Version 2021

Weidmüller 

Orange Selection

Quick and easy planning

As a planning engineer, do you want to select products easily and receive them quickly? From a partner you can rely on? Then plan with the Orange Selection from Weidmüller in the future. The Orange Selection items are always available, carefully selected and the portfolio consists of more than 1,500 items to fully cover your standard needs.

If your order is placed before 3:00 pm, we guarantee that your order will be on its way the very next working day.

For even more efficient planning and production processes, we will of course provide all articles in digital form. CAD, ETIM and eClass data are available in our online product catalogue catalog.weidmueller.com

We have summarised all the advantages of the Orange Selection on our website.

Check it out: www.weidmueller.com/orange-selection

Weidmüller tests and test procedures	A.14

Ideally equipped for every work phase

Increase efficiency and save time

The current boom in the sector is opening up new challenges for panel builders. On the one hand, the order books are full, but on the other hand, international competition is increasing, which in turn is leading to increased cost pressure. This dilemma will not be resolved by a single action alone, but rather by the consistent optimisation of the entire panel building process.

With Weidmüller, you have a strong partner by your side to support you in all work phases with perfectly coordinated solutions for your workshop. Based on many years of practical experience in panel building, we offer a comprehensive portfolio to effectively speed up your processes and increase your quality. Take a good look at our tools, markers, printers, software, automated systems and panel infrastructure for all work phases – from planning to installation and finally operation.

Planning

With our software solutions for marking (M-Print® PRO), semi-automated cable assembly (WPC tool) and configuration (WMC), you are perfectly positioned in every project phase. Thanks to interfaces to your CAE system, you benefit from optimum data consistency from planning through to commissioning.

A

Installation

Tools of certified premium quality, intuitive automatic stripping and crimping machines as a stand-alone or semi-automated solution, as well as a coordinated marking system enable you to save time and ensure safe assembly. At the same time, you minimise sources of error. Our end-to-end range is rounded off by versatile installation materials and infrastructure components for the panel. Besides our professional manual tools, we also offer you sets with an appropriate and efficient combination of tools and coordinating accessories, as well as a complete tool chest that has been developed in line with 5S and lean principles.

Operation

Even after commissioning your panels, the perfect interaction of products and tools from a single source offers you sustainable efficiency gains. Our extensive range of measuring and testing tools provides you with reliable support for troubleshooting. Seamless marking of all panel components as well as digital data consistency simplify and speed up maintenance work. This helps you reduce downtimes and increase the efficiency of your process steps.

Recognising and harnessing the potential of Industry 4.0

Smart panel building increases efficiency

In traditional panel building, the product development process comprises numerous manual work steps. This means a high expenditure of resources and time as well as a natural source of error. A study by the University of Stuttgart on the subject of panel building 4.0* shows that traditional panel builders spend the most time during the planning and installation phases. In other words: The project planning and circuit diagram design work steps tie up more than 50% of the working time during the planning stage. The reason for this is inconsistent engineering processes and increasingly complex requirements as a result of the growing project business. The many manual tasks in mechanical assembly and wiring during the installation stage account for more than 70% of the working time!

The biggest time sinks in traditional panel building

*University of Stuttgart, Institute for Control Engineering of Machine Tools and Manufacturing Units, „Schaltschrankbau 4.0 – Eine Studie über die Automatisierungs- und Digitalisierungspotentiale in der Fertigung von Schaltschränken und Schaltanlagen im klassischen Maschinen- und Anlagenbau (Panel building 4.0 – A Study of the Potential of Automation and Digitalisation in the Production of Panels and Switching Systems in Traditional Mechanical and Plant Engineering)“.

Greater productivity in the workshop

Standardisation and automation

Above all, standardisation, automation and process-wide solutions offer considerable optimisation potential for inconsistent engineering processes and time-consuming, manual activities. At Weidmüller, we have focused very closely on these issues.

The result: A portfolio of complete solutions for the workshop where each work step perfectly flows into the next, and enabling processes to be 80% faster with 100% planning reliability.

Optimisation potential from Weidmüller

80 %

Faster and safer processes

We are constantly developing innovations that streamline time-consuming work processes such as mechanical assembly and wiring and that increase your productivity, for example with tools, markers and printers optimally adapted to the application.

100 %

Premium quality

For over 40 years, Weidmüller has stood for automated systems, tools, markers and printers that meet the highest requirements. Our constantly updated certifications and approvals under all relevant standards speak for themselves – premium products made in Germany that you can rely on.

100 %

Planning safety

Maximum reliability for your projects. With Weidmüller you have a partner with many years of experience in cable processing and marking – and a partner that you can rely on. By reducing potential sources of error with continuous data consistency, we streamline time-consuming work processes and increase your productivity.

One Stop Shop

Guaranteed availability

Our complete solutions for your workshop are available to you everywhere and at any time thanks to our worldwide network. You can rely on this and on our proven logistical processes. Regardless of the location.

Cross-process solutions from Weidmüller

Design

The Weidmüller Configurator (WMC) supports you in planning and configuring your panel, such as with assembled terminal strips. You import data sets from your eCAD system through an interface and simply transfer them back after they have been processed in the WMC.

Purchasing

The consistent availability of all article and order numbers also applies to our E-shop and speeds up purchasing and reordering.

Planning

The M-Print® PRO marking software makes it much easier to plan and label markers. With the M-Print® PRO eCAD add-on, you connect your eCAD system with the marking software and perform intelligent automated component marking.

Service

You benefit from the perfect interaction of our integrated portfolio, even during and after the commissioning of your panels. Seamless marking of all panel components as well as digital data consistency simplify and speed up maintenance work. This helps you reduce downtimes and increases the efficiency of the entire application.

Mechanics and electronics in partnership:

High-quality and certified measuring and testing tools facilitate the final testing of panels and always deliver reliable measured values.

Warehousing

The markers of our MultiCard system are compatible with components such as terminal blocks, conductors, cables and devices from all manufacturers. Our MultiCard markers are available in almost 700 designs and can be individually printed. This reduces the number of marker variants that you always have to keep in stock.

Mechanical work preparation

Our comprehensive range supports you in all phases of work preparation, such as with the required panel infrastructure as well as cutting and perforation tools for the mechanical preparation of your panel components.

**Commissioning/testing**

Your safety is the top priority when it comes to commissioning electrical systems and devices. Weidmüller's voltage and continuity testers comply with all relevant standards and you have peace of mind that your tests are performed in accordance with the regulations.

Electrical work preparation

Our automated systems carry out repetitive tasks for you, such as the cutting to length, stripping and crimping of cables. The marking software M-Print® PRO directly controls printers such as the PrintJet CONNECT or the THM MultiMark and ensures that the right marker is printed for every component and every cable.

As stand-alone solutions or as a semi-automated Wire Processing Center (WPC) with your own planning software – our systems offer you maximum application flexibility.

Workshop/design

Error sources are reduced in installation and commissioning thanks to the clear and transparent marking of all cables and components. Weidmüller's manual tools for cutting, stripping, crimping, testing and screwing offer you a great deal of efficiency through precision, high quality and ergonomic design. The semi-automated Wire Processing Center (WPC) enables individual process optimisation with significantly increased efficiency.

Systemised marking for optimised processes

A

Our co-ordinated complete system

Professional, industrial marking in line with the IEC 60204-1 standard is essential for faultless operation and reliable maintenance of industrial facilities. Weidmüller calls this “systemised marking” and offers more than the norm: a perfectly co-ordinated product range for optimised processes.

Software

intuitive to use and tailored to your requirements.
Import, edit and manage data with ease with the M-Print® PRO software.

Do you need marking systems for a whole range of different applications?
Our all-in-one solutions are intelligent and display real future viability: convenient data organisation, intelligent functions and marking conforming to standards make our systems unique.

Your marking needs

One of the main requirements of a marking system is that it clearly shows how your components are configured. This includes a precise print image, convenient handling and the guarantee of usability in an industrial environment. The software should provide optimum support during data entry and management. During marker output, the speed should be adapted to your needs.

Markers

constructive solutions for all cabinet-related applications. From the shrink sleeve to the metal marker.

Printers

laser, ink or thermal transfer. Industrial printing systems for every requirement. Designed with one eye on the future to suit your requirement profile

The marking result

You will be won over by marking systems from Weidmüller. We don't just offer you a complete, convenient process chain from data entry to ready-for-use markers for your individual cabinet configuration. We offer you marking solutions that are already geared towards the future requirements of progressive automation. This means you are one step ahead of state-of-the-art!

Colour coding, only with PrintJet CONNECT

Relevant standards specify the need for colour coding in order to clearly identify different components, such as wires or push buttons. Coloured markings can be applied accurately and securely with the PrintJet inkjet printer from Weidmüller, which has a highly superior colour-printing capability.

The marking of components, sub-assemblies, devices, wires and connectors within your electrical system means that you will have clear identification throughout its entire life cycle. As a result, service and maintenance work is made significantly easier and potential faults can be quickly located and immediately eliminated.

Clear identification of electrical equipment and systems is obligatory, as defined in relevant standards such as DIN EN 60204-1, entitled "Safety of machinery - Electrical equipment of machines - Part 1: General requirements". To ensure that the markings have the best visibility, these and other standards recommend colour coding, in most cases.

Fast and accurate recognition of warning and hazard information through colour coding

In contrast to black and white printing, colour coding enables faster and more accurate recognition of the type of information that the marking is in place to convey. This is of particular significance when it applies to warning and hazard information. For example, due to its colour symbolism, the colour red indicates: "Warning – there is a possible hazard here". Accordingly, DIN EN 60204-1 states that "the colour RED [...] shall be used for EMERGENCY STOP and EMERGENCY OFF controls". Other colours, such as yellow, blue or green, are specified for various other

conditions. In addition to the compulsory colour coding, the standard recommends "identifying push buttons in the vicinity of the control panel, or preferably directly on the control panel, with [corresponding] symbols [...]" to prevent any confusion.

"Wherever colours are used to identify wires, use of the colour throughout the length of the wire is recommended, either through the colour of the insulation or through coloured markings at regular intervals, at the ends, or in accessible locations." (DIN EN 60204-1). Again, defined colours are specified for certain types of conductor in this case, e.g. green/yellow for PE wires or light blue for neutral wires.

High definition and in colour

In these cases, where colour coding is required, you will benefit from the unique characteristics of our PrintJet CONNECT inkjet printer which delivers high-definition, colour printing of texts, frames, lines, graphics, barcodes, serial numbers and photos. The major advantage is that only white markers are needed and that they can be printed with a total of 256 different colours. A marker can be printed using any number of different inks, without having to use individual matte colours. M-Print® PRO, our software for printing and ordering labels and markers, can be used

to fully customise each marker before printing it with the PrintJet CONNECT printer.

This system requires significantly fewer article numbers than when using colour markers, which are often only available as special orders. The effort involved in ordering and stocking is therefore considerably reduced. This enables standard-compliant coding in a time-saving and cost-efficient manner - for fast and accurate identification.

