

Chrome II DIN Rail Power Supply

DRC-60W Series (Class II & NEC Class 2) / DRC-□V060W1RZ

CHROME II

Highlights & Features

- Class II, Double Isolation (No Earth connection is required)
- Mechanical dimension are designed to meet DIN 43880 for building automation
- Low no load power consumption and compliance with DOE VI efficiency standards
- NEC Class 2 / Limited Power Source (LPS) certified
- Over Voltage Category III

Safety Standards

CB Certified for worldwide use

Model Number: DRC-□V060W1RZ
Unit Weight: 0.17 kg (0.37 lb)
Dimensions (H x W x D): 87.5 x 52.5 x 55.0 mm
 (3.44 x 2.07 x 2.17 inch)

General Description

The Chrome II Series is Delta's latest DIN rail power supply. It features 30 W / 60 W / 100 W models with up to 92.16 W maximum output. It has 12 V, 24 V, and 48 V nominal voltage outputs and accepts 85-264 Vac universal voltage input. It boasts a compact design to be aligned with DIN 43880, a standard that defines dimensions for distribution boards of building control and home automation systems. The Series is also certified to IEC/EN 60335-1, IEC 61558-1, and IEC 61558-2-16 to ensure electrical safety for distribution boards. All the above features make the Series suitable for building automation and household appliances. The double-isolated input eliminates the need of an earth connection for a low leakage current. It complies to DOE VI energy efficiency standard with its lower no-load power consumption.

Model Information

Chrome II DIN Rail Power Supply

Model Number	Input Voltage Range	Rated Output Voltage	Rated Output Current
DRC-12V060W1RZ	85-264 Vac	12 Vdc	4.5 A
DRC-24V060W1RZ		24 Vdc	2.5 A
DRC-48V060W1RZ		48 Vdc	1.25 A

Model Numbering

Input Ratings / Characteristics

Nominal Input Voltage	100-240 Vac		
Input Voltage Range	85-264 Vac		
Nominal Input Frequency	50-60 Hz		
Input Frequency Range	47-63 Hz		
Input Current	< 1.2A @ 115 Vac, < 0.8A @ 230 Vac	< 1.3A @ 115 Vac, < 0.9A @ 230 Vac	< 1.1A @ 115 Vac, < 0.7A @ 230 Vac
Efficiency at 100% Load	87.0% typ. @ 115 Vac 88.0% typ. @ 230 Vac	89.0% typ. @ 115 Vac 90.5% typ. @ 230 Vac	90.0% typ. @ 115 Vac 92.0% typ. @ 230 Vac
Average Efficiency (25%, 50%, 75%, 100%)	88.0% typ. @ 115 Vac	89.5% typ. @ 115 Vac	90.0% typ. @ 115 Vac
No Load Power Consumption	0.15 W typ. @ 115 Vac & 230 Vac	0.21 W typ. @ 115 Vac & 230 Vac	0.21 W typ. @ 115 Vac & 230 Vac
Max Inrush Current (Cold Start)	40 A typ. @ 230 Vac		
Leakage Current	< 0.25 mA @ 240 Vac		

Output Ratings / Characteristics*1

Nominal Output Voltage	12 Vdc	24 Vdc	48 Vdc
Factory Set Point Tolerance	12 Vdc ± 1%	24 Vdc ± 1%	48 Vdc ± 1%
Output Voltage Adjustment Range	10.8-13.2 Vdc	21.6-26.4 Vdc	43.2-55 Vdc
Output Current	0-4.5 A	0-2.5 A	0-1.25 A
Output Power	54 W max.	60 W max.	60 W max.
Line Regulation	± 0.5% @ 115 Vac & 230 Vac		
Load Regulation	± 1.0%	± 0.5%	± 0.5%
PARD*2 (20 MHz)	< 120 mVpp @ 0°C to +70°C < 360 mVpp @ -30°C to 0°C	< 150 mVpp @ 0°C to +70°C < 450 mVpp @ -30°C to 0°C	< 150 mVpp @ 0°C to +70°C < 450 mVpp @ -30°C to 0°C
Rise Time	30 ms typ. @ 115 Vac & 230 Vac		
Start-up Time	300 ms typ. @ 115 Vac & 230 Vac		
Hold-up Time	16 ms typ. @ 115 Vac & 80 ms typ. 230 Vac (100% load)		
Dynamic Response (Overshoot & Undershoot O/P Voltage)	± 10% @ 115 Vac & 230 Vac input, 10-100% load (Slew Rate: 2.5 A/μS, 50% duty cycle @ 5 Hz & 10 kHz)		
Start-up with Capacitive Loads	8,000 μF max.	8,000 μF max.	3,000 μF max.

