

# Junction boxes overview

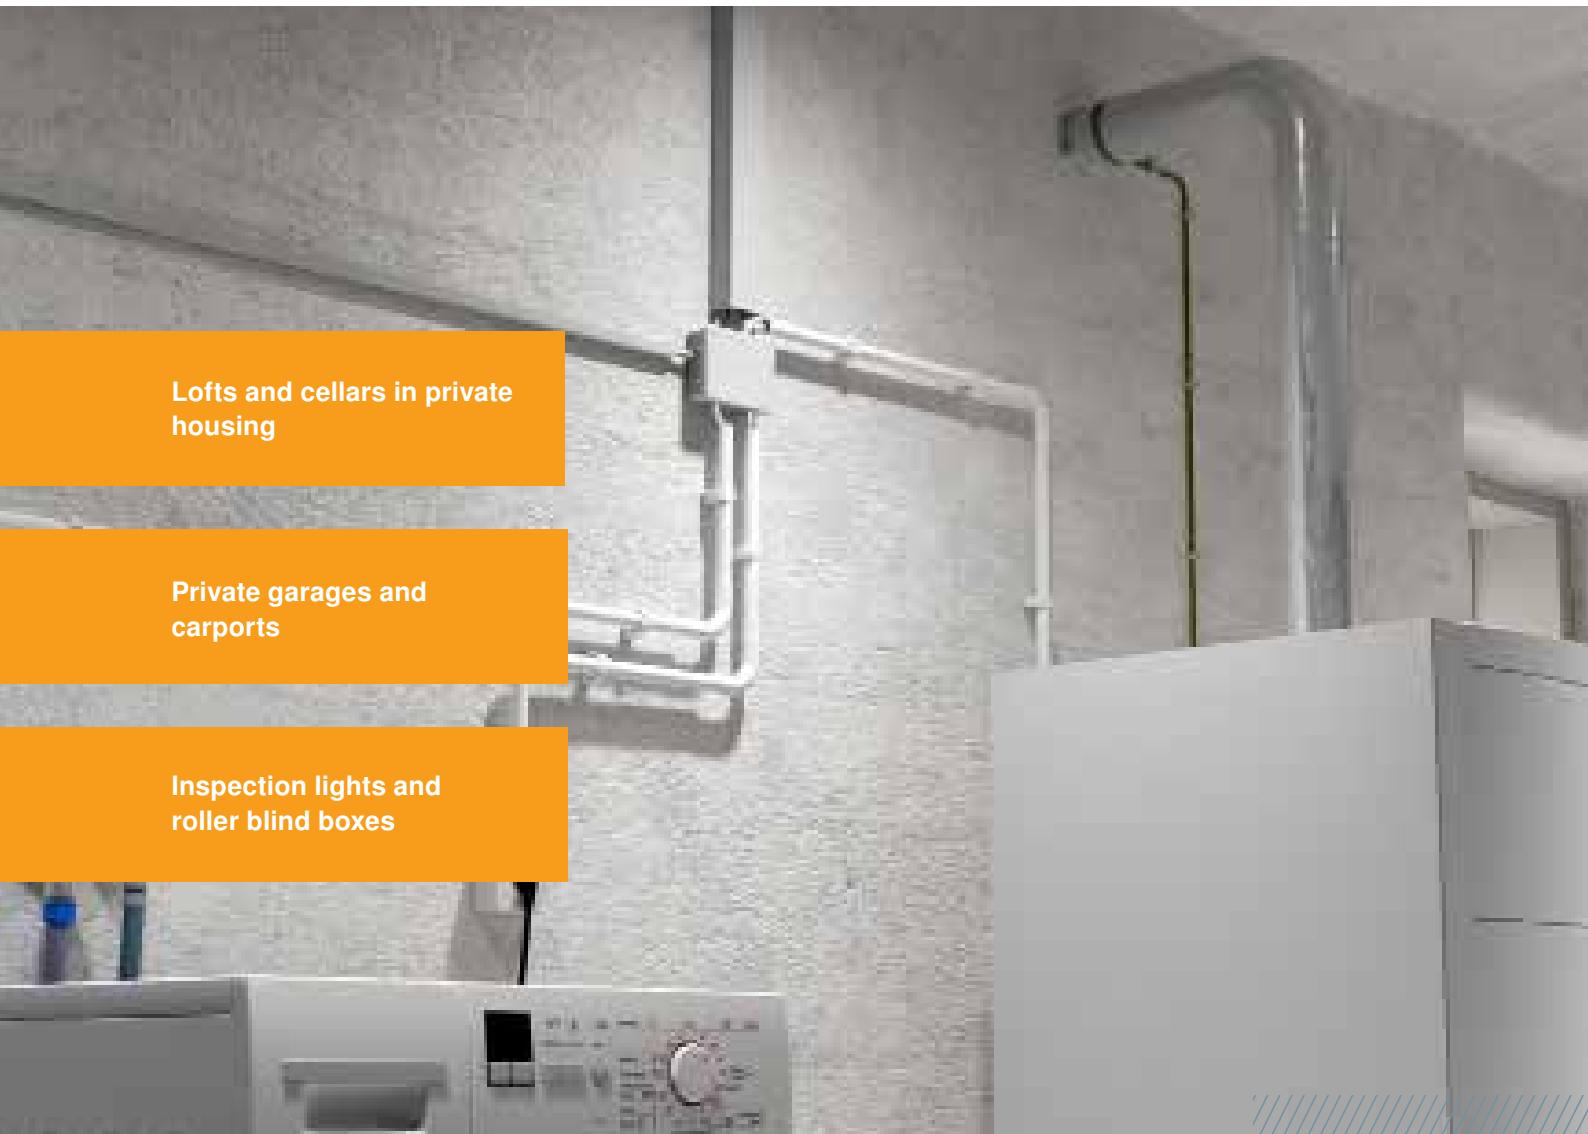

Versatile junction boxes for any installation requirement  
in all kinds of application areas

# A series

## The everyday hero

The A series families is one of our well-known classic brands. Made of halogen-free thermoplastic, they offer a simple solution to simple applications. The elastic material is particularly easy to use and, thanks to the external fastening and clamshell, the boxes are mounted quickly and simply. The supplied cutting tool also allows proper opening of the cable entries.

The practical sizes in 3 colours are matched to the applications: The smallest of the family, the A6, is even at home in inspection lamps and roller blind boxes. Its big brother can be found in lofts and basement workshops – a real everyday hero.