Overview of particular standards which specify or recommend colour coding:

- **DIN EN 60204-1** (Safety of machinery - Electrical equipment of machines - Part 1: General requirements)
- **IEC 60445** (Identification of equipment terminals, conductor terminations and wires)
- **IEC 60446** (Basic and safety principles for man-machine interface - Identification of wires by colours or alphanumerics)
- **DIN EN 50174-2** (Information technology - Cabling installation - Part 2: Installation planning and practices inside buildings)

Materials

Material	Thermal, mechanical characteristics	Chemical characteristics
Polyamide 66 (PA), UL 94-V2	Hard, rigid, abrasion-resistant halogen-free, -40 °C...+100 °C	Resistant to: oils, benzine, benzene, alkalis, solvents, chlorinated hydrocarbons, esters and ketones Not resistant to: ozone, hydrochloric acid, sulphuric acid, hydrogen peroxide
Polyethylene LD (PE), UL 94-HB	Soft, cold-resistant to -40 °C, impact-resistant, unbreakably rigid, transparent to opaque halogen-free, -40 °C...+80 °C	Resistant to: acid, alkalis, solvents, alcohol, benzine Not resistant to: aromatics, chlorinated hydrocarbons
Polyvinyl chloride, hard (PVC), UL 94-V0	Hard, rigid, transparent to opaque -50 °C...+80 °C	Resistant to: acid, alkalis, oils, greases, benzine Not resistant to: benzene, ketones, esters and stain removers
Polyvinyl chloride, soft (PVC), UL 94-V0	Hard, rigid, transparent to opaque -40 °C...+80 °C	Resistant to: acid, alkalis, oils, greases, detergents Not resistant to: benzene, esters and chlorinated hydrocarbons
Polypropylene (PP)	Hard, rigid, transparent to opaque -40 °C...+80 °C	Resistant to: acid, alkalis, saline solutions, alcohol, oil Not resistant to: chlorinated hydrocarbons
Polyolefine	Shrinkage rate 2:1 at 90 °C halogen-free, -55 °C...+105 °C	Resistant to: acid, alkalis, solvents, alcohol, benzine Not resistant to: aromatics, chlorinated hydrocarbons, diesel
	Fire-retardant Shrinkage rate 3:1 at 90 °C -55 °C...+135 °C	Resistant to: acid, alkalis, solvents, alcohol, benzine, saline solutions, oil Not resistant to: aromatics, chlorinated hydrocarbons, diesel, chlorinated hydrocarbons
Polyoxymethylene (POM)	halogen-free, Non-shrinking -55°C...+105°C	Resistant to: acid, alkalis, solvents, alcohol and petrol Not resistant to: aromatic compounds, chlorinated hydrocarbons and diesel
	Hard, rigid, impact-resistant to -40 °C, unbreakable, high dimensional stability in heat, high abrasion resistance, low moisture absorption -40 °C...+80 °C	Resistant to: weak acids, weak alkalis, benzene, benzine, alcohols, oils Not resistant to: strong acids and strong alkalis
Vinyl-coated cotton fabric	Halogen-free -29 °C...+80 °C	Resistant to: good resilience to water, oils and various solvents as well as alcohols and benzine
Polyester material	Halogen-free -40 °C...+150 °C	Resistant to: very good resilience to water and weathering effects, good resistance to petroleum-based solvents, moderate resistance to esters and ketones, very good resistance to UV radiation
Polyurethan	Flexible -40 °C...+90 °C	Resistant to: alcohols, solutions of organic salts, aromatic hydrocarbons, mineral oil, greases Not resistant to: acid, alkalis and chlorinated hydrocarbons

Material	Thermal, mechanical characteristics	Chemical characteristics
Polyvinyl fluoride	Dimensionally stable, abrasion-resistant, thermally stable -40 °C...+140 °C	Resistant to: very good resilience to water and weathering effects, good resistance to petroleum-based solvents, moderate resistance to esters and ketones, very good resistance to UV radiation
Thermoplastic polyurethane (TPU)	Halogen-free, flexible -40°C...+90°C	Resistant to: alcohol, petrol, cleaning solutions, butanol, ethyl and butyl cellosolve solvents
Stainless steel 1.4301		The 1.4301 steel is resistant to water, water vapour, humidity, food acids, as well as weak organic and inorganic acids and offers a range of diverse applications, e.g. in the foodstuff industry, in beverage production, in the pharmaceutical and cosmetic industry or in chemical equipment engineering.
Stainless steel 1.4404		The 1.4301 steel is resistant to water, salt water, chlorine-containing media, water vapour, humidity, food acids, as well as weak organic and inorganic acids and offers a range of diverse applications, e.g. in the foodstuff industry, in beverage production, in the pharmaceutical and cosmetic industry or in chemical equipment engineering.
Aluminium		Protected through passivation to protect reactions with air or water at room temperature. Inexpensive and light alternative to stainless steel.

Weidmüller tests and test procedures

Tests	Test conditions/requirements
Materials test	Flammability in accordance with UL 94 Shore A hardness test A - ISO 868 Surface resistance – DIN IEC 60093
Ageing	All marker materials are tested for their ageing resistance. Tested to Weidmüller test specifications.
Function test of PTFE and PVC wire insulation	Suitability of markers for installation at temperatures between -10 °C to +40 °C. Correct attachment test of the respective marker size for the smallest to the largest wire diameter.. Tested to Weidmüller test specifications.
Vibration resistance on carrier	Vibration test, industry, in accordance with: DIN EN 60068-2-6, sinusoidal (3 axes, 10 cycles per axis, acceleration 5g, frequency 10-500 Hz, sweep rate 1 octave/minute) Tested to Weidmüller test specifications.
Wipe resistance	Resistance of the print against the effects of hand perspiration, machine oil, water and ethanol. A slight alteration is permissible; however, clear identification (legibility) must be guaranteed. In the case of printing subject to VDE 0611 pt 4 (rating plate details), the wipe resistance against water and mineral spirits is to be tested for a period of 15 minutes. Standards: DIN VDE 0611-4 / Pt. 3.1.3 DIN EN 60947-1 / Pt. 5.1 DIN EN 60742, CEI 16-7 Tested to Weidmüller test specifications.
Scratch resistance	No scratches may be visible on the base or the carrier following the fingernail test. A slight alteration is permissible; however, clear identification must be guaranteed. Tested to Weidmüller test specifications.
UV light resistance	The function must be guaranteed. The print or colour of the product must be clearly recognisable. Standard: DIN EN ISO 4892-2; Tested to Weidmüller test specifications.
Chemical resistance of the print	Tested to Weidmüller test specifications.

We would like to point out that the described test procedures are implemented depending on type and application. Owing to the sheer number of possible applications and environmental influences such as moisture, radiation, gases or heat/cold to which the products can be exposed, Weidmüller accepts no liability for the suitability of products in all customer applications. Suitability tests for specific applications must therefore be carried out by the customer. However, Weidmüller will be happy to provide help and advice upon request.

Due to the different identification system available on the market, we wish to point out that Weidmüller does not guarantee industrial identification products if the Weidmüller components (markers – transparent sleeves – ink/toner/colour ink ribbons – printing systems) are combined with third-party products, unless Weidmüller has explicitly agreed for the purpose of an individual application.

Software

Software	M-Print® PRO	B.2
	M-Print® PRO eCAD	B.6

B

M-Print® PRO

Flexible, project-specific, and globally applicable

B M-Print® PRO is available in 20 different languages. Thanks to the graphical user interface, the software is particularly easy to use. It is compatible with various data formats and interfaces of eCAD programs and has a practical import function. M-Print® PRO makes it possible to create printings for different markers, e.g. MultiCard, MultiMark, MetalliCard, Label Processing tags and Sheets in one project. Weidmüller printers are controlled via USB port or network connection. You can also order pre-printed markers with M-Print® PRO directly online from us.

Benefits at a glance

Efficient

The complete integration into your processes saves time and money

Intuitive

Intuitive and easy to use thanks to graphical user interface (WYSIWYG)

Multilingual

The software is available for Windows® in 20 languages

All in one: the simplest marking system

Systemised marking is based upon the foundation of the intuitive software M-Print® PRO. With a single software package, it is possible to produce marking and signage for all applications conforming to the industry standards. Alongside the dependable data achieved by failure free data transfer, process optimisation is a key benefit. This optimisation is achieved via the conglomeration of marker, printer, and data transfer all with a single system. Then you will be prepared for all eventualities regarding the panel engineering process.

- Professional software package for marking electrical components
- Local and network installation
- Digital support of the entire marking process
- Optimal project creation. Complex project tasks in a single project file and templates for future projects
- Continuous and double-sided labelling (heat shrinks)
- Consecutive numbering function
- Data import of different file formats and eCAD interfaces
- Integrate graphics, barcodes, and symbols
- Integrated product catalogue containing the complete range of Weidmüller markers

Data transfer for optimised processes

Excel formats can be opened and imported. Defined import steps for routine operations. eCAD interface for a seamless digital process from beginning to end with M-Print® PRO eCAD.

Easy-to-use editing for rows and sequences

Endless marking for cost efficient printing. Automatic text and number sequences for continuous marking. Generate consecutive numbering by functions.

Graphic functions for complex applications

Large range of graphic tools and usable formats. Optimal formatting with automatic sizing option. Functions for colour codes and multi-level terminals. Template function for type labels.

M-Print® PRO**Print and ordering software for markers and labels**

M-Print® PRO is a professional software tool for printing and ordering Weidmüller markers and labels under Windows®. This software helps you to optimise your processes for marking electrical equipment. You can design, print and order your marking materials effortlessly, professionally and quickly: texts, frames, lines, graphics, barcodes, serial numbers and photos.

**Technical data****Here is an overview of the main functions**

Integrated product catalogue for all labels and markers, including images and links to the relevant web pages

Custom formatting of individual text characters (RTF)

Perform copy-and-paste functions with texts and their formats

Supports UNICODE for foreign-language texts, such as Russian, Chinese, Polish, etc.

Enter data on labels or worksheet

Creation of scales; numeric and alphanumeric counts and sequences

Extensive range of image formats (*.bmp, *.wmf, *.png, *.ico, *.jpeg, *.tif, *.gif)

Image library including all the important symbols used in electrical engineering

Permanent print preview: see what the printout will look like even at the design phase, WYSIWYG editing

Output devices supported: Weidmüller marking systems as well as standard printers with Windows® drivers

Imports data from CAE systems

Import wizard for a number of file formats (*.txt, *.csv, *.xml, etc.) for creating your own import scripts

Multi-level structuring of markers and labels

Interface to Weidmüller configurator

Hardware

CPU	Intel CPU (32 or 64 bit)
-----	--------------------------

Processor	min. 1.2 GHz processor clock
-----------	------------------------------

Printer communication	USB or IPV4 network (depending on the printing system used)
-----------------------	---

Working memory	1 GB (more memory is recommended depending on the size of the project files)
----------------	--

Hard disk space (without user files):

- approx. 300 MB (1 language installed)

- for multilingual installation: hard disk space depends on the number of installed languages, max. 2 GB

Screen resolution	min. 1024x768 pixels
-------------------	----------------------

Operation	mouse, keyboard
-----------	-----------------

Installation	DVD drive or installation via file storage (e.g. file server, USB stick)
--------------	--

Internet access	Optional, only if updates or access to the Weidmüller product catalogue are required.
-----------------	---

Not necessary for marking/printing.

