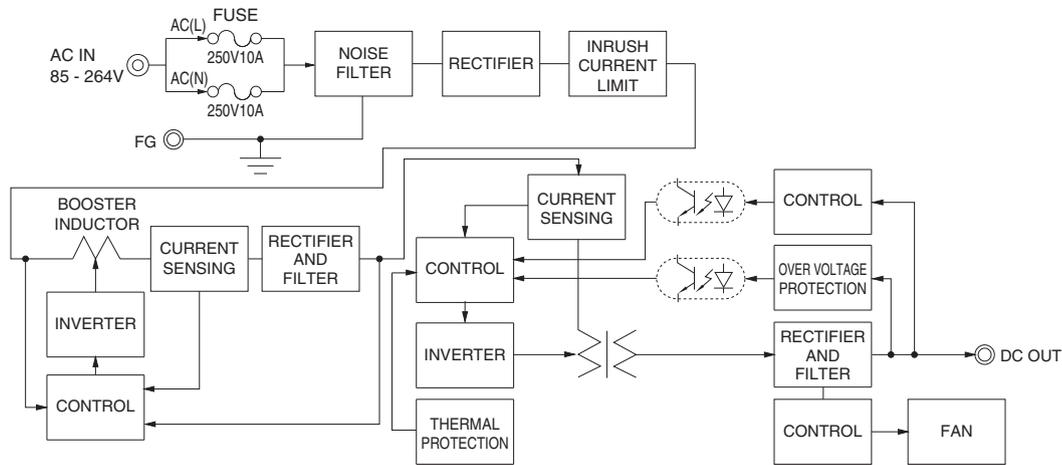

|          |                  |                                                                                                           |
|----------|------------------|-----------------------------------------------------------------------------------------------------------|
| OTHERS   | CASE SIZE/WEIGHT | 102 X 41 X 190mm [4.02 X 1.61 X 7.48 inches] (Excluding terminal block and screw) (W X H X D) / 1.0kg max |
|          | COOLING METHOD   | *7 Forced cooling (internal fan)                                                                          |
| WARRANTY | WARRANTY         | *5 5 years (subject to the operating conditions)                                                          |

- \*1 This is the result of measurement of the testing board with capacitors of 22  $\mu$ F and 0.1  $\mu$ F placed at 150 mm from the output terminals by a 20 MHz oscilloscope or a ripple-noise meter equivalent to Keisoku-Giken R104. See 1.6 of Instruction Manual for more details.
- \*2 Drift is the change in DC output for an eight hour period after a half-hour warm-up at 25°C.
- \*3 Consult us about dynamic load and input response.
- \*4 Output power derating is required. Refer to "Derating".
- \*5 See 4 in Instruction Manual for more details.
- \*6 Consult us about safety agency approvals for the models with optional functions.
- \*7 The fan speed slows down at no load.
- \*8 Consult us about other classes.
- \*9 The RC terminal is added to option -R models. The RC terminal is isolated from input, output, and FG.
- \* Do not use the power supply in overcurrent conditions or in unspecified input voltage ranges. Otherwise the internal components may be damaged.
- \* Parallel operation is not possible with this mode.
- \* Sound noise may be heard from the power supply when used for pulse load.

