Company Profile

In 1976, amidst a lack of capital and technology in Taiwan, Mr. Charles Lai & Mr. Tony Lin founded a hot forge factory specializing in making hand tools for the DIY market. Eight years later, many other companies had followed their lead and although the market grew quickly, quality suffered. With pricing, costs and quality nearing a state of chaos it became clear to KING TONY's founders that they needed to seek a new direction.

Mr. Lai & Mr. Lin found their new direction; making professional quality hand tools built to compete with the best in the world. They set their standards high and in the years since, have consistently exceeded the requirements of the world's toughest standards. KING TONY tools don't just meet the DIN (German) standard and the ANSI (U.S.A.) standard, they routinely exceed them. In fact, we test every torque make to a standard 30% higher than that prescribed by DIN and our pneumatic impact tools to a 50% higher standard. That's true commitment to quality!

To further underscore our determination to compete with the best in the world we have achieved certification with ISO on three separate standards. First, in January 1998, ISO 9002, followed by ISO 9001 and more recently we have qualified for the environmental safety standard, ISO 14001. We believe that is our responsibility to the world and we will always dedicate to reduce the harm to the earth during our manufacturing process in the future.

You might sense that King Tony Tools is about much more than a world-class tool. The ideals of KING TONY's management are fulfilled daily by our hundreds of employee's at our branches and offices around the world. You will find KING TONY Tools and its branches in: France, Spain, Belgium, Mexico, China. Each of our local branch offices is tasked with insuring that you, our customer, are happy not just with our quality but with the experience of being a KING TONY customer.

Inspection Equipment

01

Spectrometer

Metal material elements analysis

02

Gauge measurement

Measure the screw tap to meet LEVEL I tolerance of DIN standard

03

Rockwell hardness tester

Test the product's hardness to meet KING TONY quality standard

06

Torque tester

Fracture test to check the max. torque to ensure excess of DIN standard

07

Precise cutting machine

Cut for a smooth section

11

Environmental simulation test of temperature & humidity

Simulate temperature from 70 °C ~ - 20°C to test product reaction and durability while obvious change of temperature

12

Tension tester

Test pulling force of product especially for joint workpiece according to DIN standard

13

Hammering tester

Test the lifetime of striking hammer and security of the joint of hammer & wooden shaft

16

Micro-torque tester

Test products with smaller torque such as bits for their durability

17

Vision measuring machine

Measure parts for difficult angle or in the narrow space

04

Salt-water spray tester

48 HRs environmental simulation test to check product's durability from being rusty

05

Thickness test of plating

Apply special chemical to check thickness of plating and ensure it reaches KING TONY's standard

08

Mounting press machine

In order to fix tiny and multilateral workpiece

09

Grinding & polishing machine

Make surface of workpiece smoother and clearer for further observation

10

Micro-hardness tester

Analyze the change of metallography after heat treatment and the difference of hardness between surface and central location

14

Pliers class measure tester

Test the cutting force and durability

15

Torque wrench tester

Follow the DIN ISO & ASME standard to test torque tolerance by 3 points of the lowest point, 60%, and 100% of max. scale

18

Carton busting strength tester

Test the strength of carton in order to assure good packing quality

19

Insulated tester

Ensure products are insulated under the voltage 1000V

SQUAD Tool Trolley

For time being, KING TONY has reached to another level of making tools trolley, in this year, we have invested a whole new direction for your satisfaction. Newly from concept to final product, from structure to finishing and even from top to bottom, we strive all our best into them

Start from the series name "SQUAD", it comes from the gaming industries, we believe this trolley can be extended to other business, and gaming is one of the potential market. This wording means a professional team which is us at KING TONY

This series have 4 models, Model D, Model D+, Model Dx, Model SW. Each model size are differ, storage space are not the same, it depends on your demand. Certainly one of them would fulfill your garage
This series of tools trolley is a milestone for KING TONY

- Shape and outline of bumpers correspond to the lid, which makes a connection in between, with cut through pattern shows more energetic outlook
- ABS corner protection bumper

- keylock usually in front or in the middle or side of the drawers, The reason we place in the corner is we have noticed that the keys will swing around while trolley was moving and scratched the surface of the trolley plus it altered the outlook

Modular Stacking Box

Modular Stacking Box

According to the demand of tools in different working environments, we've designed toolboxes to cope with different working situations. It is more convenient for the out-ofhome technician to carry the tools, also reducing the time for the technician to go back and forth between the vehicle and the construction site.

This saves the technician's time and energy, improving the technician's work efficiency and mobility

- For better clarity you can attach labels to either the front or the sides of the case to optimize your workflow

- Fixing boxes in pallet truck

- I-Locking the 90° twist system is also extremely practical since you can open it just using one hand

- With four swivel casters of which two are braked by an integrated brake

•The sturdy and ergonomic handles on the lid and in the front can be easily carried according to your requirement

• The double-layer tool pouch can adjust the space through the buckle to facilitate the user take the tools

Precision forging Technology

Other brand (not good)

King Tony brand (good)

In forging process, metal moved while it is still in the solid state. King Tony specialized in forging technology to create better metal configuration. Non-straight grain flow and non-sharp corners can extend lifetime and durability of socket. Torque is transmitted for powerful tightening under safety.

Conventional heat treatment and microstructural

Other brand:
Over of Troostite (Zn,Mn)
element will bring weak point.
(not good)

King Tony brand:
Well spread (Fe) element will
bring better strength.
(good)

Heat treatment involves the use of heating or chilling experience and time control. King Tony controls heat treatment system to ensure the right hardness without the brittleness. From microstructural picture you can see elements are well-distributed.

Professional production & quality control

KING TONY hand socket reach 30% higher than DIN international standard.

Quality control also ensure that a sufficient level of production output. King Tony uses advance technology to inspect tiny difference on each step. Our hand socket, ratchet, extension bar, and power handle is 30% higher than international DIN standards. Impact socket reach 50% higher torque than DIN standards.

Tools are made to extend hand work. King Tony selects different material depends on its difference of nature for tightening, power impacting, cutting, rotating, and locking. Choose qualified material to meet required lifetime for professional use and consumption.

Extremely hard-wearing performance

King Tony offers reliable tools for professional users, strictly controls its quality to ensure achievement of required performance. From "fracture & fatigue test", you will know the difference we have when compare to others.