Interface to printer system

USB, LAN

Supported operating systems	Windows® 7, Windows® 8, Windows® 8.1, Windows® 10 (incl. version 1809)
-----------------------------	--

Virtual environment or terminal server	Are possible for the use of M-Print® PRO, as long as they meet the above-mentioned operating systems and hardware requirements in full. However, it is recommended to install a trial version (30 days) to verify this in individual cases.

M-Print® PRO	
M-Print® PRO Online	1905490000

M-Print® PRO eCAD

The clever add-on for your electrical engineering software

In conjunction with the M-Print® PRO software and electrical engineering tools, the interface M-Print® PRO eCAD integrates reference labelling into the entire product development process. This means the interface makes a valuable contribution to increasing quality, accelerating market readiness, and ensuring more satisfied customers despite reduced development costs.

Benefits at a glance

The correct marker for every application

With M-Print® PRO eCAD, the appropriate markers are assigned to terminal blocks, devices, and cable types to ensure a standardised marking system. As a fixed element of the technical documentation, a complete print data is available for the workshop - manual data input is no longer necessary. Thanks to the routine checks of the CAE system, the data is complete and failure free.

- Print® PRO eCAD offers higher quality and reduces the „Time-to-Value”
- A continuous data flow improves the marker process
- Orientation in the cabinet made easy
- Procurement, installation, and commissioning with integrated marker data

Perfectly prepared for the follow-on processes

A well planned marking system helps service specialists to quickly identify the various components within the panel. M-Print® PRO eCAD allows technicians to work quicker and more efficiently to avoid failures. The Weidmüller interface connects your CAE software with our marking software M-Print® PRO and guarantees a continuous data flow. With all these benefits, you increase quality and project efficiency, achieve higher project throughput, and increase your margins.

Marking systems

The Weidmüller marking systems can be used to quickly and reliably label terminal block markers, wire and cable markers, device markers and labels.

The M-Print® PRO software enables rapid and easy identification of your electrical equipment. The Weidmüller printers PrintJet CONNECT, MCP Plus 2 plotter, MCP Basic 2 plotter and the thermal transfer printers are available for printing.

C

PrintJet CONNECT

The PrintJet CONNECT is part of the Weidmüller marking system consisting of software, markers and printers. It has an extremely durable industrial print head and has been specially optimised for fast working speed and high throughput.

MCP Plus 2

The MCP Plus 2 is suitable for lesser marking requirements, with frequent part-labelling and residual material processing. It enables processing to be increased by 20 % in comparison with similar systems.

MCP Basic 2

The portable MCP Basic 2 plotter is suitable for lesser marking requirements, part-labelling and processing residual quantities directly, on site.

Weidmüller's inkjet printers can be used to quickly and reliably label terminal block markers, device markers, wire and cable markers. The **M-Print® PRO** software enables rapid and easy identification of your electrical equipment. You can design, print and order your marking materials professionally and quickly. Frames, barcodes, graphics and photos are easy to incorporate. The versatile data conversion routines enable quick and flexible data integration. The Weidmüller printers **PrintJet CONNECT**, **MCP Plus 2** and **MCP Basic 2** are available for printing.

The **PrintJet CONNECT** sets a benchmark for industrial identification thanks to its high-quality printing and excellent smudge and scratch resistance. The **MCP Plus 2** plotter offers a high level of flexibility; with just one mounting plate you can print more than 270 different marker types in MultiCard format.

Gain a competitive edge with innovative technology

Our leading system for fully automatic terminal strip marking

C

Perfect for
500,000
markers
per Year

Robust marking

The Klippon® Automated RailLaser labels the markers directly. In this way, even the highest requirements for wipe and scratch resistance are met. The high-resolution quality ensures sharp contours and good legibility – even with the smallest markings.

Matching assortment

Based on Weidmüller's standard markers, the Klippon® Connect A-Series offers a suitably matched portfolio of pre-assembled markers. This enables the full saving potential of the Klippon® Automated RailLaser.

Universal labelling options

Due to the innovative laser technology, no special markers are required for the Klippon® Automated RailLaser. In addition to the pre-loaded white markers, the markers from Weidmüller's standard portfolio with their wide range of colors and materials can also be used.

Highest performance

The innovative interaction of software, sensor technology and laser system ensures fast, high-precision marking results. Time savings of up to 90 % will take you to the next level of efficient marking.

Highest flexibility

Due to the universal mounting rail holder and the laser direct marking technology, it is possible to very precisely mark terminal blocks and other mounting rail components – even with complex geometries. TS35 mounting rails can be marked from 100 to 1,200 mm in length, from 7.5 to 15 mm in height, and with a total weight of up to 15 kilograms.

Reliable quality

Due to the integration of the Weidmüller Configurator (WMC), planning data from eCAD programs can be used continuously. Error potentials are minimised because manual production steps and image processing in the machine are eliminated.

Highest precision and quality

Integrated image processing system for safe handling

The core of the Klippon® Automated RailLaser is an image processing system that is used to measure the terminal strips before the marking process. It determines the actual position of each marker, compares it with the theoretical position from the digital model and carries out the corresponding corrections fully automatically. This ensures a perfect marking result even in case of position deviations – e.g. because of thermal expansion of the components or inaccurate clamp position due to manual assembly.

The following illustrations show the advantage of labelling using the image processing system of the Klippon® Automated RailLaser: The system ensures first-class marking results in various applications and guarantees a high-quality appearance of the terminal strip in the finished control cabinet.

Marking result without image processing system

Marking result with image processing system

Technical data

Supply voltage	400 V AC / 32 A
Dimensions (W × H × D)	2.260 x 1.350 x 1.200 mm
Installation area (W × D)	3.860 x 2.000 mm
Weight	1.200 kg
Interfaces	USB, Ethernet, Suction
Marker type	MultiCard on terminal block
Software	Weidmüller Configurator WMC
Laser wavelength	355 nm
Laser class according to EN60825-1	Class 1
Operation door	Opening/closing motorised
Mounting rail adapter	100 - 1.200 mm

Discover the advantages of the PrintJet CONNECT

Pioneering ideas and solutions for the optimal marking process

C

Perfect printing results every time

The industrial print head of the PrintJet CONNECT is extremely robust and reliable. It delivers perfect printing results and is distinguished by its extremely long service life.

Economical printing, even for small print runs

The PrintJet CONNECT is also capable of printing half MultiCards. In this way, even really small quantities or corrections can be produced economically and without unnecessary waste.

Perfect print quality even on large markers

With the PrintJet CONNECT, graphics or full-surface printing can be produced in perfect print quality. The preheating of the print medium enables optimum ink flow control and therefore a uniform print result, even with large-area printing.

Flexible printer positioning and easy access

The new design of the PrintJet CONNECT allows the printer to be flexibly positioned. With each possible layout, easy access for operation and maintenance is ensured thanks to the 7" display that can be rotated by 180°, the large magazines positioned at the front and the large service flap.

Process different markers in one job

The PrintJet CONNECT processes a wide variety of formats in one print job. This means that even with different markers there is no need to change the print media. The magazine and stacker can hold up to 50 MultiCards for one job.

Optimal support during operation

The PrintJet CONNECT provides users with extensive, intuitively comprehensible support in the form of graphics, videos, web and QR codes, as well as links to information on the network. All the information can be easily selected and called up via the 7" touch display, which means that even employees who rarely use the printer can quickly learn how to operate it.

Low-maintenance design of the printer

Printing of more than 2 MultiCards per minute

Automatic calibration of the MultiCard

Dispenser magazine

PrintJet CONNECT – the new state-of-the-art printer

Technical details that will impress you

C

Perfectly centred prints without manual adjustment

The PrintJet CONNECT automatically adjusts itself to the size tolerances of the print media and therefore enables the print to be perfectly centred on each marker. Because MultiCard mats can minutely expand in case of highly fluctuating humidity, a sensor in the printer determines the exact size of the card and corrects the print values so that all the markers are printed evenly.

Fast handling of large volumes

Printing of large volumes is made easier by the fast printing speed and the large dispenser magazine. The PrintJet CONNECT prints more than 2 MultiCards per minute and has a large dispenser magazine with automatic stacking function for up to 50 cards.

Reliable even after extended storage

The print head of the PrintJet CONNECT can be quickly made ready for use again even after an extended storage period. Before placing it in storage, the ink cartridges are replaced with fluid cartridges that protect the print head from drying out.

Standardise processes through high output

Thanks to its fast printing speed, the PrintJet CONNECT is also suitable for printing large quantities of markers. For example, up to 26,000 DEK 5/5 terminal markers, 10,000 TM-I wire markers or 5,000 ESG device markers can be printed per hour. The high throughput makes it possible to concentrate print jobs on one printer and therefore standardise processes.

Up to
26,000
terminal markers
per hour

Benefit from optimal IT security

The printer's integrated IPC works with the proven WIN 10 IoT operating system, which enables the installation of security updates that are provided by Weidmüller on a regular basis.

Optimal service support

The comprehensive documentation function of the PrintJet CONNECT creates informative log files, enabling service technicians to provide targeted support both on site and during remote maintenance. This way, your printer remains ready for use on site at any time, whenever it is needed.

Optimal maintenance support

The printer records and stores all operationally-relevant parameters such as power supply, ink consumption, service life, humidity and room temperature etc., and promptly warns users in the event of errors and abnormal deviations. Corresponding messages are shown on the display of the PrintJet CONNECT via the M-Print® PRO software or are sent by email.

PrintJet CONNECT

The networked high-performance printer for efficient and high-quality markings

Your direct connection to the optimal marking process

The PrintJet CONNECT is the consistent further development of our tried-and-tested PrintJet series. Focusing on the modern needs of industry and panel building, it combines maximum process and cost efficiency with intelligent networking and complete data consistency. For example, you can use existing data directly in the marking process – for working more efficiently and with a minimal error rate. The PrintJet CONNECT is part of the Weidmüller marking system consisting of software, markers and printers. It has an extremely durable industrial print head and has been specially optimised for fast working speed and high throughput.