#### Practical external fastening

The external fastening means that the junction boxes of the A series can be mounted quickly and easily. The bolts for mounting are contained in the scope of delivery of the boxes.

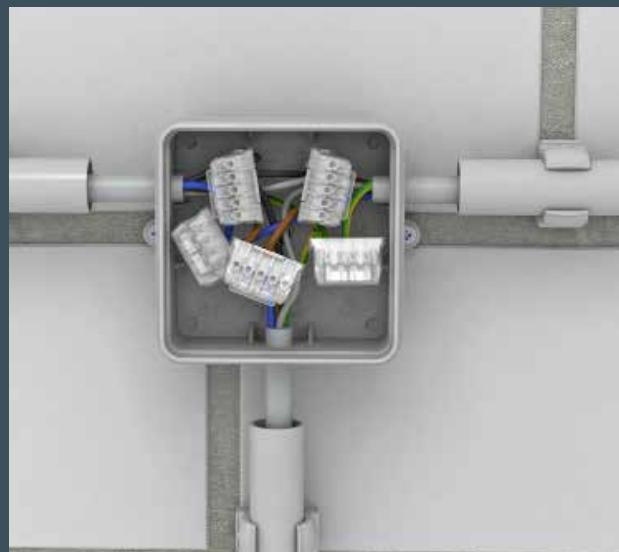

#### Premarked cable entries

The pre-marked cable entries can be punctured quickly and used using the cut-out tool supplied.

#### Tight-fitting clamshell

The covers of the A series also allow rapid mounting. The clamshells can be placed easily on the base, without the need for tools.

#### Sufficient space for wiring

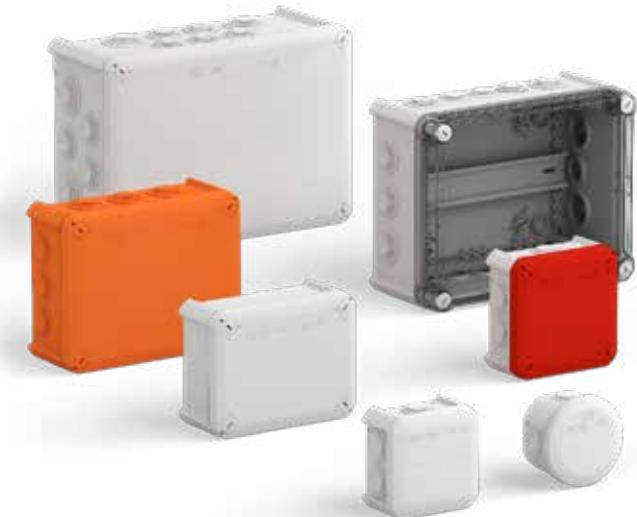

With the A series, there is always sufficient space for wiring. This is marked by the 5 different sizes in which the junction boxes are available.

