### **Energy Meters**

 3-349-867-03  
 6/10.20

- Professional energy meter for 2, 3 and 4-wire systems with 5(80) A direct connection or 1(6) A transformer connection (incl. 5(6) A)
- Accuracy class B for industrial and commercial use, as well as for household use with highly demanding requirements
- Cost savings thanks to initial calibration at the factory in accordance with MID, conformity assessment procedure modules B and D
- Configurable, multifunctional variants for acquiring reactive energy and mains quantities
- 4 quadrant measurement (import and export)
- Indicates installation errors: direction of phase rotation, phase failure, reversed transformer polarity, overload
- Universal pulse output (2-fold) with adjustable pulse rate and pulse duration, as well as selectable voltage range
- Communication via integrated interfaces: LON, M-Bus, Modbus RTU, TCP/IP (Modbus TCP, HTTP, BACnet)
- 4 tariffs (hardware-controlled as standard feature), plus 4 additional tariffs (software controlled) with bus (features W1 ... W7)
- Tamper-proof cover, configuration disabling
- Quality product made in Germany

**3** JAHRE GARANTIE

**EBY**  
8

Feature P9

**LONWORKS®****M-Bus****BACnet** \* ETHERNET**Modbus**

### **Applications**

The calibrated energy meter can be used to acquire and bill active energy in industrial, household, commercial and building management applications. Relevant values are transmitted to data logging, billing and optimizing systems, as well as to building automation and control technology applications, by means of a pulse output or via a bus interface. Installation itself is extremely simple because the meter detects connection errors, which are indicated immediately. Maximum convenience is assured by displaying active power, which provides immediate information regarding momentary circuit load. If you wish to have more ample information about mains parameters, you have the option of adjusting the functions flexibly to your measuring task.

### **Applicable Regulations and Standards**

|                                  |  |
|----------------------------------|--|
| DIN EN 50470-1<br>VDE 418-0-1    | Electricity metering equipment (a.c.)<br>Part 1: General requirements, tests and test conditions – Metering equipment – EMC requirements |
| DIN EN 50470-3<br>VDE 418-0-3    | Part 3: Particular requirements – Static meters for active energy (class indexes A, B and C)   |
| DIN EN 60529<br>VDE 0470-1       | Test instruments and test procedures – Degrees of protection provided by enclosures (IP code)  |
| DIN 43856                        | Integrating meters, tariff time-switches and ripple control receivers  |
| DIN EN 62053-31<br>VDE 0418-3-31 | Pulse output devices for electromechanical or electronic meters  |
| DIN EN 62053-23                  | Electricity metering equipment (a.c.) – Particular requirements, Part 23: Static meters for reactive energy (classes 2 and 3)            |

### **Multifunctional Variant**

Depending on the type of multifunctional variant, the meter is also capable of acquiring reactive power and indicating up to 33 additional measured quantities directly on the display.

As a result, voltage level, utilization of individual phases, reactive power component and the functioning of compensation systems can be evaluated at any time by simply pressing a button without any additional measuring equipment. Refer to the table below for details.

| Measuring Function                   | Measured Quantity    | Accuracy<br>(ref. cond.) | Display (Feature) |    |                 |                 |

| Burst  | 4 kV/2 kV (DIN EN 61000-4-4)   |
| Conducted interference                           | 10 V (DIN EN 61000-4-6)  |
| Magnetic field and line frequency                | 0.5 mT (DIN EN 61000-4-8)  |
| Voltage dips                                     | (DIN EN 61000-4-11)  |
| Interference emission                            | EN 55022 class B   |

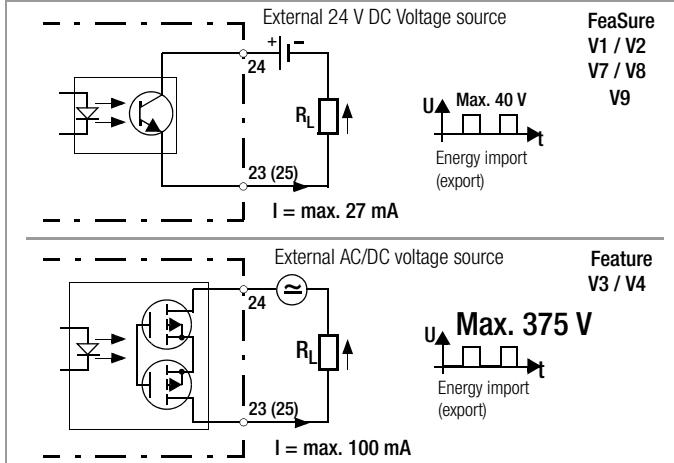

#### Pulse output

By default, the energy meters are equipped with two pulse or one bus output as standard equipment (see below). The pulse outputs are electrically isolated from the measuring circuit by means of an optocoupler.