Your advantages at a glance:

- Perfect printing results every time
- Fast handling of large volumes
- High level of automation thanks to magazine capacity of 50 MultiCards
- Durable and robust markers thanks to thermal fixing
- User-friendly operation thanks to intuitive touch display
- Flexible connection possibilities
- Simple function monitoring on the device

Note

MCP Plus 2 Plotter

Ideal for small quantities

All-rounder with optimised use of space

The MCP Plus 2 is a flexible A3 plotter with labelling options for different applications. Three easily fitted receiver plates cover more than 250 types of MultiCards and label sheets. This means that you can simply and accurately print on remaining sheets, with simultaneous printing of up to 5 MultiCards. By using the appropriate mounting plate, you determine if you want to create small or large numbers of markers or if you wish to print labels. A pen repository takes the order and ensures that the plotter pens are always available.

C

Your advantages from the MCP Plus 2 Plotter

One printing system for various applications: the MCP Plus 2 prints over 250 types of MultiCards and labels.

The mounting plate can be divided in an economical way: ideal for remaining stocks, part printing and low marking requirements.

MCP Basic 2 Plotter

Flexible on-site marking

Small size and readily on hand

The MCP Basic 2 is used when you need to print markers anywhere on-site in small quantities. The plotter is compact in size and can quickly be up and running wherever you are. Thanks to its low weight, it can be easily up and running everywhere quickly.

C With three optionally usable mounting plates, the MCP Basic 2 covers over 250 types of MultiCards and labels. Particularly useful is the option to accept individual segments which makes it the perfect device for marking small quantities and reduces loss from unused signs.

Your advantages from the MCP Basic 2 Plotter

Flexible for different applications: the MCP Basic 2 prints MultiCards and labels.

Single labels, sub-segments or remaining quantities: the MCP Basic 2 allows you to use the materials in an economical and targeted way.

Reasons to choose MultiCard

The perfect marking solution for every application

The complete, user-friendly marker range to meet all your needs.

From the planning phase of a marking project to final assembly, the MultiCard range has over 270 markers to meet all application levels and identification processes. Thanks to the excellent compatibility of the system components, you can always find the right solution for your connector, conductor, cable or device markings, even when it comes to more complex electrical cabinet systems. When a MultiCard marker is designed, the user is the focal point. All the mounting options and processes are therefore included in the design of the system elements. You can also keep an overview and act in a timely fashion due to the information on the project description areas and using the storage option in the circuit diagram folder. The exceptionally smudge-resistant and intense colour printing means that you can achieve maximum efficiency in diverse areas of application.

Using PrintJet CONNECT, you can print your markers with non-fading four-colour print – customised with graphics, company logos, warning notices and much more.

The project marker surface is the place for assembly relevant information, which enables you to quickly identify the correct installation location.

MultiCard markers are halogen-free and resistant to many chemicals. Their high-quality design means that they are suitable for the most demanding applications areas, such as transportation and building technology.

Terminal markers

Our range of terminal markers enables you to accomplish virtually any labelling task, on any conductor connector. Whether this involves multi-digit labelling, ready-to-use markers with standard print or customised labelling, white or colour markers or group designations at the clamping points – our comprehensive product portfolio is the easy, quick and clear answer to every marking task.

C

ZS + WAD

The ZS markers were specially designed for the Z-series, their functionality stands out thanks to a time-saving folding mechanism: without removing the markers, cross-connectors are still easily accessible. The WAD marker is the preferred choice for marking group functions.

Tag carrier

Available to you for every solution, is a suitable tag carrier that is tailored according to your needs and matched to the MultiCard product line.

ELS

Optimally designed for use in WKM cable markers or SchT 5-type tag carriers, the ELS tags meet the highest requirements where prominent identification of cables and terminal strips is needed.

**Dekafix + WS**

Conductor and plug-in connectors, as well as electronic assemblies, can be identified quickly and easily with the Dekafix and WS markers.

**MultiFit**

For manufacturer-independent marking of components, we have developed the adaptable MultiFit marker range. The MF 5/12 MC connector marker, for example, is suitable for identifying the flat channel of the 12 mm wide modular terminals from Phoenix Contact.

**PrintJet CONNECT**

The PrintJet CONNECT is suitable for all plastic and metal markers from the MultiCard and MetalliCard families and achieves extremely durable, excellent printing results on all media.

Terminal markers

Terminal markers for the universal range for Klippon® Connect

The tables on the following pages show which markers fit the various terminal series. The terminal pitch governs the selection of a marker. For example, a WDU 2.5 terminal has a pitch of 5 mm, the WS 12/5 marker is 12 mm long and suitable for a 5 mm pitch.

C

Whole blocks of terminals can be marked as a strip. When a terminal with a larger pitch has to be marked (e.g. WDU 16), a smaller marker (e.g. WS 12/5) can be clipped onto it. Most of the markers are compatible with each other.

The two traditional marker series, DEK and WS, are available as ready-to-use markers. Users can print these for themselves using our Multicards.

MultiCards can be printed on, using the innovative PrintJet CONNECT, MCP Plus 2 or MCP Basic 2 printing systems in conjunction with our M-Print® PRO software.

To see a small selection of our markers, order a bag of samples, order No. **1646670000**.

Owing to the sheer number of possible applications and environmental influences such as moisture, radiation, gases or heat/cold to which the products can be exposed, Weidmüller accepts no liability for the suitability of products in all customer applications. Suitability tests for specific applications must therefore be carried out by the customer. However, Weidmüller will be happy to provide help and advice upon request. Due to the different identification system available on the market, we wish to point out that Weidmüller does not guarantee industrial identification products if the Weidmüller components (markers – transparent sleeves – ink/toner/colour ink ribbons – printing systems) are combined with third-party products, unless Weidmüller has explicitly agreed for the purpose of an individual application.

DEK – Dekafix MultiCard

Universal basics for marking connectors

Fast installation, individually or combined

Cable and plug-in connectors as well as electronics modules can be quickly and easily marked using Dekafix markers. Intended for short number strings, strip installation is completed in a single step.

C

Dekafix - the benefits to you

- Universal: can be used for sequences of numbers of different lengths and multi-line labelling
- The best orientation: simple assignment thanks to additional information on the project marking surface
- Easy to install: simple snap-on feature for individual or multiple signs
- High contrast: the best printed image and easy to read

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

You have a project marking surface on the MultiCard format for additional information which makes assignment during assembly much simpler.

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C

Ordering data

Colour	International colour code colours, not contained in the range, are available on request.
Special printing	Specify special printing and colours per using the M-Print® PRO software.
Printing	Black or colour
Possible printing systems	PrintJet CONNECT, PrintJet ADVANCED, MCP Plus 2, MCP Basic 2
Notes on mounting	Mount in strips when the marker pitch (width) corresponds to the pitch of the terminals. For example, DEK 5 mm pitch for terminals with 5 mm pitch such as the WDU 2.5. Mount individual markers when the terminal pitch is larger than the marker pitch (width). For example, DEK 6.5 mount individually on WDU 6 terminals.
Minimum order quantity	1 pack = 5 cards

As an option it is also available without the project marking surface: the plus-series versions come in whole strips for particularly fast assembly.

WS MultiCard

Custom design for long character strings

Fast installation, individually or combined

Specifically for the W-series cable connectors, the WS markers were developed. There is enough space on the printing area for long and individual character strings, even for multi-line layouts. The fact that the WS signs are system compatible means that you can use them also for the complete universal range Klippon® Connect. The MultiCard format means that the WS marker can be labelled with both the PrintJet CONNECT inkjet printer and with plotters.

WS markers - the benefits to you

- Universal: can be used for sequences of numbers of different lengths and multi-line labelling
- The best orientation: simple assignment thanks to additional information on the project marking surface
- Easy to install: simple snap-on feature for individual or multiple signs
- High contrast: the best printed image and easy to read

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Between 3 to 10 characters which are easy to read fit on the WS markers (marker length: 5 to 15 mm).

As an option it is also available without the project marking surface: the plus series versions come in whole strips for particularly fast assembly.

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C

Ordering data

Colour	International colour code colours, not contained in the range, are available on request.
Special printing	Specify special printing and colours per using the M-Print® PRO software.
Printing	Black or colour
Possible printing systems	PrintJet CONNECT, PrintJet ADVANCED, MCP Plus 2, MCP Basic 2
Minimum order quantity	1 pack = 5 cards

WS MultiCard

The diagram illustrates the terminal marker configurations for two different module types. On the left, the WS 10/3.5 PLUS module is shown with four horizontal rows of ten pins each. The top row has a single vertical pin in the center. The middle three rows have two vertical pins in the center. On the right, the WS 12/3.5 module is shown with five horizontal rows of twelve pins each. The top four rows have a single vertical pin in the center. The bottom row has two vertical pins in the center.

ZS MultiCard

Amazing functionality thanks to time-saving folding mechanism

An extensive marking area and distinct handling advantages

The ZS markers were specially designed for the Z-series, their functionality stands out thanks to a time-saving folding mechanism: without removing the markers, cross-connectors are still easily accessible. This is an advantage in terms of handling when it comes to quick exchanges or fast assembly. Fitted with the proven snap-on system, individual signs or whole strips can be fitted in the fastest possible time; their large marking surface means that they provide absolutely legible labelling.

ZS – the benefits to you

- Intelligent: foldable hinges for the best possible assembly process with cross-connectors
- Optimised: large labelling surfaces give you the best overview
- Application-specific: tried-and-tested MultiCard format markers

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Foldable hinges for easy assembly of cross-connectors; shield lengths of up to 15 mm for long series of characters.

MF – MultiFit MultiCard

For manufacturer-independent marking

The adaptable range of markers

For manufacturer-independent marking of components, we have developed the adaptable MultiFit marker range. Without having to give up the highly professional printing you get with Weidmüller's marking system, you can use the other manufacturer's components that you are used to, if you wish, and combine them with Weidmüller's MultiFit markers. Designed for the clamping devices of different vendors, these markers fit seamlessly into your marking tasks and solve your desired labelling jobs admirably. MultiFit markers are suitable for components made by the following manufacturers: Allen-Bradley, Beckhoff, Cabur, Entrellec, Festo, Legrand, Murrelektronik, Phoenix Contact, Siemens, Telemecanique, Wago, Wieland and Woertz.

MultiFit – the benefits to you

- In line with market requirements: for components from 14 of the best-known manufacturers.
- Can be integrated: suitable for a variety of terminals
- High-quality printing using Weidmüller's marking system

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Manufacturer-independent marking: almost complete coverage of all major components on the market.

A MultiFit sample box contains all the variants of the markers and helps you when planning the application by giving you the option of checking MultiFit markers to be used against your chosen components.

(Please select the marker according to the width of the terminal)

Please note:

The recommended applications given above do not release the user from his obligation to check the applicability in each individual application. The marker/terminal combination should, in each case, be chosen in such a way that either the marker pitch matches the terminal pitch, or the marker pitch is smaller than the terminal pitch.

WAD MultiCard

Intelligent solutions for expansive designations

The large surface areas which come with a time-saving folding mechanism

The WAD marker is the preferred choice for marking group functions. Locket to individual terminals, or the end brackets, this marker gives you the largest possible surface for your labelling.