## Features

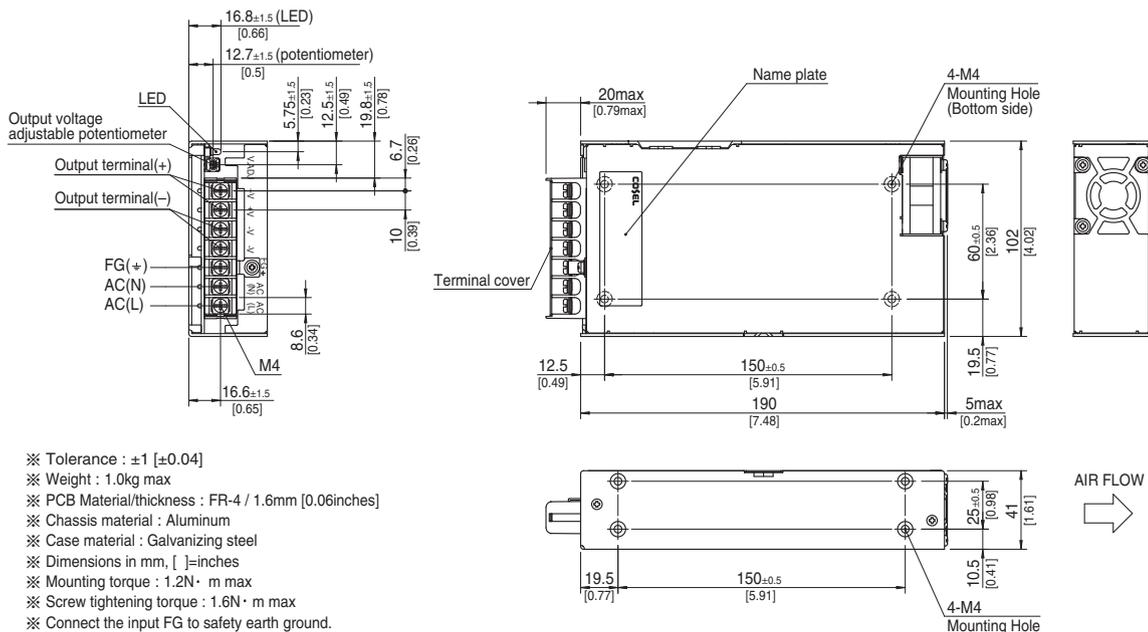

- 4kV isolation
- Economical design
- Suitable for BF application (Output-FG : 1MOPP, Input-Output : 2MOPP)
- Wide temperature range (-20°C to +70°C, Refer to "Derating")
- Harmonic attenuator (Complies with IEC61000-3-2 class A)
- Universal input (AC85 - 264V, Refer to "Derating")
- Low power consumption at no load

## Block diagram

## External view

The external size of -V option and -R option models is different from the standard model. See "5. Options and Others" in Instruction Manual for more details.

- ※ Tolerance :  $\pm 1$  [ $\pm 0.04$ ]
- ※ Weight : 1.0kg max
- ※ PCB Material/thickness : FR-4 / 1.6mm [0.06inches]
- ※ Chassis material : Aluminum
- ※ Case material : Galvanizing steel
- ※ Dimensions in mm, [ ]=inches
- ※ Mounting torque : 1.2N · m max
- ※ Screw tightening torque : 1.6N · m max
- ※ Connect the input FG to safety earth ground.

# PJMA600F

Ordering information

① **PJM** ② **A** ③ **600** ④ **F** ⑤ **-□** ⑥ **-□**

Example recommended EMV/EMC filter  
**NAC-16-472**

High voltage pulse noise type : NAP series  
Low leakage current type : NAM series  
\* A higher current rating EMI/EMC filter may be recommended in view of the other devices that could be connected in parallel with the power supply.

- ① Series name
  - ② Single output
  - ③ Output wattage
  - ④ Universal input
  - ⑤ Output voltage
  - ⑥ Optional \*6
    - C : with Coating
    - G : Low leakage current
    - V : External potentiometer for output voltage adjustment
    - W1: LV alarm and Remote sensing
    - R : Remote on/off (Required external power source)
    - F4: Low speed fan
- See 5.1 in Instruction Manual.

\*Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

# PJMA1000F

Ordering information

① **PJM**   ② **A**   ③ **1000**   ④ **F**   ⑤ **-□**   ⑥ **-□**

Example recommended EMV/EMC filter  
**NAC-20-472**

High voltage pulse noise type : NAP series  
Low leakage current type : NAM series

- ① Series name
  - ② Single output
  - ③ Output wattage
  - ④ Universal input
  - ⑤ Output voltage
  - ⑥ Optional \*8
  - C : with Coating
  - G : Low leakage current
  - V : External potentiometer for output voltage adjustment
  - W : Parallel operation, LV alarm and Remote sensing
  - W1: LV alarm and Remote sensing
  - R : Remote on/off (Required external power source)
  - F4: Low speed fan
- See 5.1 in Instruction Manual.

