

Datasheet MSO/UPO3000E Series Digital Oscilloscope

Main Features

- Analog channel bandwidth: 350MHz, 500MHz
- Real time sampling rate of analog channel 2.5GSa/s, Real time sampling rate of digital channel
 1.25GSa/s (only MSO)
- Input impedance :1MΩ,50Ω
- Storage depth of each channel: 70Mpts, Maximum storage depth of 250Mpts in single or scan mode
- Waveform capture rate up to 1,000,000 wfms/s
- Built in 50MHz dual channel function / arbitrary waveform generator (only MSO-S). It supports real-time loading of oscilloscope screen data to AWG arbitrary wave output.
- Support Bode Plot loop test and analysis function
- Hardware real-time waveform uninterrupted recording and analysis up to 120,000 frames
- Waveform operation functions (+, -, ×, ÷, digital filtering, logic operation and advanced operation)
- IM points enhanced FFT, supporting frequency setting, waterfall diagram, detection setting and mark measurement, etc.
- Auto measurement of 36 waveform parameters
- Supports parameter measurement while scanning
- Multi-Scopes 2.0 supports multi-channel independent trigger and fluorescent display
- Multi-channel independent 7-bit hardware frequency counter
- DVM supports multi-channel independent AC / DC true RMS measurement
- Rich trigger functions: edge, pulse, video, slope, runt, over amplitude pulse, delay, timeout, duration, setup/hold, Nth edge and pattern trigger
- Area trigger function, which can be used to capture accidental signals and observe complex signals
- Protocol trigger and decoding function (optional): RS232, I2C, SPI, CAN, CAN-FD, LIN, FlexRay
- Ultra Phosphor 2.0 super fluorescent display effect, up to 256 levels of gray display
- 8-inch 800×480 capacitive touch, supporting various gesture operations: click, slide, zoom, edit, drag, etc.
- Rich interfaces: USB Host, USB Device, LAN, EXT Trig, AUX Out (Trig Out、 Pass/Fail), AWG, VGA
- Support U disk data storage, U disk software upgrade, one-key copy screen and other functions
- Support plug and play USB device, can communicate with computer through USB device
- Support SCPI programmable instrument standard commands
- Support web access and control

Panel Structure

Product Introduction

The MSO/UPO3000E series digital phosphor oscilloscope is a multifunctional and high-performance oscilloscope based on UNI-T's original Ultra Phosphor 2.0technology. It realizes the combination of ease of use, excellent technical indicators and many functional features. It can help users complete the measurement work faster. It is an oscilloscope designed for general design / debugging / testing needs in many fields, such as communication, semiconductor, computer, instrumentation, industrial electronics, consumer electronics, automotive electronics, on-site maintenance, R & D / education, etc. Fast Acquire technology can accurately capture abnormal events such as video, jitter, noise and low wave signals.

Brand new interactive experience

The 8-inch touch screen design supports a variety of gesture operations, such as click, slide, zoom, edit, drag, etc. Make the measurement action smoother and more convenient, and users can master it more quickly. At the same time, the traditional button and knob operation is still retained, and the interactive experience is optimized to the greatest extent.

Rich measurement functions

Automatic parameter measurement up to 36 kinds. Provides a variety of automatic measurement parameters while you measure waveforms, greatly improving your measurement efficiency.

XY mode

XY mode cursor measurement can quickly measure the phase difference between two signals.

Ultra high capture rate

Using innovative digital signal parallel processing technology, it can reach an ultra-high capture rate of 200,000wfms/s in normal sampling and 1,000,000 wfms/s in Fast Acquire mode. Efficient capture of occasional signals.

256-level grayscale display

Using the original Ultra Phosphor 2.0 display technology, the waveform display has a more layered sense, achieving the fluorescent display effect of an analog oscilloscope. It can better show the probability of signal occurrence.

Channel split screen function Multi-Scopes 2.0

It supports multi-channel split-screen display with 256-level grayscale display, and the horizontal time base and trigger system are independently controlled.

Memory depth 70Mpts per channel

The oscilloscope can maintain a high sampling rate in a wider time base range, while taking into account the overall and details of the waveform, greatly improving the capture rate of abnormal waveforms.

Rich trigger function

With a wealth of advanced trigger and bus trigger functions, it can help users accurately and quickly capture and display the signal of interest.

Full memory hardware decoding

The decoding speed is greatly improved. The full-memory hardware decoding under the deep storage of 70Mpts, the decoding time is increased from more than ten seconds to milliseconds, which realizes real-time decoding and greatly improves the user's problem diagnosis efficiency. The recorded waveform also supports full-memory hardware real-time decoding.

Area trigger

The area trigger can be used in combination with the existing basic trigger, advanced trigger and protocol trigger to complete the capture of various occasional and complex characteristic signals.

Turn on zone triggers where anomalous signals occur:

AWG Function Arbitrary Waveform Generator

The built-in dual-channel function arbitrary waveform generator can output sine wave, square wave, ramp wave, pulse wave, arbitrary wave, noise and DC. The maximum frequency output of sine wave is 50MHz.