*1 For power will be de-rating from 50°C to 70°C, and Vin < 100 Vac, see Engineering Data power de-rating information.

*2 PARD is measured with an AC coupling mode, 5 cm wires, and in parallel to end terminal with 0.1 μF ceramic capacitor & 47 μF electrolytic capacitor. PSU need to burn in around 5 minutes when AMB ≤ 0°C

Chrome II DIN Rail Power Supply

DRC-60W Series (Class II & NEC Class 2) / DRC-□V060W1RZ

Model Number	DRC-12V060W1RZ	DRC-24V060W1RZ	DRC-48V060W1RZ

Mechanical

Case Cover	Plastic	
Dimensions (H x W x D)	87.5 x 52.5 x 55.0 mm (3.44 x 2.07 x 2.17 inch)	
Unit Weight	0.17 kg (0.37 lb)	
Indicator	Green LED	DC OK
Cooling System	Convection	
Terminal* ³	Input	M2.5 x 2 Pins (Rated 300 V / 16 A)
	Output	M2.5 x 2 Pins (Rated 300 V / 16 A)
Wire	Input	AWG 24-12
	Output	AWG 20-12
Mounting Rail	Standard TS35 DIN Rail in accordance with EN 60715	
Noise (1 Meter from power supply)	Sound Pressure Level (SPL) < 25 dBA	

*³ The torque at the terminal connector shall not exceed 4 Kgf.cm. (3.5 lbf.in).

Environment

Surrounding Air Temperature	Operating	-30°C to +70°C (-40°C Cold Start)
	Storage	-40°C to +85°C
Power De-rating	Temperature	> 50°C de-rate power by 2% / °C
	Input Voltage	< 100Vac de-rate power by 1% / Vac
Operating Humidity	5 to 95% RH (Non-Condensing)	
Operating Altitude	0 to 5,000 Meters (16,400 ft)	
Shock Test	Non-Operating	IEC 60068-2-27, Half Sine Wave: 50 G for duration of 11 ms; 3 times per direction
Vibration	Operating	IEC 60068-2-6, Sine Wave: 10 Hz to 500 Hz @ 2 G; 10 min per cycle, 60 min for X, Y, Z direction
Over Voltage Category	II (Compliance to EN 62477-1 OVC III with 2,000 Meters altitude)	
Pollution Degree	2

Engineering Data

Output Load De-rating VS Surrounding Air Temperature

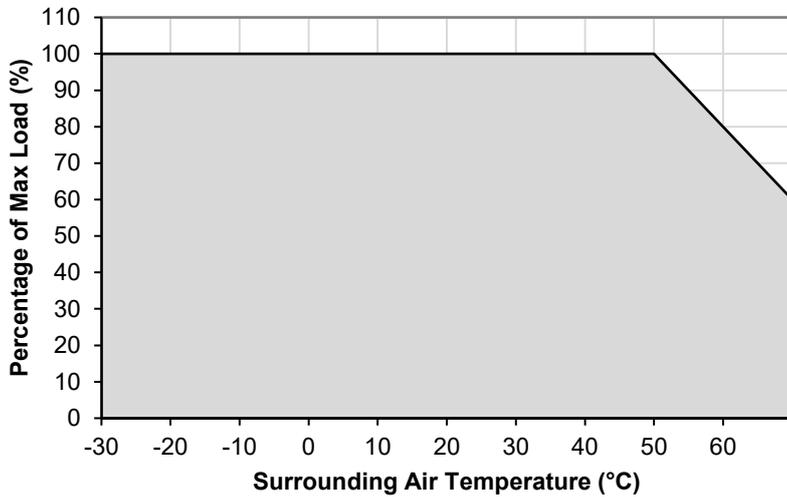

Fig. 1 De-rating for Vertical Mounting Orientation
 > 50°C de-rate power by 2.0% / °C

Note

1. Power supply components may degrade, or be damaged, when the power supply is continuously used outside the shaded region, refer to the graph shown in Fig. 1.
2. The PSU will be bouncing and start up time will not exceed 5 s when ambient temperature at -30°C.
3. If the output capacity is not reduced when the surrounding air temperature > 50°C, the device will run into Over Temperature Protection. When activated, power supply will latch off, until the surrounding air temperature is lowered or the load is reduced as far as necessary to keep the device in working condition, and require removal/re-application of input AC voltage in order to restart.
4. In order for the device to function in the manner intended, it is also necessary to keep a safety distance as recommended in the safety instructions while the device is in operation.
5. Depending on the surrounding air temperature and output load delivered by the power supply, the device can be very hot!
6. Need to consider power de-rating if Surrounding Air Temperature is > 50°C.
7. If the device has to be mounted in any other orientation, please leave a message via the [Contact Us](#) form.

