

# International Rectifier

- RoHS Compliant and Halogen Free ①
- Low Profile (<0.7 mm)
- Dual Sided Cooling Compatible ①
- Ultra Low Package Inductance
- Optimized for High Frequency Switching ①
- Ideal for CPU Core DC-DC Converters
- Optimized for Sync. FET socket of Sync. Buck Converter ①
- Low Conduction and Switching Losses
- Compatible with existing Surface Mount Techniques ①
- 100% R<sub>g</sub> tested

## Description

The IRF6717MPbF combines the latest HEXFET® Power MOSFET Silicon technology with the advanced DirectFET™ packaging to achieve the lowest on-state resistance in a package that has the footprint of a SO-8 and only 0.7 mm profile. The DirectFET package is compatible with existing layout geometries used in power applications, PCB assembly equipment and vapor phase, infra-red or convection soldering techniques, when application note AN-1035 is followed regarding the manufacturing methods and processes. The DirectFET package allows dual sided cooling to maximize thermal transfer in power systems, improving previous best thermal resistance by 80%.

The IRF6717MPbF balances both low resistance and low charge along with ultra low package inductance to reduce both conduction and switching losses. The reduced total losses make this product ideal for high efficiency DC-DC converters that power the latest generation of processors operating at higher frequencies. The IRF6717MPbF has been optimized for parameters that are critical in synchronous buck including R<sub>ds(on)</sub>, gate charge and C<sub>dV/dt</sub>-induced turn on immunity. The IRF6717MPbF offers particularly low R<sub>ds(on)</sub> and high C<sub>dV/dt</sub> immunity for synchronous FET applications.

## Absolute Maximum Ratings

	Parameter	Max.	Units
V <sub>DS</sub>	Drain-to-Source Voltage	25	V
V <sub>GS</sub>	Gate-to-Source Voltage	±20	
I <sub>D</sub> @ T <sub>A</sub> = 25°C	Continuous Drain Current, V <sub>GS</sub> @ 10V ③	38	
I <sub>D</sub> @ T <sub>A</sub> = 70°C	Continuous Drain Current, V <sub>GS</sub> @ 10V ③	30	A
I <sub>D</sub> @ T <sub>C</sub> = 25°C	Continuous Drain Current, V <sub>GS</sub> @ 10V ④	220	
I <sub>DM</sub>	Pulsed Drain Current ⑤	300	
E <sub>AS</sub>	Single Pulse Avalanche Energy ⑥	290	mJ
I <sub>AR</sub>	Avalanche Current ⑤	30	A