\*Make sure necessary tests will be carried out on your end equipment with the power supply installed in accordance with any required EMC/EMI regulations.

| VIBRATION                               |                | 10 - 55Hz, 19.6m/s <sup>2</sup> (2G), 3minutes period, 60minutes each along X, Y and Z axes                  |                 |                 |                 |
| IMPACT                                  |                | 196.1m/s <sup>2</sup> (20G), 11ms, once each X, Y and Z axes                                                 |                 |                 |                 |
| AGENCY APPROVALS                        |                | ANSI/AAMI ES60601-1, EN60601-1 3rd                                                                           |                 |                 |                 |
| CONDUCTED NOISE                         |                | Complies with FCC-B, VCCI-B, CISPR32-B, EN55011-B, EN55032-B                                                 |                 |                 |                 |
| HARMONIC ATTENUATOR *5                  |                | Complies with IEC61000-3-2 class A                                                                           |                 |                 |                 |

## SPECIFICATIONS

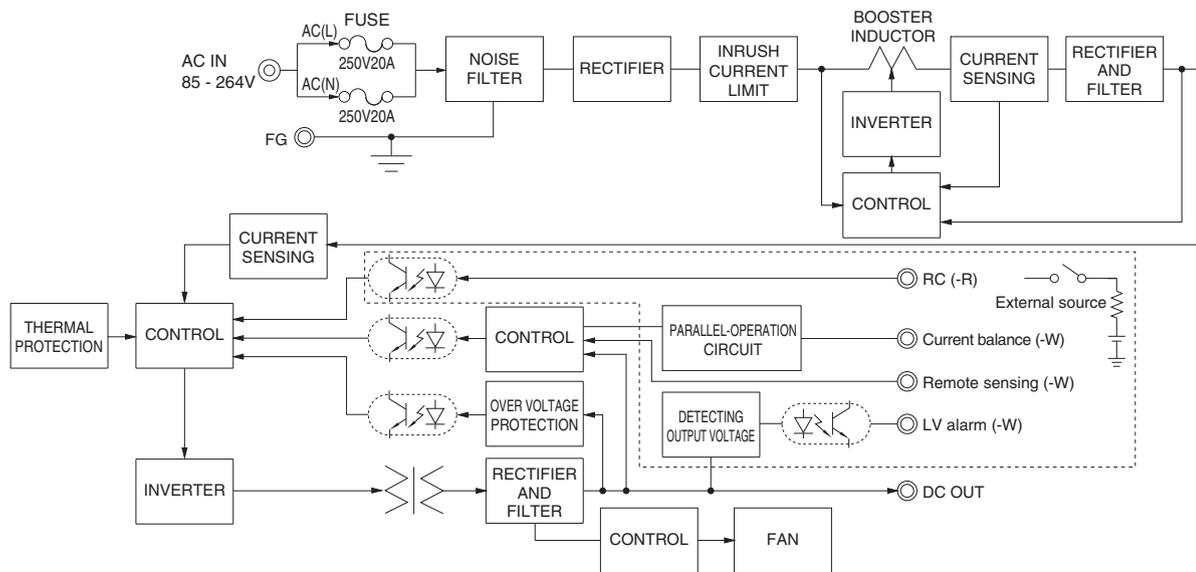

|          |                  |                                                                                                           |
|----------|------------------|-----------------------------------------------------------------------------------------------------------|
| OTHERS   | CASE SIZE/WEIGHT | 150 X 61 X 240mm [5.91 X 2.40 X 9.45 inches] (Excluding terminal block and screw) (W X H X D) / 2.8kg max |
|          | COOLING METHOD   | *6 Forced cooling (internal fan)                                                                          |
| WARRANTY | WARRANTY         | *7 5 years (subject to the operating conditions)                                                          |