Output Load De-rating VS Input Voltage

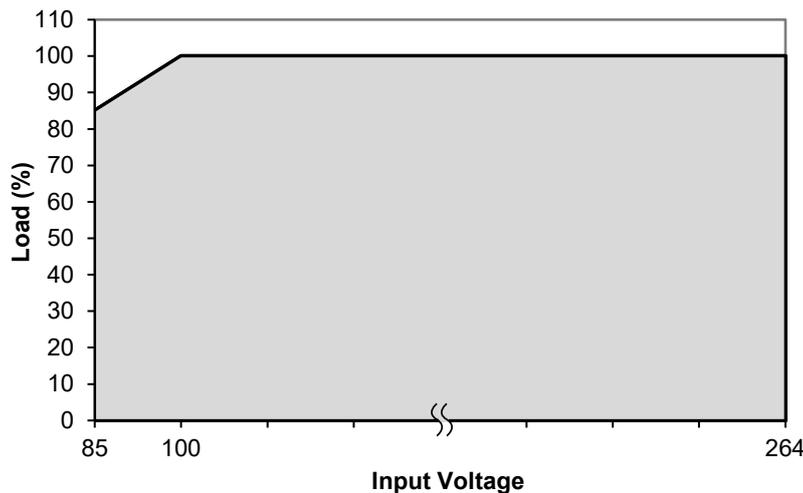

Fig. 2 De-rating for AC Input Voltage
 < 100 Vac de-rate power by 1 % / Vac

- No output power de-rating for the input voltage from 100 Vac to 264 Vac

Chrome II DIN Rail Power Supply

DRC-60W Series (Class II & NEC Class 2) / DRC-□V060W1RZ

Assembly & Installation

The power supply unit (PSU) can be mounted on 35 mm DIN rails in accordance with EN 60715. The device should be installed with input terminal block at the bottom.

Each device is delivered ready to install.

Mounting

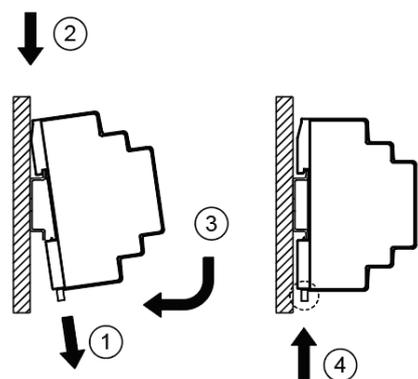

Fig. 2.1 Mounting

Snap on the DIN rail as shown in Fig. 2.1:

1. Pull the unit's DIN rail latch OUT.
2. Tilt the unit slightly upwards, hook the top end onto the DIN rail and push downwards until stopped.
3. Position the bottom front end against the DIN rail.
4. Push the unit's latch DIN rail IN to lock.

Dismounting

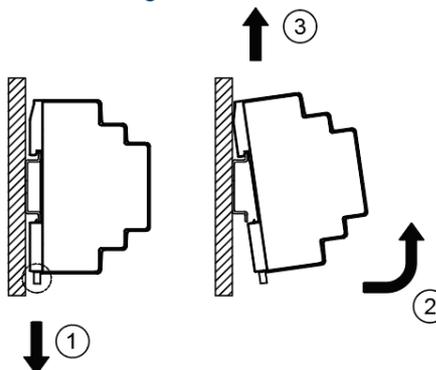

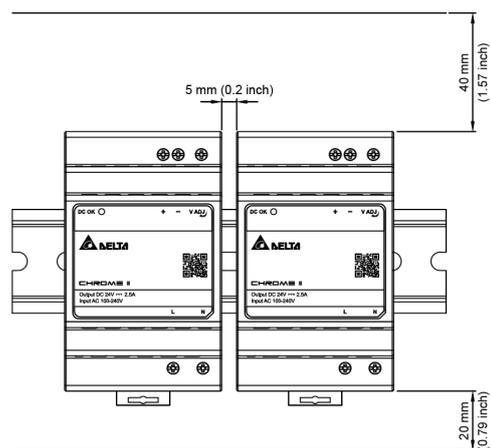

Fig. 2.2 Dismounting

To uninstall, pull the unit's DIN rail latch OUT as shown in Fig. 2.2. Tilt the bottom part of the unit out. Push the unit up and pull out from the DIN rail.