C

WAD – the benefits to you

- WAD marker and cover for the terminals of the W-series and end brackets WEW 35/2 and ZEW 35/2
- Optimised: large labelling surfaces give you the best overview
- Top-quality and resistant printing with PrintJet CONNECT printer

PrintJet CONNECT

Signalling effect: WAD markers designed with PrintJet CONNECT are ideally suited for eye catching colour coding of terminal strips.

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C

Ordering data

Colour	International colour code colours, not contained in the range, are available on request.
Special printing	Specify special printing and colours per using the M-Print® PRO software.
Printing	Black or colour
Possible printing systems	PrintJet CONNECT, PrintJet ADVANCED
Minimum order quantity	1 pack = 5 cards

For warning notices: WAD markers are available with lightning bolt symbols in special or standard print.

ELS MultiCard

Resilient, inlay tags

A resilient interior for cable markers or tag carriers

Optimally designed for use in WKM cable markers or SchT 5-type tag carriers, the ELS tags meet the highest requirements where prominent identification of cables and terminal strips is needed. The high-quality markers are made of polyamide 66. This guarantees a constant, high-quality appearance and clear and simple presentation of information even in extreme conditions where oil, water or other fluids are present.

ELS inlay tags – the benefits to you

- Perfectly fitting: in flat form they are the perfect inserts for WKM or SchT 5-type
- Resistant: indestructible material characteristics ensure consistent marking quality

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

The ELS 16/40 or ELS 6/30-type labels give maximum marking quality when they are inserted into WKM cable markers and fastened with cable ties.

C

Wire and cable markers

Weidmüller's range of wire and cable markers provide you with solutions for a huge variety of applications.

The applications range from thin wires through to cables with large external diameters. Amongst others, the assortment includes combination systems with individual markers, transparent sleeves and markers that are fastened using cable ties.

C

Open and closed, printed or blank markers for individual printing are available.

SlimFix SF/SFR

SlimFix are wire and cable markers featuring a space-saving design. The markers can also be attached to the wires after these have been installed.

SlimFix Clip SFC

With its exclusive locking mechanism, the SFC marker offers the security of a closed marker with the ease of installation of an open marker.

TM-I with TM sleeves

The special contour of the TM-I inlay tags in MultiCard format means easy assembly and firm seating in the appropriate TM sleeves.

**SFX cable markers**

The SFX markers are suitable for identifying cables that are 7 mm in diameter and are distinguishable by their large marking surface.

**PrintJet CONNECT**

The PrintJet CONNECT is suitable for all plastic and metal markers from the MultiCard and MetalliCard families and achieves extremely durable, excellent printing results on all media.

Wire and cable markers

Halogen-free and practically free of pollutants, Weidmüller's wire and cable markers comply with both European and in-house standards of well-known system manufacturers.

Systems are available for

- Clip-on, ready-to-use printed markers according to individual marking requirements.
- Marking by digits from a standard set of characters.
- Combination of individual pre-printed digits to form a character code.
- Customer labelling with PrintJet CONNECT, MCP plotters, THM printers, laser printers (DIN A4 format) or STI pens.

A sample selection is available in Weidmüller's sample boxes wire and cable markers: order no. **1640420000**.

Owing to the sheer number of possible applications and environmental influences such as moisture, radiation, gases or heat/cold to which the products can be exposed, Weidmüller accepts no liability for the suitability of products in all customer applications. Suitability tests for specific applications must therefore be carried out by the customer. However, Weidmüller will be happy to provide help and advice upon request.

Due to the different identification system available on the market, we wish to point out that Weidmüller does not guarantee industrial identification products if the Weidmüller components (markers – transparent sleeves – ink/toner/colour ink ribbons – printing systems) are combined with third-party products, unless Weidmüller has explicitly agreed for the purpose of an individual application.

SF/SFR – SlimFix MultiCard

Open cable markers for tough requirements

The compact class tailored to lie close to the cable

SlimFix cable markers from the SF/SFR range are true all-rounders when it comes to meeting tough requirements. The markers are approved and listed for rail transportation systems and available in 12 mm or 21 mm long sleeves. They are suitable for use in areas with exposure to vibrations. Thanks to their close cut and compact shape, the sleeves attach tightly to the cables and give you an optimal cross-section range and secure marking when installing as a result. The SF range covers diameters from 1.0 to 7.8 mm and is fixed in position using the specialised SF tool. The SFR range covers cable diameters from 1.7 to 3.7 mm. The range is manually attached without the use of tools and does not influence adhesion of the markers in any way.

SlimFix SF/SFR – the benefits to you

- Secure: firmly fixed, halogen-free and vibration-resistant sleeves
- Tested: recognised and listed for rail transportation systems
- User-friendly: the best material and assembly characteristics
- Also available in fire class VO. Please contact Weidmüller for details.

SFX – SlimFix MultiCard

Intelligent cable marking with cable tie feed-through

Wide range of options and handling advantages

The SFX-range of SlimFix markers can be used for cable diameters from 7.0 mm. The maximum diameter is only limited by the length of the cable tie that is used. The versions with ergonomically designed cable tie feedthrough are particularly easy to handle. A bevel makes feeding the cable tie-in simple.

In factory halls that appear to be clean, temperature, UV light – such as that produced by simple fluorescent tubes – and small amounts of chemical compounds affect the service life of all plastic products. Weidmüller has therefore extended its successful family of SFX cable markers from the MultiCard series to include variants that offer improved durability. Furthermore, the fire classification according to UL 94 has been increased to VO.

SlimFix SFX – the benefits to you

- Large variety: the right size for every label
- Time optimised: simple assembly thanks to the ergonomically designed cable tie feed-through
- Sturdy: resistant even with high mechanical demands

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

The maximum diameter of the marker is determined by the length of the cable tie; it can be secured by the use of one or two cable ties.

Optimum space usage in the application area and needs-based labelling surfaces of various sizes.

Optimised assembly properties thanks to the bevelled cable tie feed-through which is found in the SFX 9/24 S, SFX 9/40 S and SFX 10/60 S-type markers.

SFC – SlimFix Clip MultiCard

A convenient clip system for wires and cables

Highly durable markers with extra security

The halogen-free SlimFix Clips are made from sturdy polyamide 66 and combine two advantages in one product. Their unique clip closure means they can be fitted at every stage in the installation as easily as an open marker while still offering you the application-based security of a closed marker.

The markers are designed for wire and cable diameters from 1.5 to 7.0 mm, have labelling surfaces up to 30 mm long to give you enough space for extensive character strings which are easily legible and can be printed onto the differently coloured markers using the PrintJet CONNECT printer.

SlimFix Clip SFC – the benefits to you

- Compact: secure and quick fitting without additional tools
- Informative: large labelling surface for long character strings
- Strong combinations: different colours and sizes
- Individual: can be printed using PrintJet CONNECT

PrintJet CONNECT Plotter MCP Plus 2 Plotter MCP Basic 2

The SFC is fitted quickly and simply using its clip closure system – no need for additional tools.

Optimal cross-sectional range in all sizes: SFC-type markers in 5 sizes for wire diameters from 1.5 to 7.0 mm.

TM-I MultiCard – inlay tags

Contour-hugging signs for all sleeves

The compatible markers with the bonus of being exchangeable

The 12 to 30 mm long TM-I signs stand out on all levels due to their maximum flexibility when assembling sleeves. The sophisticated contouring of the signs ensures that they fit securely and also allow for easy assembly and exchange. The project marking surface is typical for MultiCard markers and gives maximum clarity during isolation and assembly. For this, fitting or exchanging the signs can be done easily before or after the sleeves have been attached. The markers are recognised and listed for transportation engineering. The markers in the range come in five, partly combinable, lengths and are compatible with many commonly available sleeves. The right sign for every sleeve!

TM-I – the benefits to you

- Strong detail: ideal assembly characteristics thanks to the special sign contour
- Clear: project marker surfaces for better orientation and easy isolation
- Optional: can be used with many commonly available sleeves
- Not suited for labelling with P-Ink or STI pen in combination with CLI T sleeves

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Trouble-free assembly before or after the sleeve is fitted as well as easy replacement of the signs.

Always the right sign length, for character sequences of up to 21 characters.

For differentiated marking of different information in one place, the TM-I 12/18 has two combinable sign lengths.

ELS MultiCard

Resilient, inlay tags

A resilient interior for cable markers or tag carriers

Optimally designed for use in WKM cable markers or SchT 5-type tag carriers, the ELS tags meet the highest requirements where prominent identification of cables and terminal strips is needed. The high-quality markers are made of polyamide 66. This guarantees a constant, high-quality appearance and clear and simple presentation of information even under the extremely demanding conditions where oil, water or other fluids are present.

ELS inlay tags – the benefits to you

- Perfectly fitting: in flat form they are the perfect inserts for WKM or SchT 5-type
- Resistant: indestructible material characteristics ensure consistent marking quality

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

The ELS 16/40 or ELS 6/30-type labels give maximum marking quality when they are inserted into WKM cable markers and fastened with cable ties.

Individual processing

The professional system for every standard

PrintJet CONNECT

Superior components in a comprehensive product line

Our labelling system allows you to label with precision and speed – without losing track.

Our completely matched line of materials, sizes and mounting options cover solutions for all of your particular operational needs.

The systematic use of PrintJet CONNECT and the M-Print®-PRO-software enables you to custom design and process facility labelling for all of your system components. The result is a consistently outstanding marking system.

The benefits for you

- Quality: durable materials for extreme conditions
- Customised: perfectly matched system components provide the best variety
- Efficient: tailor-made solutions from a single source
- Professional: in-house control of all marking processes
- Flexible: Excellent assembly characteristics

A special punched-out hole in the SFX-M 11/60 enables use with steel cable ties, and with plastic cable ties with the SFX-M 11/60-5.

The universal inlay is designed to accept eight different tag types and is particularly suitable for printing small batch jobs.

Markers for devices and installations

Device and installation markers round off our range of switchgear markers. Employing our device markers means you will be in compliance with official regulations on the marking of electrical equipment. Weidmüller offers corresponding markers for devices made by well-known manufacturers. Mirroring their original counterparts, these markers are attached with the traditional adhesive or rapid clip-on techniques. By using the corresponding software and system-compatible printer or plotter system, you can print your own markings on these markers.

C

ESG

The ESG MultiCard markers are for all well-known device manufacturers; with all-purpose usage thanks to self-adhesive or snap-on markers.

ClipCard

ClipCard MultiCard markers are a genuine alternative to engraving. Flexible fastening options using holders, tag rails, self-adhesive, screws or rivets.

DMC

The marking surface (12 x 27 mm) is large enough to hold information about the device and its function. The markers are fastened to a wire or cable by means of a simple clip-on mechanism.

**SwitchMark**

SwitchMark MultiCard markers are ideal for identifying control and signalling equipment.

**ELS**

Optimally designed for use in WKM cable markers or SchT 5-type tag carriers, the ELS tags meet the highest requirements where prominent identification of cables and terminal strips is needed.