- \*1 This is the result of measurement of the testing board with capacitors of 22  $\mu$ F and 0.1  $\mu$ F placed at 150 mm from the output terminals by a 20 MHz oscilloscope or a ripple-noise meter equivalent to Keisoku-Giken RM104.  
See 1.6 of Instruction Manual for more details.
- \*2 Consult us about dynamic load and input response.
- \*3 Drift is the change in DC output for an eight hour period after a half-hour warm-up at 25°C.
- \*4 Output power derating is required. Refer to "Derating".
- \*5 Consult us about other classes.
- \*6 The fan speed slows down or stops at no load.
- \*7 See 3 in Instruction Manual for more details.
- \*8 Consult us about safety agency approvals for the models with optional functions.
- \* Do not use the power supply in overcurrent conditions or in unspecified input voltage ranges. Otherwise the internal components may be damaged.
- \* Parallel operation is not possible with this mode.
- \* Audible noise may be heard from the power supply when used for pulse load.

## Features

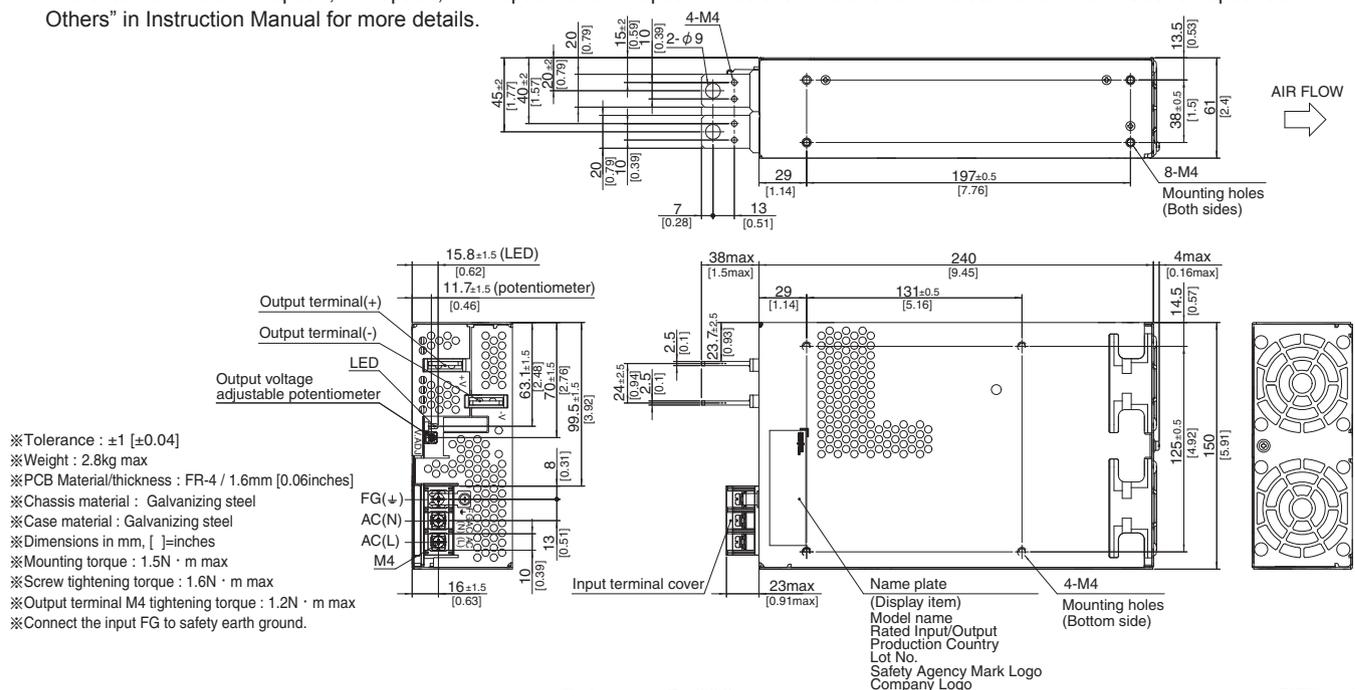

- 4kV isolation
- Economical design
- Suitable for BF application (Output-FG : 1MOPP, Input-Output : 2MOPP)