# T series

## The all-rounder

If you want a little more: The junction boxes, made from high-quality materials with sensible wall thicknesses, are particularly stable and thus perfectly equipped to handle greater loads. Thanks to the UV-stabilised plastic and the IP66 protection rating, they can withstand weathering conditions in both indoor and outdoor areas.

The T series is characterised by its intelligent construction and practical details, because it is as versatile as the requirements placed on it. No matter whether dealing with a flexible wiring compartment of different shapes and sizes, the colour differentiation of circuits, checking of electrical components or use in the maintenance of electrical function – our all-rounders always have the right answer.

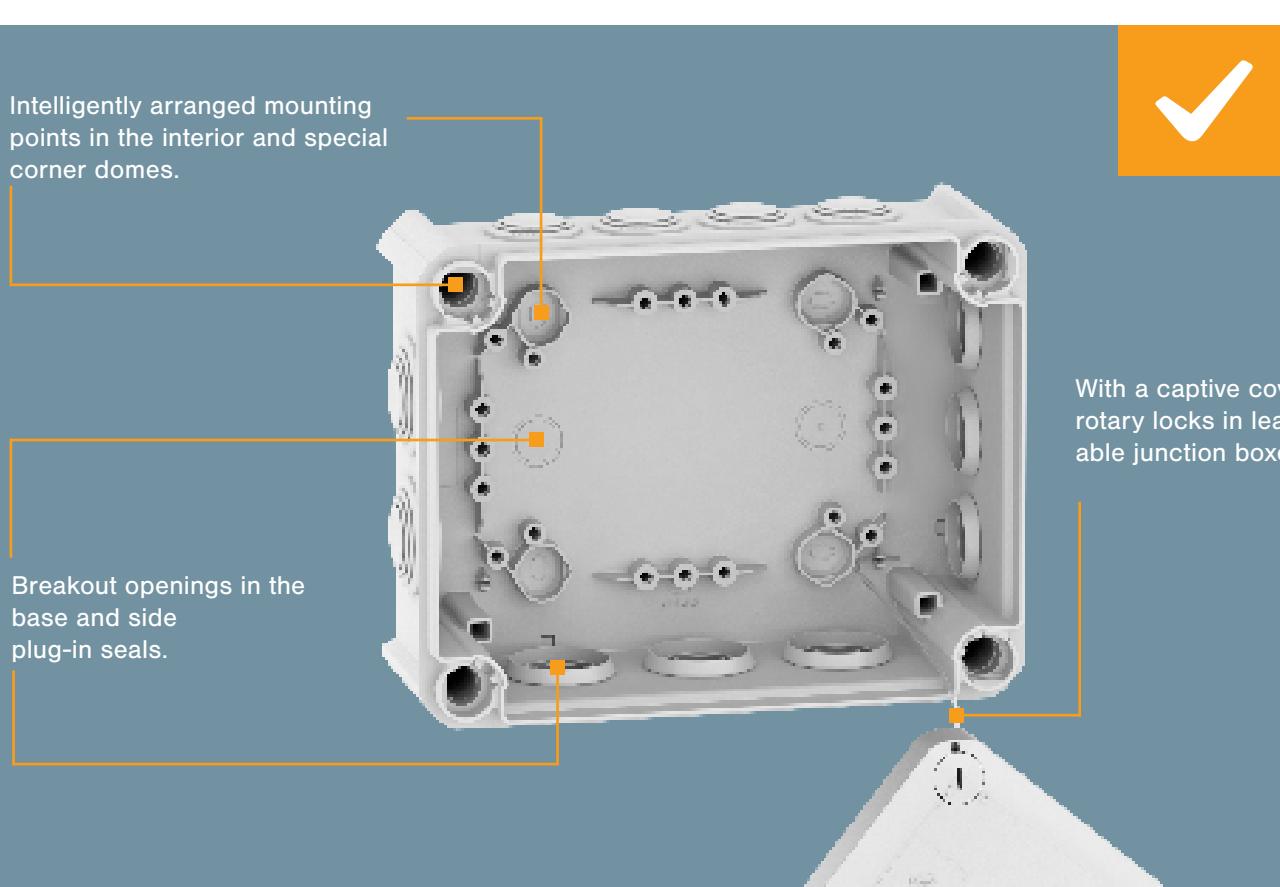

Warehouses, sports halls and car parks

Protected exterior areas, e.g.  
under roof overhangs

Escape route lighting for the  
maintenance of the electrical supply

# All the benefits at a glance

## Function control

The T series junction boxes with an elevated and transparent cover combine ample space for devices and cables with a free view onto them – for instance onto the operating display of electronic components.

## Maintaining electrical function with the FireBox

Together with the supplied bolt ties, the high temperature-resistant ceramic connection unit of the OBO FireBox forms a fire protection-tested system, approved for mounting on concrete, masonry, calcareous limestone and brick.