Safety Instructions

Vertical Mounting

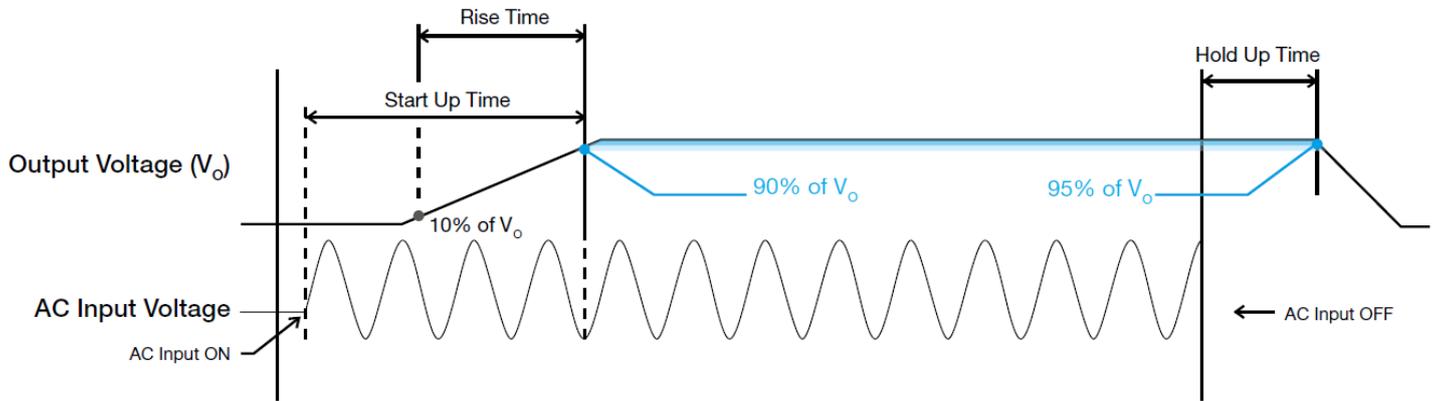

- ALWAYS switch mains of input power OFF before connecting and disconnecting the input voltage to the unit. If mains are not turned OFF, there is risk of explosion / severe damage.
- To guarantee sufficient convection cooling, keep a distance of 40 mm (1.57 inch) above and 20 mm (0.79 inch) below the device as well as a lateral distance of 5 mm (0.2 inch) to other units and if load less than 50%, lateral distance can be 0 mm. In case the adjacent device is a heat source, the lateral distance will be 15 mm (0.6 inch).
- Note that the enclosure of the device can become very hot depending on the surrounding air temperature and load of the power supply. Risk of burns!
- The main power must be turned off before connecting or disconnecting wires to the terminals.
- DO NOT insert any objects into the unit.
- Hazardous voltages may be present for up to 5 minutes after the input mains voltage is disconnected. Do not touch the unit during this time.
- The power supplies are built in units and must be installed in a cabinet or room (condensation free environment and indoor location) that is relatively free of conductive contaminants.

Chrome II DIN Rail Power Supply

DRC-60W Series (Class II & NEC Class 2) / DRC-□V060W1RZ

Functions

- Graph illustrating the Start-up Time, Rise Time, and Hold-up Time

Start-up Time

The time required for the output voltage to reach 90% of its final steady state set value, after the input voltage is applied.

Rise Time

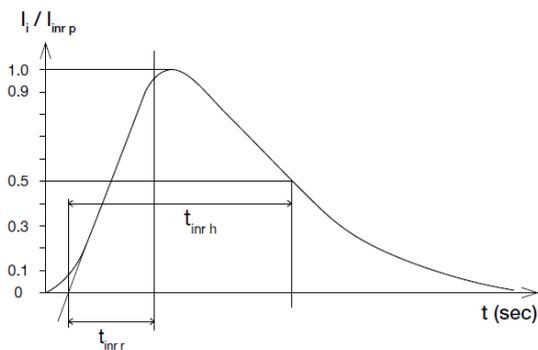

The time required for the output voltage to change from 10% to 90% of its final steady state set value.

Hold-up Time

Time between the collapse of the AC input voltage, and the output falling to 95% of its steady state set value.