Bode plot

Can be used for loop analysis. It is a critical measurement often used to characterize the frequency response (gain, phase, and frequency) of today's various electronic designs, including passive filters, amplifier circuits, and negative feedback networks for switch-mode power supplies.

LA Logic Analyzer

Can be used for parallel bus, protocol decoding and timing measurements.

Logic Analysis Probe

Provides two 8-channel splitters and simplifies connection to the device under test. When connecting with square pins, UT-M15 can be directly connected with 8X2 square pin headers with pins of 2.54mm. The UT-M15 offers excellent electrical characteristics with an input impedance of $101k\Omega$ and a capacitive load of only 9.0pF.

Web Control

Embedded with Web Server, you can remotely control the instrument, observe waveforms, and obtain measurement results through a browser, which can meet the application requirements of special environments such as high pressure and high temperature. Cross-platform control can be realized without installing driver software and host computer software. MSO/UPO3000E series supports PC and mobile phone two styles of web page layout and touch operation, making it easier and more convenient to use.

Technical Parameter

All specifications are warranted except those marked "Typical".

Unless otherwise stated, all specifications are for probes with the attenuation switch set to 10× and the MSO/UPO3000E series digital phosphor oscilloscope. To meet these specifications, an oscilloscope must first meet the following two conditions:

The instrument must run continuously for more than 30 minutes at the specified operating temperature.

If the operating temperature variation range reaches or exceeds 5 degrees Celsius, you must open the

system function menu and execute the self-calibration function.

	Frequency range: 1 µHz to 400 kHz							
ramp wave	linearity: 1%							
	symmetry: 0.1%-99.9%							
noise	bandwidth: 50 MHz (Typical values)							
Built-in wave	Frequency range: 1µHz to 5MHz							
	Frequency range: 1µHz to 5MHz							
Arbitrary wave								
	wave length: 8 to 512K points (Play mode) Internal storage location: 10							
	Accuracy: 100 ppm (less than 10 kHz);50 ppm (greater than 10 kHz)							
Frequency	Resolution : 1µHz							
	Output range: 20 mVpp to 6 Vpp (high resistance);10 mVpp to 3 Vpp (50 Ω)							
Amplitude	Resolution: 1mV							
, inplicado	Accuracy: ±5%							
	Accuracy: 2% (1 kHz)							
DC offset	Range: \pm 3V (high resistance); \pm 1.5 V (50 Ω)							
DC onset	Resolution: 1mV							
	Accuracy: Offset setting value ±5%							
AM modulation								
Carrier	Sine, square wave, oblique wave, arbitrary wave							
Source	internal							
Modulation wave	odulation wave Sine, square wave, ascending oblique wave, ascending oblique wave, r arbitrary wave							
Modulation frequency	2mHz ~ 50kHz							
Modulation depth	0% ~ 120%							
FM modulation								
carrier	Sine, square wave, oblique wave, arbitrary wave							
Source	internal							
modulation wave	Sine, square wave, ascending oblique wave, ascending oblique wave, noise, arbitrary wave							
Modulation frequency	2mHz ~ 50kHz							
deviation	12.5MHz(max)							
Display								
Display type Resolution of	8-inch TFT LCD							
display	800 horizontal ×RGB×480 vertical pixels							
display color	24 - bit true colors							
Persist time	Minimum value, 50ms, 100ms, 200ms, 500ms, 1s, 5s, 10s, 20s, infinite							
Menu Hold	Hold time: 5s, 10s, 20s, infinite							
Display type	Point, vector							
Real time clock	Time and date (user adjustable)							
Bode								
Start frequency	50 Hz ~ 50 MHz							
Stop frequency	60 Hz ~ 50 MHz							
Points	1 ~ 1000							
	High resistance:20 mVpp to 6 Vpp							
Output amplitude	50Ω:10 mVpp to 3 Vpp							
	1							

interface								
Standard or optional			EXT Trig, AUX Out (Trig Out\Pass/Fail) output, only MSO-S model), VGA					
General technica	Ispecifications							
Probe compensa	-							
output voltage	About 3Vp-p							
frequency	10Hz,100Hz,1kHz(default),10kHz							
Power supply		(. <u> </u>					
power supply voltage	100V~240VAC	rms (Fluctuations	s±10%), 50Hz/60Hz					
power	100VA							
Fuse	2.5A, F class, 2	250V						
Environment								
Temperature	Operation: 0°C	C ~ +40 ℃						
range	Not operation:	-20 ℃ ~ +70℃						
Cooling method	Forced fan coo							
Humidity range	Operation: +35	°C ≤ 90% relative	e humidity; C ≤ 60% relative humidity					
altitude	Non-operationa	w 3000 meters; al: up to 15,000 n	n					
Pollution degree	2							
Operating environment	Indoor use							
Mechanical speci	1							
size(W×H×D)	370mm×185mr	n×115mm						
weight	4.5 kg							
Adjust the intervation The calibration interval is recommended	1 year							
Standard								
	Comply with I	EMC Directive	(2014/30/EU), comply with or better than IEC

Note: All mainframes, accessories and options can be ordered from your local UNI-T dealer.