**PrintJet CONNECT**

The PrintJet CONNECT is suitable for all plastic and metal markers from the MultiCard and MetalliCard families and achieves extremely durable, excellent printing results on all media.

Markers for devices and installations

DMC MultiCard

Reliable equipment identification on wires and cables

Snap-fit mechanism for absolutely secure attachment

Maximum visibility when labelling switching devices or components can be achieved using the single-piece DMC markers. The sophisticated snap-fit mechanism gives a reliable hold on multi-core control cables, as well as on individual wires. This is a valuable advantage when critical equipment information needs to be well positioned in order to be visible, even with extremely tight space constraints. It should be firmly fixed to wire and cable diameters from 1.5 to 7.5 mm.

DMC – the benefits to you

- Clever: snap-fit mechanism for quick and secure application
- Versatile: can be attached to one or more connection wires
- Distinctive: a large labelling area gives you all the information at a glance

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Simply and securely: the clip assembly onto wires with cross-sections from 0.5 to 10 mm².

Creates space: equipment identification for clear additional information can be simply attached to wires or cables.

ESG MultiCard

For independent manufacturer equipment identification

More clarity thanks to the uniform marking matrix

You can solve the identification of independent manufacturer equipment with the uniform and systematically constructed ESG-type MultiCard range. The carefully matched components bring together equipment from different manufacturers strictly and systematically, in a uniform marking matrix, which is reinforced by the high-quality and brilliance of the PrintJet CONNECT printing. In this way you can create perfect clarity in the electrical cabinet at the highest level of professionalism. ESG-markers are available for equipment from the following manufacturers, including: ABB-Stotz, AEG, Beckhoff, Berneker & Rainer, Eaton-Moeller, Festo, Lumberg, Siemens and Telemecanique (Schneider Electric).

ESG – the benefits to you

- Manufacturer-independent: for equipment from the best-known providers
- Systematic: perfectly matching marking components in one range
- Compatible: a suitable marker for every device
- Time saving: no pre-selection needed – fast installation procedures

PrintJet CONNECT Plotter MCP Plus 2 Plotter MCP Basic 2

Individual signs of the ESG-range are compatible with our universal-use sign rails which are particularly suitable for rows of equipment and switches.

C

SM – SwitchMark MultiCard

Exemplary functional marking for control and signalling devices

Equipment-specific labelling for safe control

To avoid incorrect operation, clear identification is essential when controlling the functions of control and signalling devices. Designed specifically to meet this need, the SwitchMark system covers the entire range of requirements of the respective application areas. The signs are snapped into the holders designed for the different manufacturers' control and signalling devices or fastened in place using the adhesive tape that has been applied previously. Alternatively, choose a set containing both holders and signs. Even for the many variations in cam-switch positions, the SwitchMark range contains the appropriately shaped signs for accurate labelling. Combined with Weidmüller's marking systems, you can print the signs independently and as required for the application in an individual layout – including all the relevant additional information.

SwitchMark – the benefits to you

- Practical: signs for various device manufacturers or holders with shields from Weidmüller in a set
- Easy to install: glue or snap in place
- Individual: application-precise in terms of number and labelling
- Cost efficient: no need to store standard signs

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

Holders and signs are available in sets in the most common sizes and versions for control and signalling devices from Siemens (type 35B) or ABB (type ONFB72).

You can use the SwitchMark system-solution to cover a variety of cam controllers from various manufacturers.

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C

Technical data detectable markers

Material	Polyamide 66, halogen-free

C

CC – ClipCard MultiCard

The alternative to engraved device markers

Brilliant printing results without of high costs

With its crisply printed labelling area in various sizes, the multi-functional ClipCard is on an equal footing with engraved device markers. Mounted at eye-level, it is the ideal alternative for marking electrical installations and switching facilities, and uses the full range of attachment types.

From simple device identification through to the labelling of pipework, valves, motors or lamps in accordance with DIN V VDE V 0108 (part 100), or creating nameplates with colour firm logo, you cover the entire marking requirements reliably and cost-efficiently with the ClipCard range.

ClipCard – the benefits to you

- Economic: highly resistant labelling in engraved quality
- Easy to install: all types of attachment in one format
- Comprehensive: a wide range of applications thanks to the variety of sizes and design options

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C
Temperature range	-40 °C to 60 °C (self-adhesive)
Approved air humidity	Max. 60 %, only for screwable markers

Technical data detectable markers

Material	Polyamide 66, halogen-free
UL 94 flammability rating	HB
Temperature range	-40 °C to 100 °C

Ordering data

Colour	International colour code colours, not contained in the range, are available on request.
Special printing	Specify special printing and colours per using the M-Print® PRO software.
Printing	Black or colour
Possible printing systems	PrintJet CONNECT, PrintJet ADVANCED, MCP Plus 2, MCP Basic 2
Not printable with	SMark Laser with self-adhesive markers
Minimum order quantity	1 pack = 5 cards

PrintJet CONNECT

Plotter MCP Plus 2

Plotter MCP Basic 2

The signs are pre-drilled or have double-sided adhesive tape attached giving you tremendous time savings during installation.

There are matching holders for additional mounting possibilities: snap-locking or using cable ties.

Individual processing

The professional system for every standard

PrintJet CONNECT

Superior components in a comprehensive product line

Our labelling system allows you to label with precision and speed – without losing track.

Our completely matched line of materials, sizes and mounting options cover solutions for all of your particular operational needs.

The systematic use of PrintJet CONNECT and the M-Print®-PRO-software enables you to custom design and process facility labelling for all of your system components. The result is a consistently outstanding marking system.

The benefits for you

- Quality: durable materials for extreme conditions
- Customised: perfectly matched system components provide the best variety
- Efficient: tailor-made solutions from a single source
- Professional: in-house control of all marking processes

PrintJet CONNECT enables you to print MetalliCards as standard.

Precise colour printing across multiple tags of the same type – thanks to an inlay-secured printing process.

The universal inlay is designed to accept eight different tag types and is particularly suitable for printing small batch jobs.

Technical data

Tag material	Micro etching steel 1.4301 (ST) or chromal coated aluminium (AL)
Temperature range	-55 °C to +130 °C
Thickness	0.5 mm
Primer	100 impregnated cloths and hermetically sealed
Possible printing systems	PrintJet CONNECT, PrintJet ADVANCED

D

Marking solutions for the whole panel

MultiMark is the smart all-in-one system

With MultiMark you have a fast and reliable marking system at your disposal to enable virtually any kind of marking. Terminals, conductors, cables or devices – the MultiMark product family offers a well-structured, practical range of markers which can be used in combination with our advanced M-Print® PRO configuration software for all areas of use.

Cost-effectiveness, in particular for small and medium print volumes, results from the integration of the THM MultiMark rapid thermal transfer printer – without compromising the quality. Markings are very legible and resistant to external influences. The THM MultiMark PLUS printer is the ideal partner for medium to large print volumes.

THM MultiMark

The THM MultiMark is a robust and modular thermal transfer printer which is particularly beneficial when processing continuous materials. The optional cutting and perforating function allows the continuous material to be divided into any length.

THM MultiMark PLUS

The THM MultiMark PLUS is designed for medium to high print volumes. Its robust design makes the printer particularly suitable for industrial environments.

Thermal transfer printer THM MultiMark

The compact all-rounder

The only printer you will need for your marking tasks

The THM MultiMark is a compact and modularly constructed thermal transfer printer that makes full use of its many advantages and high number of potential uses. The integrated cutting and perforation option enables continuous materials to be cut to any length – making your work considerably easier when it comes to cutting and assigning the respective labels. The printer edits markers and labels from the MultiMark family as well as continuous materials, textile and polyester labels, heat shrink sleeves and PLC labels.

Snap-on terminal markers are printed using a separate print contact pressure roller, which can be changed in just 30 seconds.

Another plus: the device is very easy to operate thanks to an intuitive touch display and clear status indicators – in 22 languages. The compact design and low weight of 3.5 kg also ensures that the THM MultiMark really can be used anywhere, e.g. as a mobile printer for your on-site jobs.

THM MultiMark

All-rounder THM MultiMark: the printer handles marking jobs that would otherwise need to be done by several different devices.

Technical data

	Description
Intended use	Printing Weidmüller MultiMark, DEK, WS and MF strip marker, shrink tubes, label on rolls
Technology	Thermal transfer
Feed	Manually mounting
Application site	Office conditions
Ambient temperature	5 °C to 40 °C
Included in delivery	<ul style="list-style-type: none"> • THM MultiMark • Power cable (Type E+F/UK/USA) • Ink ribbon RIBBON MM-TB 25/360 SW • Ink ribbon RIBBON MM 110/360 SW • Cardboard core • Pressure roller THM MMP ROLLER TB • Pressure roller THM MMP ROLLER 115 • USB cable • Operating manual • DVD with M-Print® PRO software

Your benefits with THM MultiMark

- A printer for all jobs
- Ideal for small and medium print volumes
- Virtually maintenance-free thanks to thermal transfer technology
- Excellent readability (resolution: 300 dpi)
- Flexibility provided by modular perforation and cutting unit
- The contact pressure roller can be changed in 30 seconds
- High output, from 250 Dekafix markers/min.

THM MultiMark Plus thermal transfer printer

Robust design for larger print jobs

THM MultiMark PLUS

The perfect partner at your side

The THM MultiMark PLUS thermal transfer printer impresses with its robust design which is perfectly suited for harsher environments. With its high speed, the printer is ideal for medium and large print volumes. In addition, the THM MultiMark PLUS is equipped with a WLAN stick which makes working with the printer even more flexible.

D The printer effortlessly prints the entire MultiMark range and can also be extended to include a perforation option. Operation is made even simpler thanks to the intuitive display with 22 integrated languages and the status displays.

Output of all continuous materials, woven fabric and polyester labels, shrink sleeves and PLC labels at high speed and high resolution.

MultiMark in use

Professional and user-friendly

Marking: added value for every system

Standards and guidelines call for correct presentation and identification of installed components and associated documentation. The systematic use of MultiMark will put you on the right track to documenting your system in a meaningful way.

D

User-friendly Usage and handling

The outstanding properties of the different marker types make it easy for you to use MultiMark as an all-purpose marking system. Durable material, strong adhesive labels, perforations – each and every detail has been carefully considered and subjected to extensive practical tests.

SM/CC: Eye-catching and highly adhesive equipment labels – ensure that devices are used correctly

DEK/WS/MF: Flexible connector markers – print, clip, finished

Your benefits with MultiMark

- Over 600 marking products on offer
- Practically all identification requirements are taken care of
- Fast printing, fast identification
- Handling benefits, e.g. for terminal markers
- Excellent material properties
- Convenient handling
- Clear print image

WM: Wire markers installed without tools – simply edit your projects on a computer then print on a reel

ESG: All-purpose equipment identification – simple labelling of markers for quick identification of components

SFX: Highly flexible cable markers – determine the maximum diameter from the length of the cable tie

TM-I: Plug-in wire markers – easy to install before and after the sleeve assembly

Dekafix, WS and MultiFit Terminal block markers

Make your labelling more efficient

Snaps securely into place in combination

With a marking system for terminal markers you expect the markers to be printed quickly and just as quickly snapped into place. The markers also need to have a high resistance to shocks and vibration. Our terminal markers meet these requirements in full.