- Wide temperature range (-20°C to +70°C, Refer to "Derating")
- Harmonic attenuator (Complies with IEC61000-3-2 class A)
- Universal input (AC85 - 264V, Refer to "Derating")
- Low power consumption at no load

## Block diagram

## External view

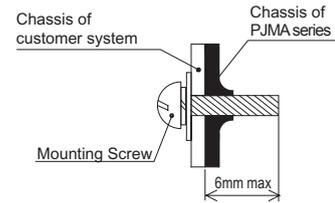

The external size of -V option, -W option, -W1 option and -R option models is different from the standard model. See "5. Options and Others" in Instruction Manual for more details.

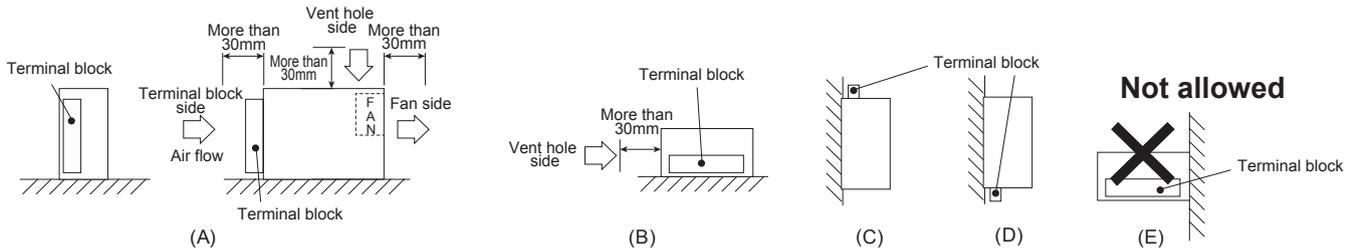

- ※Tolerance :  $\pm 1$  [ $\pm 0.04$ ]
- ※Weight : 2.8kg max
- ※PCB Material/thickness : FR-4 / 1.6mm [0.06inches]
- ※Chassis material : Galvanizing steel
- ※Case material : Galvanizing steel
- ※Dimensions in mm, [ ]=inches
- ※Mounting torque : 1.5N · m max
- ※Screw tightening torque : 1.6N · m max
- ※Output terminal M4 tightening torque : 1.2N · m max
- ※Connect the input FG to safety earth ground.

## Assembling and Installation Method

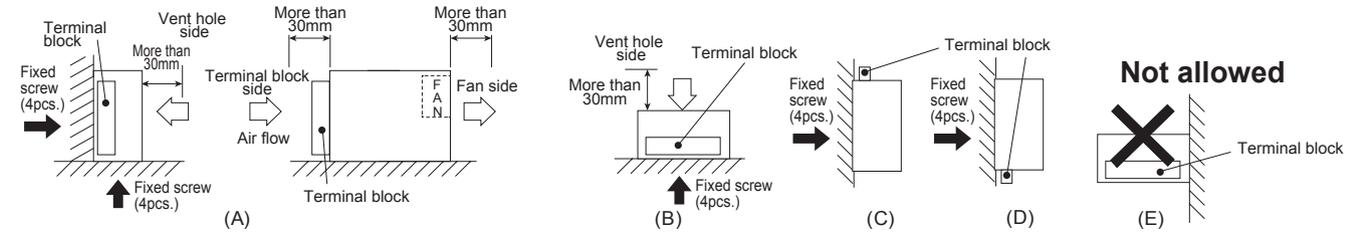

- Do not insert a screw more than 6mm from the outside of a power supply to keep enough insulation distance between the screw and internal components.

