## Modular LED Lightbars

### Cost-Effective, High Performance Modular LED Lightbars!

The SunBrite family of Modular LED Lightbar technologies combine high-performance, ease-of-installation, flexibility and cost savings. Unlike many alternative lighting technologies, the SunBrite LED Lightbar can be installed with ease without the need to hire an electrician to open walls and install new wiring. Lumex's SunBrite™ LEDs are ideal for undercabinet, kitchen, bookshelf, cupboard, showcase, and accent and cove lighting applications.

#### Features:

- Available in lengths of 6, 12 and 24 inches for extendable design solutions
- Compatible connector cables available in 10", 20" or 40" lengths to connect Lightbars to desired length
- Mounting clips are available in standard format, 45° Angle format and Swivel format.
- A specially designed transformer is available to allow for simplified installation and immediate wall plug-in.
- For brightness control, a dimmer switch is available and effective on an entire line of connected light switches
- Ultra thin heat sink
- CE, UL, IP60, and RoHS compliant
- Warm, neutral and cool white colors are available in standard formats. Custom RGB technologies can also be created in any color.

## Recommended Applications

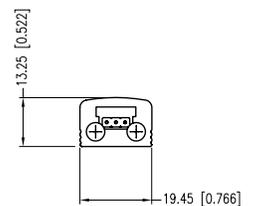

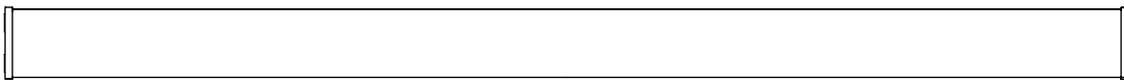

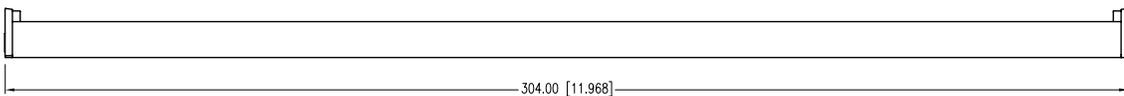

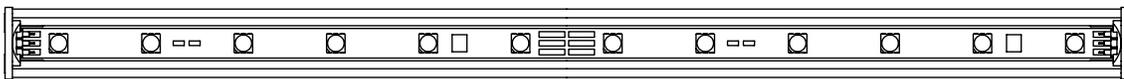

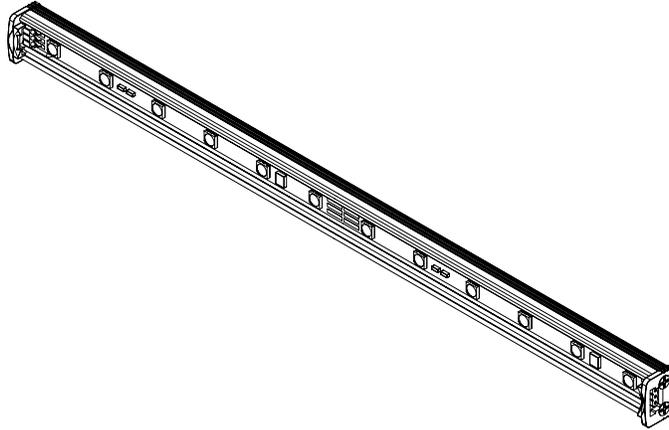

- Cabinet Lighting
- Undercabinet Lighting
- Kitchen Lighting
- Garage Lighting
- Bookshelf Illumination
- Cupboard Lighting
- Showcase Displays
- Cove Lighting

## Installation Instructions

### Layout and Designing Requirements:

Sunbrite™ Modular LED Lightbars are available in 3 different lengths, 6", 12" and 24" with power usage either 3.3 W./ft. or 5W./ft. The lightbars can be easily chained to create desired length. Customer should start the design by defining the following factors:

- length for each location
- brightness output
- power usage
- color temperature

Once these factors are defined, you can then begin to design how you want to chain the light bars together. Please keep in mind that total power usage when the light bars are chained together cannot exceed power output from power supply adaptor (for safe operation, recommend total power usage from chained lightbars to be 25% lower than output wattage from power supply adaptor).

## Installation Instructions *continued...*

Method 4. Connection light bars with cable-to-cable extension joint (SSP-CN2CN)

Method 5. Connection light bars with multiple cable-to-cable extension joint (SSP-CNM0)

### **Connecting Lightbar to Power Adaptor (SSP-PW024):**

SunBrite™ Modular LED Lightbars can be connected to the power adaptor by using the power line connection cable (SSP-CA12) between the lightbar and the power adaptor.
