

Digi XBee XR 900 Japan

The Digi XBee XR family operates in the 920.5 to 928.1 MHz range, delivering superior performance and interference immunity

The **Digi XBee® XR 900 Japan** module is a compact and reliable solution supporting deployment of long-range connectivity applications. The pre-certified module operates between 920.5 and 928.1 MHz in compliance with standards.

Secure, robust and reliable

The Digi XBee XR 900 Japan modules can be configured easily using Digi's easy-to-use **XCTU®** software or via Digi's simplified AT or API command sets. They are pre-certified for use in multiple countries and include integrated antennas, removing the burden of RF development/support costs and enabling fast time to market for OEM designs. The utilization of frequency agility on the XBee XR along with an industrial temperature range of -40 °C to 85 °C (-40 °F to 185 °F) make it ideal for applications in noisy, challenging environments.

The module supports both point-to-point and mesh networking protocols (**DigiMesh®**), with a line-of-sight range up to 8.5 kilometers. It is well suited for agriculture and energy applications where long-distance communication is required.

The Digi XBee XR 900 Japan RF module is a complete hardware and software solution that works directly out of the box. Development kits along with Digi XBee Tools support the complete IoT application lifecycle, from evaluation, testing and prototyping through manufacturing and deployment to long-term network management.

Key features, benefits and applications

- Fully certified for use in unlicensed 900 MHz band
- RF module based on Silicon Labs EFR32 microcontroller
- Design includes SAW filter for optimal performance in noisy RF environments
- 256-bit AES encryption for secure data communication
- **DigiMesh** networking topology for redundancy and reliability
- Simple configuration using **Digi XCTU** accelerates time to market
- **Digi XBee Tools** to simplify tasks and get to market faster

Specifications

SPECIFICATIONS		DIGI XBEE XR 900 JAPAN	
HARDWARE			
PROCESSOR		EFR32FG13P231F512 transceiver at 40 MHz	
FREQUENCY BAND		920.5 MHz – 928.1 MHz	
ANTENNA OPTIONS		Dipole antennas with U.FL connector, RF pad	
AVAILABLE FORM FACTORS		Micro (MMT), surface mount (SMT) and through-hole (TH)	
WEIGHT		MMT: 1.2 grams (0.042 oz) SMT: 3.0 grams (0.106 oz) TH: 3.1 grams (0.109 oz)	
DIMENSIONS		MMT: 13 mm x 19 mm x 2 mm (0.533 in x 0.76 in x 0.087 in) SMT: 2.199 cm x 3.4 cm x 0.305 cm (0.866 in x 1.33 x 0.120 in) TH: 2.438 cm x 2.761 cm (0.960 in x 1.087 in)	
PERFORMANCE			
RF DATA RATE		Low data rate: 10 kbps; high data rate: 110 kbps	
UART DATA RATE		Up to 921.6 kbps	
SPI DATA RATE		Up to 5 Mbps	
LINE-OF-SIGHT RANGE*		Up to 8.5 km (5 mi) rural, up to 1.5 km (1 mi) urban	
INDOOR RANGE		Up to 70 m (230 ft)	
TRANSMIT POWER		Up to 13 dBm ERP	
RECEIVER SENSITIVITY		Low data rate: –113 dBm; high data rate: –108 dBm	
RECEIVER BLOCKING		Below 900 MHz and above 930 MHz; >70 dB	
FEATURES			
DIGITAL I/O		15	
AVAILABLE CHANNEL FREQUENCIES		38 channels	
ANALOG INPUTS		(4) 10-bit ADC inputs	
OPERATING TEMPERATURE		–40 °C to 85 °C (–40 °F to 185 °F)	
NETWORKING TOPOLOGIES		Point-to-point/point-to-multipoint, DigiMesh	
SECURITY		256-bit AES encryption	
POWER			
SUPPLY VOLTAGE		2.1 – 3.6 VDC, 3.3 VDC typical	
TRANSMIT CURRENT		79 mA	
RECEIVE CURRENT		28 mA	
SLEEP CURRENT		1.2 uA	
REGULATORY APPROVALS			
MIC-TELEC		Yes	
ROHS		Yes	

*Range figure estimates are based on free-air terrain with limited sources of interference. Actual range will vary based on transmitting power, orientation of transmitter and receiver, height of transmitting antenna, height of receiving antenna, weather conditions, interference sources in the area, and terrain between receiver and transmitter, including indoor and outdoor structures such as walls, trees, buildings, hills, and mountains.

Digi XCTU and Digi XBee Tools

Digi XCTU

Digi XCTU is a free multi-platform application designed to enable developers to interact with Digi RF modules through a simple-to-use graphical interface. It includes a tool suite that makes it easy to set up, configure and test **Digi XBee RF modules**.

[Learn more at digi.com/XCTU](http://digi.com/XCTU).

Next generation configuration platform for XBee / RF solutions

Digi XCTU includes all of the tools a developer needs to quickly get up and running with Digi XBee. This tool includes unique features like a graphical network view, which graphically represents the Digi XBee network along with the signal strength of each connection. The Digi XBee API frame builder intuitively helps to build and interpret API frames for Digi XBees being used in API mode. These and other features combine to make development on the Digi XBee platform easier than ever.

Features

- Digi XCTU is a **free, multi-platform** application compatible with Windows, MacOS and Linux.
- It provides a **Graphical Network View** for simple wireless network configuration and architecture.
- The **API Frame Builder** is a simple development tool for quickly building Digi XBee API frames.
- The **Firmware Release Notes Viewer** allows users to explore and read firmware release notes.

Digi XBee Tools

DEVELOP

BUILD

DEPLOY

MANAGE

Digi XBee Tools support the complete IoT application lifecycle, from the evaluation, testing and prototyping phase through manufacturing and deployment to long-term network management.

Digi XBee Tools offer total lifecycle management from the moment you launch development of your IoT application, through production of your configured devices, on-site installation and monitoring and management of your deployed Digi XBee network.

DIGI XCTU

Additional highlights

- You can manage and configure multiple RF devices, even remotely (over-the-air) connected devices.
- The firmware update process seamlessly restores your module settings, automatically handling mode and baud rate changes.
- Two specific API and AT consoles enable you to communicate with your radio devices.
- You can save your console sessions and load them in a different PC running Digi XCTU.
- Digi XCTU includes a set of embedded tools that can be executed without having any RF module connected:
 - Frames generator: Easily generate any kind of API frame to save its value.
 - Frames interpreter: Decode an API frame and see its specific frame values.
 - Recovery: Recover radio modules that have damaged firmware or are in programming mode.
 - Load console session: Load a console session saved in any PC running Digi XCTU.
 - Range test: Perform a range test between two radio modules of the same network.
 - Firmware explorer: Navigate through XCTU's firmware library.
- An update process allows you to automatically update the application itself and the radio firmware library without needing to download any extra files.
- Digi XCTU contains complete and comprehensive documentation which can be accessed at any time.