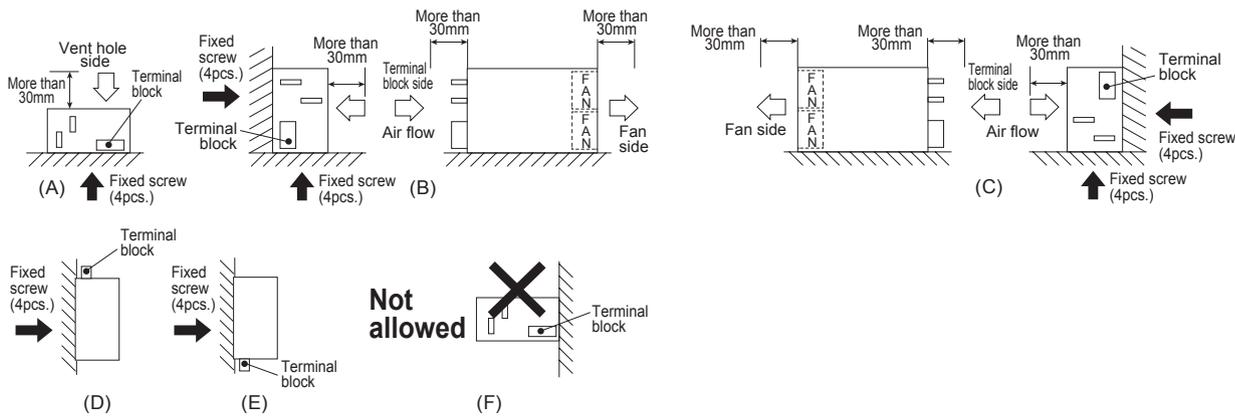

### PJMA300F

### PJMA600F

### PJMA1000F

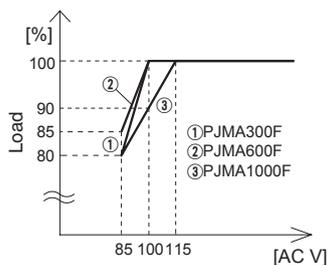

## Assembling and Installation Method

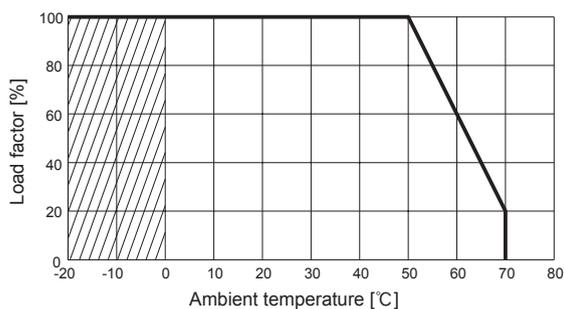

- When mounting the power supply with screws, it is recommended that this be done as shown above. If other methods are used, be sure the weight of the power supply is taken into account.
- Avoid the not allowed installation method as it gives excessive stress to the mounting holes.
- Do not block air flow of the built-in fan (terminal block and ventilation hole).
- If the power supply is used in a dusty environment, use an airfilter. Make sure air flow is not blocked.
- If the built-in fan stops, thermal protection will work and the output will stop.
- The life expectancy (R(t)=90%) of the built-in fan varies depending on the operating condition.

Derating

● Input voltage Derating Curve

● Ambient temperature Derating Curve

- In the hatched area, the specification of Ripple, Ripple Noise is different from other area.
- The ambient temperature is defined as the temperature of the air (at the terminal block side) that the built-in cooling fan blows into the power supply. Please pay attention to the heat generated by the input and output wires. Please consult us for more details.

Instruction Manual

◆ It is necessary to read the “Instruction Manual” and “Before using our product” before you use our product.