#### Electrical Values

|                           |   |
|---------------------------|---|
| Pulse generator constants | With direct connection:<br>1000 pulses per kWh (adjustable with V2/V4)<br>With transformer connection:<br>1000 pulses per kWh (adjustable with V2/V4) |
| Pulse Duration            | 30 ms (adjustable up to 3 s with feature V2, V4)  |
| Interpulse period         | > 30 ms   |
| $U_{ext}$                 | Max. 40 V (375 V with feature V3, V4)   |
| Switching current         | Max. 27 mA (100 mA with feature V3, V4)   |

#### Connection

Type of energy can also be selected with feature V2/V4.  
The standard setting is active energy import (23) / export (25).

#### Interfaces

A complete description of the interfaces can be found on the Internet at [www.gossenmetrawatt.com](http://www.gossenmetrawatt.com).

<sup>3</sup> cannot be ordered in combination with W1 ... W7

<sup>4</sup> cannot be ordered in combination with V1 ... V9

### Feature Q1 (only secondary display is calibrated)

Only secondary values (menu selection) may be used for billing purposes.

### Sample Order

4-wire system, any load, with reactive energy measurement, with MID approval, programmable transformation ratio, input voltage: 400 V, with standard S0 pulse output, no bus connection, no counter reading profile

Designation: U2389 M2 P0 Q1 U6 V1 W0 Z0

**Standard Meters with MID Approval and Initial Calibration, (available from stock)**

**Abbreviations and Their Meanings**

| <b>Symbol</b>   | <b>Meaning</b>   |
|---|--|
| <b>CT</b>   | Current transformation ratio   |
| <b>CT × VT</b>  | Product of CT times VT   |
| <b>EPtot</b>  | Total effective energy (for all phases)  |
| <b>EQtot</b>  | Total reactive energy (for all phases)   |
| <b>f</b>  | Frequency  |
| <b>I1, I2, I3</b>                                     | RMS current value per phase  |
| <b>In</b>   | $I_N$ : N conductor current (calculated)   |
| <b>I<sub>max</sub></b>                                | Limit current  |
| <b>I<sub>min</sub></b>                                | Minimum current value  |
| <b>I<sub>ref</sub></b>                                | Reference current (value)  |
| <b>M1 (feature)</b>                                   | Multifunctional variant: measurement of U, I, P, Q, S, PF, f, THD, In                  |
| <b>M2 (feature)</b>                                   | Measurement of reactive energy   |
| <b>M3 (feature)</b>                                   | Multifunctional variant: measurement of U, I, P, Q, S, PF, f, THD, In, reactive energy |
| <b>P1, P2, P3, Ptot</b>                               | Active power, per phase and total  |
| <b>PF1, PF2, PF3, PFtot</b>                           | Power factor (cos phi), per phase and total  |
| <b>Q1, Q2, Q3, Qtot</b>                               | Reactive power, per phase and total  |
| <b>Q1 (feature)</b>                                   | Programmable transformation ratios   |
| <b>Q9 (feature)</b>                                   | Fixed transformation ratios  |
| <b>S1, S2, S3, Stot</b>                               | Apparent power, per phase and total  |
| <b>S0</b>   | Pulse rate, S0 output  |
| <b>THD I1, I2, I3</b>                                 | Current distortion component per phase   |
| <b>THD U1, U2, U3</b>                                 | Voltage distortion component per phase   |
| <b>U<sub>n</sub></b>                                  | Reference voltage  |
| <b>U1<sub>N</sub>, U2<sub>N</sub>, U3<sub>N</sub></b> | Star voltage (RMS)   |
| <b>U12, U23, U13</b>                                  | Delta voltage (RMS)  |
| <b>V2/V4 (feature)</b>                                | Programmable S0  |
| <b>V9 (feature)</b>                                   | Customer-specific S0 rate  |
| <b>VT</b>   | Voltage transformation ratio   |
| <b>W1 ... 7 (feature)</b>                             | Bus connections  |
| <b>Z1 (feature)</b>                                   | Counter reading profile (only possible with bus)                                       |