## T series with Aquasit

In particularly moist environments, the T series can be used together with the Aquasit cold casting compound. Whether for connections in the garden, by waterways, in laundries or in a pump well – Aquasit ensures a safe electrical installation anywhere.

# X series

## The eXtreme athlete

Professionals are at work here: The junction boxes are high-quality and robust. With its impact resistance of IK09, the X series can withstand the strongest mechanical loads. Our "eXtreme athletes" are also dust and waterproof, as well as UV-resistant. This is why they are the right choice for challenging industrial applications and extreme weathering conditions in exterior areas.

The well-thought-out and functional design gives the X series a particularly high wiring compartment and offers a wide range of mounting options for installations in any environment. The wide-ranging and practical equipment rounds off the range of services, making the X series ready for all kinds of applications.

Industrial applications

Unprotected exterior areas  
e.g. on surveillance cameras

Greenhouses and workshops

# Extra strong, particularly high load capacity

## Impact resistance

The use of special plastics based on high-quality polycarbonate allows the X series junction boxes and empty housings with the IK09 classification to offer the highest impact resistance in its class. All the boxes of the X series are tested according to DIN EN 60670 Part 1 and 22.

## Equipment & accessories

The X series is available with pre-installed equipment: Completely pre-installed versions with main line branch terminals, cable glands, screwless terminals and hat rails cover every eventuality. Screw covers, plug-in seals and external fastening elements are contained in the scope of delivery of the X series junction boxes. In addition, the X series offers a comprehensive range of accessories.

# Home and dry! Aquasit cold casting compound

**Achieve the maximum protection rating of IP68 with Aquasit.**

- Ideal solution for electrical installation in particularly damp environments (IP68)
  - Self-healing: The protection rating remains intact after testing with testing pins
  - Available in mixing bags or in cartridges
  - In matching sizes to our junction boxes

#### **Material consumption Aquasit cold casting compound**

# Strong partners for every requirement

## V-TEC cable gland

Fastest, most convenient means of cable entry for junction boxes and housings:

- Strain relief and tightness (protection class IP68)  
Tested to DIN EN 62444
- Available with metric and PG connection threads
- Also available as a set including locknuts or as separable cable gland

## Terminal systems

Connect all kinds of conductors simply, safely and reliably

### Screwless terminal, universal

- Simple connection and disconnection of flexible, multi-wire and rigid conductors
- Insertion of rigid conductors possible without actuation of the release lever
- 0.2 mm<sup>2</sup>–2.5 mm<sup>2</sup>
- Tested to EN 60998

### Screwless terminal

- Screwless terminal to connect single-wire or rigid, multi-wire conductors
- 3,5 and 8-pin version
- 0.5 mm<sup>2</sup>–2.5 mm<sup>2</sup> nominal cross-section
- Tested to EN 60996

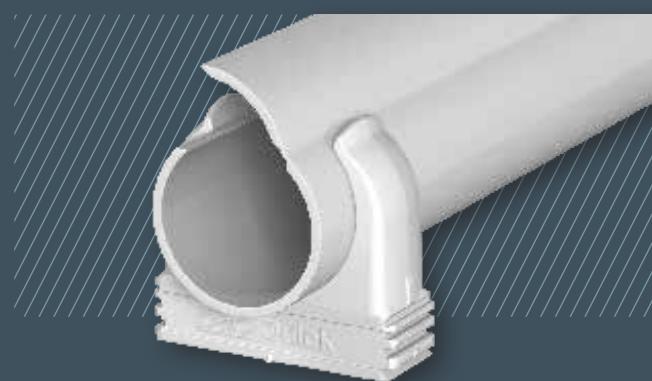

### Luminaire connection terminal

- For the toolless connection of single-wire and multi-wire conductors
- 0.5–2.5 mm<sup>2</sup> nominal cross-section
- Tested to EN 60996

## Quick pipe

In connection with Quick Clips, the ideal solution for rapid surface-mounted installations and trouble-free retroinstallation

- Simple installation thanks to the highly elastic hinge
- Rapid closing by turning the Quick pipe in the Quick clip
- In 4 sizes: M16-M32
- In 2 colours: Pure white and light grey

## Quick clip

Arrangeable cable and pipe clips in 3 variants

### starQuick clip

- Snap lock with patented safety system
- Can be lined up up to size SQ28
- UV and weather-resistant

### Multi-Quick clip

- One clip for multiple dimensions
- Universal application
- PG and metric

### Quick clip

- "High-speed clip"
- Extreme loading capacity
- Patented arrangement contour: Fasten up to 3 clips with one drill hole
