

M1 Signal Conditioner

Selectable Volt, Current or Frequency Measurement

VOLT
AMPS
FREQ

programmable to measure **voltage**,
current or **frequency**

User-configurable
settings via the **free**,
easy-to-use software

Less than 62mm deep

Remote monitoring
with APM Gateway and
Trumeter Cloud

2 Outputs
Digital (open collector) or
Analog (4-20mA)

DIN Rail Mount
Compact design for
simple installation

10 alarm set points

The M1 Signal Conditioner is a fully user-configurable signal conditioner that can be set to measure voltage, current, or frequency. Designed for DIN rail mounting, the M1 has been engineered for precision and versatility, and is suitable for a wide range of industrial applications.

The unit is designed for seamless integration with other control and monitoring equipment. It provides configurable digital and analog outputs, enabling flexible connectivity across multiple platforms. Each output is equipped with its own programmable delay, allowing precise control of output duration.

For extended functionality, the M1 Signal Conditioner can be paired with the APM Gateway to connect directly to Trumeter Cloud. This secure connection enables remote monitoring, automated data logging, and advanced online dashboards, giving engineers full visibility and analysis of system performance at any time, from any location.