MultiMark terminal markers make use of an innovative composite material of two components. The hard base contour of the marker snaps securely into the connector. The elastic surface finish makes the marker easy and ergonomic to mount.

Another advantage: the excellent printability of the surface material guarantees durable and wear-resistant labelling. A print resolution of 300 dpi also produces a easy to read script.

The adaptable range of markers

For manufacturer-independent marking of components, we have developed the adaptable MultiFit marker range. Without giving up the highly professional printing with Weidmüller's marking system, you can use your usual components from other manufacturers, and combine them with Weidmüller's MultiFit markers.

THM MultiMark

THM MultiMark PLUS

The smart composite material ensures perfect usage and handling.

DEK/WS/MF: Expandable terminal block markers – uninterrupted output, snap on, ready.

Wire and cable markers TM-I, WM, SFM, SFX, ELS and THM ET

Make your connections visible

A control cabinet can only pass the acceptance test if the various circuits can be unequivocally identified. Using our markers to uniquely identify wires and cables lets you make the most of your options and profit from a range of additional benefits.

Process reliability: TM-I

TM-I insert tags have a guide tab which enables them to slide easily into the transparent sleeves. Once the label is in place, the tab can be snapped off at the predetermined break point. The ready-assembled sleeves are then simply pushed over the wires. Your benefits: large quantities can be efficiently pre-assembled in a single step. This saves both time and money.

Un-detachable: WM

Our closed, un-detachable markers are mounted without the need for additional tools. The cable is simply threaded through the openings at both ends before wiring takes place. The inherent tension of the material fixes the marker in place. WM markers are available in four sizes for wire cross-sections from 0.25 mm² to 16 mm². For each size you can choose from three label lengths and two colours. This provides you with just the right assortment for carrying out the everyday task of labelling conductors in a control cabinet.

Highly flexible: SFX

SFX markers are the preferred choice for identifying cables if you opt for a classic cable tie solution. Cables do not by nature always run in a straight line. The material used in SFX markers addresses this circumstance with highly flexible polyurethane. The marker follows every curve of the cable and latches on without resistance.

Additional cable and conductor markers are the **ELS** insertion labels and the **THM ET** labels, which are attached to the conductor using cable ties.

THM MultiMark

THM MultiMark PLUS

Processing reliability thanks to the precisely placed break point. The TM-I is inserted into the sleeve in no time at all: push in, bend up and down and you're done.

WM markers are available in four sizes for wire cross-sections from 0.25 mm² to 16 mm².

Your benefits with MultiMark

- Compact, practical range of products
- Quickly printed and assembled
- Reliable identification of your connections
- Excellent material properties
- Large label field ensures good legibility

WriteOn

Cable labels

Tough polyester labels with high elasticity

The WriteOn cable labels are used to label wires and cables up to an outside diameter of 36 mm.

D

The transparent adhesive strip fixes and protects the printing on the marker surface.

The new THM WO-Q and THM WO-QX have a special type of carrier material and therefore make it easier to separate the labels in each case. THM MultiMark PLUS In addition, the TM WO-QX have perforations in the transparent protective film and therefore enable versatile mounting on different conductor diameters.

Technical data THM WO, THM WO-Q, THM WO-QX

MulitMark shrink sleeves

For you at a glance

Identify cables and wires in confined spaces

For a long time now, clear and durable identification of your plant's modules, electrical components, wires and cables has not only been an absolute must but also highly important with respect to maintenance and troubleshooting. Labelling using shrink sleeves is one very common way of identifying wires and cables.

D

For example, shrink sleeves are actually the most common form of marker used for identification purposes in the railway industry. In this industry, an essential consideration is the stringent requirements regarding flammability characteristics. With our shrink sleeves, we meet the need for a labelling solution that satisfies the most stringent requirements set down in the CEN/TS 45545-2 HL3 standard.

In applications where space is at a premium, shrink sleeves offer a compact marking solution, for example when wiring multi pole plug in. Our new endless shrink sleeves offer customised design opportunities.

THM MultiMark

THM MultiMark PLUS

Technical data HS-HF, HSS-HF, HSS-HF EL

Material	Polyolefin, halogenfrei
Flammability Rating	ASTM D 635-HB EN 45545-2 HL 3

Your benefits with MultiMark shrink sleeves

- Configure markers the simple way with the M-Print® PRO labelling software
- Convenient assembly due to perforation of endless markers
- Time-saving installation thanks to simple handling
- Comply with common standards by using resistant markers

Device markers ESG, SM, CC and EL

Make your systems secure

Nameplates, warning signs or functional labels for control and signaling equipment – device marking ensures that machinery and equipment is used correctly and is indispensable in the control cabinet.

THM MultiMark

THM MultiMark PLUS

Longevity guaranteed: ESG

The multi-coloured and formatted labels have a strong adhesive layer to ensure the best possible adhesion to the underlying surface. Double laminated polyester makes the basic material very thin and yet extremely tear-resistant.

Prevent incorrect operation: SM

MultiMark device markers can be used for identifying equipment from multiple manufacturers. In various areas of application they guarantee the clear assignment of all components, such as control and signaling devices from different vendors.

Standard included: CC

Our systematically coordinated product range includes labels for identifying standard components, as well as all purpose and familiar formats: such as the CC 85/54 marker for creating nameplates.

Customised Identification: EL

The endless variations of MultiMark markers make them an economical alternative to conventional tag rails or special labels. For any given width, the length can be precisely configured by the software to match the respective markers perfectly. A blade is used to cut the labels individually to the specified size.

Always in the right place: the strong adhesive polyester labels are particularly suitable for labelling equipment.

Type plates are also easy to make with the CC markers and guarantee a secure hold on different surfaces.

Your benefits with MultiMark

- Double or single laminated polyester
- Can be used with the equipment of many manufacturers
- Device markers with a familiar design
- Delivered on rolls, also for small amounts for thermal transfer printers

Labels

The right format for all equipment

THM labels offer brilliant printing quality thanks to the thermal transfer technology. Different materials and the user-friendly printing system M-Print® PRO under Windows optimise all labelling needs.

THM MT 30X

Our powerful self-adhesive labels for equipment identification and the use of different materials for your application means that superior standards of labelling are achieved.

THM GEW

Woven-fabric labels are made from a very flexible cotton fabric. The high adhesion values enable flexible application, especially on rough surfaces.

THM ET S7

THM ET S7 are non-adhesive, roll packaged labels and are used to label the SIMATIC 200SP, S7-1500, S7-300 and S7-400 modules from Siemens.

THM EL

THM EL are adhesive-backed continuous labels for the marking of cable conduits and distribution boxes.

KSW

KSW marking strips are used to identify multi-pole PCB connectors. Users can print them individually without being confined to a certain pitch.

Technical data THM MT 30X and THM EL

Material	Polyester or vinyl
Material thickness	0.05 mm
Reverse side	Aluminised only with silver
Adhesive	strong acrylic adhesive
Initial adhesion	540 gr./cm ²

THM MultiMark

THM MultiMark PLUS

Weidmüller's wide range of labels offers the right solution for every application

Ordering data device markers

Ink ribbon	2005070000 RIBBON MM 110/360 SW (black)
	2005080000 RIBBON MM 76/360 SW (black)
	2005040000 RIBBON MM 80/300 WS (white)
Pressure roller	Labels, shrink sleeves: THM MMP ROLLER 115 (1357420000)

Your benefits with THM labels

- High-quality polyester labels in different colours
- Due to the flexible material and thick adhesive layer, the THM GEW can be used on angled or round objects such as cables or hoses
- Roll-packaged THM ET S7 can be used to label the Simatic 200S, S7-300 and S7-400 modules from Siemens
- Labels are automatically positioned in the printer for a perfectly centred print on each label

DEK card – Dekafix standard printing

The Dekafix marker is the universal marker for terminals and plug-in connectors, as well as electronic modules from the Weidmüller product range. Dekafix provides you with a wide range of standard printing options. The system is particularly suitable for short sequences of numbers and is also available for customer-specific printing.

- In strips for fast installation
- Large selection of ready-to-use printed markers
- Excellent printing quality with the MC Laser
- Available in 4 widths

In the form of a card, the Dekafix (DEK) marker is the universal marker for the Weidmüller SAK, W, P and Z series. The markers lie flush in the marker channel which guarantees optimum and secure positioning.

Technical data

Material	Polyamide 66, halogen-free
UL 94 flammability rating	V2
Temperature range	-40 °C to 100 °C
Printing	Black

Ordering data

CableLine®

The programme of products for all wire markings

Individual laser markers as a combined system

Our well matched selection of CableLine products provides you with everything you need for all your professional marking requirements. The combination of systems are defined by the application and contain the following: open and closed cross-section markers from 0.5 to 70 mm², individual markers, transparent sleeves and markers for cable tie assembly. They are available in plastic or stainless steel, with the appropriate accessories and with the labelling options; these products optimally fulfil a wide range of requirements. The laser system used by Weidmüller produces abrasive-resistant print with brilliant quality.

Closed marking from type CLI C with permanent fit.
Mounted by sliding onto the wire end.

CableLine® – the benefits to you

- No print system necessary
- Simple retrospect changes on site possible

The CableLine® programme comprises

- Wire markers
- Cable markers
- Standard or customer special print
- Accessories and tools
- Available in PVC or stainless steel versions

Open marker from type CLI O also allows mounting onto already connected wires.

Markers from type CLI M are pushed onto holding strips of type CLI MH and finally mounted with cable ties.

CableLine® packaging types

CLI C – Closed wire markers

CLI C wire markers are fitted to unconnected cables. Four different sizes are available to mark wire cross-sections from 0.5 mm² to maximum 70 mm².

The markers are already printed and ready for use. Individual markings can be created by simply combining the individual markers.

Advantages:

- Closed markers, secure and adjustable for unconnected cables
- Special resilient bellow profile ensures a wide application range
- Fast and easy to fit – in next to no time
- Compatible accessories take the strain off marking tasks
- Permanent high-quality markings
- Best contrast for optimum legibility

Closed marking from type CLI C with permanent fit.
Mounted by sliding onto the wire end.

CLI R are pre-assembled mounting mandrels with CLI C markers.