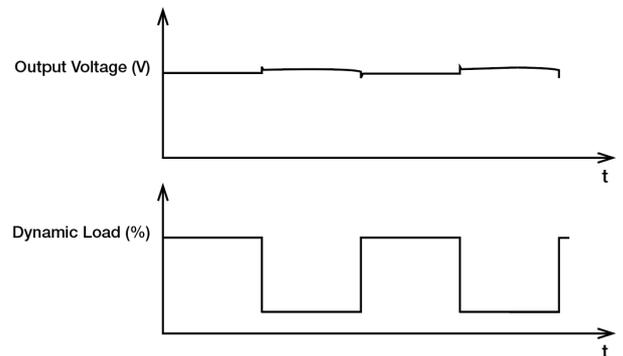

Inrush Current

Inrush current is the peak, instantaneous, input current measured and, occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.

Dynamic Response

The power supply output voltage will remain within $\pm 10\%$ of its steady state value, when subjected to a dynamic load from 10% to 100% of its rated current.

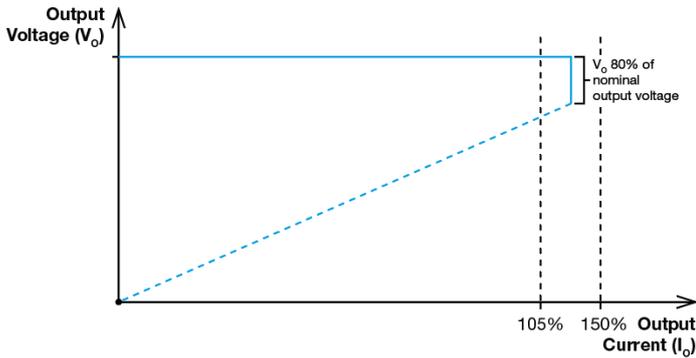

Chrome II DIN Rail Power Supply

DRC-60W Series (Class II & NEC Class 2) / DRC-□V060W1RZ

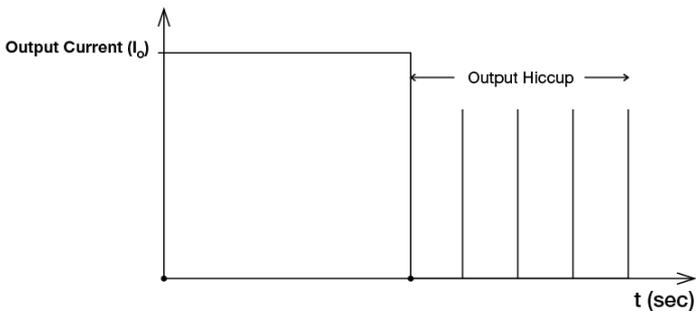

Overload & Overcurrent Protections (Continuous Current)

The power supply offers constant current limit protection for inductive and capacitive load applications when output current range is 105~150% of I_o (Max load) and output voltage is larger than 80%. Upon such an occurrence, the V_o (output voltage) will start to droop. Once the power supply has reached its maximum power limit, the protection will be activated; and, the power supply will operate in continuous current. The power supply will recover once the cause of OLP or OCP is removed, and I_o (output current) is back within the specified range.

Short Circuit Protection (Auto-Recovery)

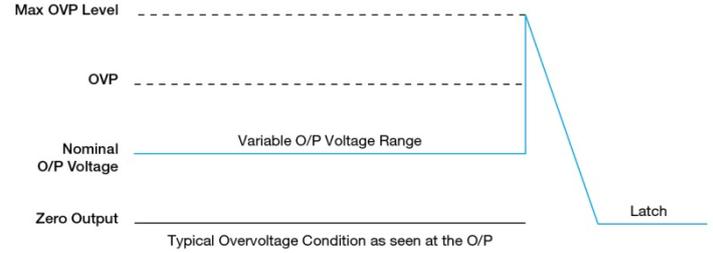

The power supply's output Short Circuit Protection function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode". The power supply will return to normal operation after the short circuit is removed.

Overvoltage Protection (Latch Mode)

The power supply's overvoltage circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications as described in "Protections" section. Power supply will latch off, and require removal/re-application of input AC voltage in order to restart.

The power supply should be latch.

Over Temperature Protection (Latch Mode)

As described in load de-rating section, the power supply also has Over Temperature Protection (OTP). In the event of a higher operating temperature at 100% load; or, when the operating temperature is beyond what is recommended in the de-rating graph, the OTP circuit will be activated. When activated, power supply will latch off, until the surrounding air temperature drops to its normal operating temperature or the load is reduced as recommended in the de-rating graph. Removal/re-application of input AC voltage will then be required in order to restart.