UNI-T oscilloscope probes and accessories supported by MSO/UPO3000E series

Passive probe

Model	Туре	Description
	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 25MHz Oscilloscope compatibility: UNI-T all series
UT-P03	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 60MHz Oscilloscope compatibility: UNI-T all series
UT-P04	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 100MHz Oscilloscope compatibility: UNI-T all series
UT-P05	High	1X·DC ~ 8MHz

UT-P06	impedance probe	10X:DC ~ 200MHz Oscilloscope compatibility: UNI-T all series
	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 300MHz Oscilloscope compatibility: UNI-T all series
UT-P07	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 500MHz Oscilloscope compatibility: UNI-T all series
	High impedance probe	1X:DC ~ 8MHz 10X:DC ~ 350MHz Oscilloscope compatibility: UNI-T all series
UT-P20	High impedance probe	DC ~ 100MHz Probe coefficient 100:1 Maximum operating voltage 1500Vrms Oscilloscope compatibility: UNI-T all series
UT-V23	High voltage probe	DC ~ 100MHz Probe coefficient 100:1 Input resistance 100MΩ±2% Maximum operating voltage 2000Vpp Oscilloscope compatibility: UNI-T all series
UT-P21	High voltage probe	DC ~ 50MHz Probe coefficient 1000:1 Maximum operating voltage DC 15kVrms , AC 10kV(sine wave) Oscilloscope compatibility: UNI-T all series
UT-P40	Current probe	DC ~ 100kHz Range 50mV/A, 5mV/A Current range 0.4A ~ 60A Maximum operating voltage 600Vrms Oscilloscope compatibility: UNI-T all series
UT-P41	Current	DC ~ 100kHz

	probe	Range 100mV/A, 10mV/A Current range 0.4A ~ 100A Maximum operating voltage 600Vrms Oscilloscope compatibility: UNI-T all series
UT-P42		DC ~ 150kHz
	Current probe	Range 100mV/A, 10mV/A Current range 0.4A ~ 200A Maximum operating voltage 600Vrms Oscilloscope compatibility: UNI-T all series
UT-P43	Current probe	DC ~ 25MHz Range 100mV/A Maximum measurement current 20A Rise time 14ns Oscilloscope compatibility: UNI-T all series
UT-P44	Current probe	DC ~ 50MHz Range 50mV/A Maximum measurement current 40A Rise time 7ns Oscilloscope compatibility: UNI-T all series

Active probe

Model	Туре	Description
UT-P30	High-Voltage Differential Probes	DC ~ 100MHz Attenuation ratio 100:1,10:1 Input differential voltage ±800Vpp Oscilloscope compatibility: UNI-T all series
UT-P31	High-Voltage Differential Probes	DC ~ 100MHz Attenuation ratio 1000:1,100:1 Input differential voltage ±1.5kVpp Oscilloscope compatibility: UNI-T all series
UT-P32	High-Voltage Differential Probes	DC ~ 50MHz Attenuation ratio 1000:1,100:1 Input differential voltage ±3kVpp Oscilloscope compatibility: UNI-T all series
UT-P33	High-Voltage	DC ~ 120MHz

	Differential Probes	Attenuation ratio 100:1,10:1 Input differential voltage ±14kVpp Oscilloscope compatibility: UNI-T all series
UT-P35	High-Voltage Differential Probes	DC ~ 50MHz Attenuation ratio 500:1,50:1 Rise time 7ns Accuracy 2% Input differential mode voltage 1/50:130(DC+peakAC) 1/500:1300(DC+peakAC) Input common mode voltage 100Vrms, CATI 600Vrms, CATII
UT-P36	High-Voltage Differential Probes	Oscilloscope compatibility: UNI-T all series DC ~ 50MHz Attenuation ratio 2000:1,200:1 Rise time 3.5ns Accuracy 2% Input differential mode voltage 1/200:560(DC+peakAC) 1/2000:5600(DC+peakAC) Input common mode voltage 2800Vrms, CATI 1400Vrms, CATII Oscilloscope compatibility: UNI-T all series

Warranty

One-year warranty, excluding probes and accessories. Please visit <u>https://instruments.uni-trend.com/list_190/65.html</u> to learn more information. To protect your investment, please purchase from UNI-T official authorized global distriburots.

UNI-T group maintains a wide products category includes Digital Test & Measurement instruments, Field Testing Meter, Infrared thermal imaging products. As early as 2008, we continue to introduce self-developed Digital Test and Measurement instruments to the market and have made remarkable achievements. At present, we have formed a variety of product lines of Oscilloscope, AWG, Spectrum Analyzer, Bench Multi-meter, Power Supply, DC Load, Power Meter, LCR Meter, Micro Ohm Meter and Data logger. We have separated instruments sub-sites, instruments.uni-trend.com, on the basis of the original website www.uni-trend.com, in order to be more targeted to provide customers with better service and value.
