

Shielded SMD Coupled Inductor –ACPR Series

Operating Temp : -50°C ~ +150°C

FEATURES

- ◆ High efficiency, high coupling
- ◆ High rated current, low DC resistance
- ◆ RoHS compatible
- ◆ AEC-Q200 verified

APPLICATIONS

- ◆ SEPIC, Zeta, Flyback topology, etc.
- ◆ LED, power supplies
- ◆ Used as common mode choke
- ◆ Used as transformer

Note: ※1: Saturation Current:

Max. Value, DC current at which the inductance drops less than 30% from its value without current;
Typ. Value, DC current at which the inductance drops approximate 30% from its value without current.

※2: Heat Rating Current: DC current that causes the temperature rise (ΔT) from 20°C ambient;

For Max. Value, temperature rise (ΔT) is 20°C.

For Typ. Value, temperature rise (ΔT) is approximate 40°C.

The part temperature (ambient + temp. rise) should not exceed 150 °C under worst case operating conditions. Circuit design, component placement, PCB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the end application.