CLI C

Version	Closed markers made from soft PVC. Resilient bellow construction enables fast and easy attachment. Standard, special and international colour-code compliant prints available.
Material	Soft PVC, cadmium- and silicone-free
Temperature range	-30 °C ... 80 °C
Flammability classification	Corresponds to VO to UL 94
Resistance	Highly resistant to oils and petrol as well as gamma and UV radiation
Printing	Laser marking

Wire cross-section

CLI C02	0.5 mm ² – 1.5 mm ²
CLI C 1	1.5 mm ² – 4 mm ²
CLI C 2	2.5 mm ² – 16 mm ²
CLI C 3	16 mm ² – 70 mm ²

E

CLI O – Open wire markers

CLI O wire markers are fitted to connected wires, which makes them suitable for updating existing facilities. Three different sizes are available to mark wire cross-sections from 0.4 mm² to maximum 4.0 mm². Profile and design guarantee the secure and permanent attachment of the individually combinable markers.

Advantages:

- Open markers for connected wires
- Marker profile with anti-rotation safeguard for combination marking
- Perfect for all marking tasks of retrofitted wiring
- Extremely low space requirements
- Rapid clip-on attachment saves time

Open marker from type CLI O also allows mounting onto already connected wires.

CLI O

Version	Open markers made from hard PVC. The flexible and sturdy barbed hooks guarantee secure attachment on the wire. Standard, special prints available.
Material	Hard PVC, cadmium- and silicone-free
Temperature range	-30 °C ... 80 °C
Flammability classification	Corresponds to VO to UL 94
Resistance	Highly resistant to oils and petrol as well as gamma and UV radiation
Printing	Laser marking

Wire cross-section

CLI O 10	0.4 mm ² - 1.5 mm ²
CLI O 20	1.5 mm ² - 3 mm ²
CLI O 30	3 mm ² - 4 mm ²

CabelLine® CLI M – Cable markers and holders

CLI M identification markers simply slide onto CLI MH carrier strips and are secured by means of cable ties. CLI MH strips are available in two lengths. This system is particularly suitable for wires and cables with large cross-sections.

Advantages:

- Combination markers for marking cables and conduits
- One size for all diameters from 16 mm²
- Unrestricted combination options
- Closed, captive marking
- Very good legibility

Markers from type CLI M are pushed onto holding strips of type CLI MH and finally mounted with cable ties.

CLI MH

Version	CLI MH carrier strips for CLI M markers are available in lengths of 70 and 110 mm for 10 or 20 CLI M markers respectively. They are attached using one or two cable ties.
Material	PA 6.6
Temperature range	-30 °C ... 80 °C
Flammability classification	Corresponds to V2 to UL 94
Resistance	Highly resistant to oils and petrol as well as gamma and UV radiation
Printing	Maximum 6.2 mm

CLI M

Version	Closed, oval combination markers. The markers are slid onto CLI MH holders and secured by means of cable ties. Standard, special and international colour-code compliant prints available.
Material	Soft PVC, cadmium- and silicone-free
Temperature range	-30 °C ... 80 °C
Flammability classification	Corresponds to V0 to UL 94
Resistance	Highly resistant to oils and petrol as well as gamma and UV radiation
Printing	Laser marking

WSM – Stainless steel markers

WSM is a complete marking system for cables, wires, conduits and components. It offers markings that last in conditions that no other markers can withstand. The range consists of stainless steel character tiles, holders and cable ties – available separately or complete in the WSM Set and Service Box.

Advantages:

- Durable, embossed characters for optimum legibility
- Resistant to heat, cold, corrosion, acids, chemicals, fire and more
- Individual and multi-character markings can also be combined
- Rapid attachment
- Ideal for outdoor applications
- Easy attachment with cable ties

Contents of WSM Service Box:

Character tiles

40 each of

0-9, A-Ö, +, -, x, /, :, ., ~, =, ü, ¼, neutral.

Cable ties

200 cable ties 200 mm

Stainless steel holders

30 pieces each of 48 mm and 60 mm,

20 pieces of 84 mm

10 pieces of 108 mm and 288 mm

WSM

Version	Marker holders designed with raised profiles at both ends to ensure the cable ties slide through easily. Individual or combined, the single marker plates are inserted into the holder. Special printing available.
Material	Acid-resistant stainless steel grade SS 2348 (AISI-316)
Temperature range	-80 °C ... 500 °C
Resistance	Fireproof. Resistant to heat, cold, corrosion, acids, chemical substances, and so forth.
Printing	High-quality embossed. Alphanumeric and special characters
Fixing accessories	Stainless steel cable ties with ball-bearing lock

WSM small plates**Technical data**

KSW – Printed labels

KSW marker strips are used for labelling multipole plug-in connectors. You can be printed individually by the user for any contact spacing.

- Wipe-proof labelling
 - Strip width 2.5 mm and 4 mm
 - Simply stick on – that's all!
 - Optimum adhesion
 - PVC-free

THM MultiMark

THM MultiMark PLUS

Order example:

Tag carriers

Compact modules for complex systems

Simple identification of component assemblies and terminal blocks

Tag carriers, in combination with the different Weidmüller terminal markers, deliver quick and efficient solutions for labelling of component assemblies and terminal blocks. Available to you, for every solution, is a suitable tag carrier that is tailored according to your needs and matched to the MultiCard product line.

Weidmüller tag carrier – the benefits to you

- Large marking surface
- Protection against environmental influences
- Flexible folding mechanism
- Clear identification of assemblies
- Universal use on Grail and Top-hat rail

The group tag carrier SCHT 5 / SCHT 5 S can be directly snapped into the DIN rail TS 32 (G-rail) or the TS 35 (top-hat rail).

The ZGB 15 / ZGB 30 is a pivoting group tag carrier.

High level of protection for the labels against outside influences: The pouch of the EM 8/30 protects the inner workings similar to that of a clip fastener.

Transparent sleeves

Better perspective for cables and wires

The right sleeves for flexible applications

The TM sleeves made out of PVC or halogen-free material are almost free from contaminants. The sleeves are a precisely-made markers for wires and cables with an external diameter from 1 to 40 mm. The simple mounting holds firmly to the wire and the sleeves can then be specifically marked using an inlay tag in the MultiCard format. Thanks to the slim design in five different lengths, the TM sleeves can be quickly and safely mounted even in compact cabinet systems.

TM/HF sleeves – the benefits to you

- Versatile: Different sizes and lengths for a large variety of applications
- Safe: Firm hold on all common cables and wires
- Flexible: Labelling with the inlay tag in the MultiCard format

Environmentally friendly: TM/HF sleeves are free of halogen and, in the case of fire, do not cause corrosive or toxic gasses. Therefore as they are almost free from contaminants, the markers meet the highest safety requirements.

CLI T sleeves are not suited for labelling with P-Ink or STI pen in connection with TM-I MultiCard.

A marker for a wide variety areas application – with the TM sleeves you will always have a precise marker.

The TM sleeves are particularly suitable for outside applications, thanks to the protected insertion element.

WKM – Cable marker

Firm hold for all cable diameters

The robust label holder for cable tie assembly

The halogen-free WKM transparent pocket gives excellent protection against outside influences. Thanks to its secure cable-tie lock-in ability, it is suitable for almost all conductor cross sections.

The previously marked tags are simply placed in the WKH holder and secured with the closing clip. The WKM cable marker is the right solution when it comes to being highly efficient at the labelling site.

WKM cable marker – the benefits to you

- Individual labelling of paper and polyester labels can take place using a normal office printer
- The robust design in conjunction with the MultiCard tags guarantees excellent protection against outside influences

Paper and polyester labels

The following options are available:

WKM 8/20 + ESO 8/20

WKM 8/30 + ESO 7

WKM 18/43 + ESO 5

MultiCard marker

The following options are available:

WKM 8/20 + ESG 7/20

WKM 8/30 + ELS 6/30

WKM 18/43 + ELS 16/40

Technical data

Material	Polypropylene
UL 94 flammability rating	HB
Min. temperature, continuous	- 40 °C
Max. temperature, continuous	80 °C
Material colour	transparent

The cable tie assembly offers secure attachment for almost all conductor cross sections and high durability, especially under high mechanical demand.

Tag rails

Boundless freedom of design

High-contrast identification for side-by-side devices

The SCHS shielding rail can be fitted to almost any device, either glued or screwed. It is the preferred choice for high contrast labelling, especially for devices placed side by side. Some types of sturdy PVC rails have markers that can be clicked and locked into position. You therefore benefit from the large variety and the compatibility of the tag rails from our MultiCard product line. Take advantage of our innovative labelling systems, which is an alternative to engraving.

Tag rails – the benefits to you

- Additional information to the equipment is easy to correlate
- Depending upon the application, the length can be increased because of the metre lengths that are delivered

The SCHS shielding rail can be fitted to almost any device, either glued or screwed, which makes it usable almost anywhere.

With the normal width size of 17.5 mm, as is the case with circuit breakers, the tag rail SchS2 is recommended along with the device marker ESG 8/17S.

Modern thermal management for your control cabinet infrastructure

Filter fans from Weidmüller

Thermal Management with WI filter fans

Growing trends in digitalisation increase the proportion of active electronic components in control cabinets, resulting in more heat generation within. Our filter fans enable an efficient heat extraction and thus increase the life expectancy of your electronic components.

Due to their low energy consumption at high air flow rates, our filter fans ensure a reliable and economical cooling of your control cabinet. The combination of filter mat and gasket meets the high protection classes IP54 and IP55 even at constant high flow rates. Additionally, the innovative folded filter mat lasts 3 times as long as conventional products due to its larger surface area. Sophisticated details such as the snap mechanism on all four corners or the functional flap cover allow a quick, tool-free assembly, saving time and money.

Weidmüller's Thermal Management products are an important addition for your control cabinet infrastructure.

Filter fans

The perfect combination of filter fans and thermostats

By combining a filter fan with a thermostat, you will save energy, material and time. The thermostat controls when the filter fan is used. This reduces energy consumption and extends the life of the fan significantly. At the same time, filter mats need to be cleaned or replaced less frequently, which reduces maintenance costs. You optimize your environmental balance, reduce your costs and improve reliability in your production process.

Heaters, thermostats and humidistat

Heaters for control cabinets, in combination with thermostats and humidistat, ensure pinpoint heat distribution and safe temperatures above the dew point. The use of thermostats and humidistat leads to energy savings and, thus, to a better environmental balance. By avoiding the hazards of condensation your production process will run reliably.

Heat

Control: Thermostats, Humidistat

The right solution for every cooling challenge

Filter fans from Weidmüller

The practical challenges are wide ranging. That's why we provide you with a broad portfolio of filter fans for different applications and installation locations. With various sizes, a wide range of protection classes, and products for EMC-sensitive areas, we have the right fan for you.

Indoor filter fan IP54

The closed frame prevents ingress of unfiltered air according to IP54. Available in grey (RAL 7035) and black (RAL 9011) as standard.

Outdoor filter fan IP55

For both indoor and outdoor use with innovative filter mat technology to ensure outstanding air-flow performance. The specially chosen plastic ensures high UV protection.

EMC filter fan IP54

For use near electromagnetic fields. Secure contact surface without the need for a beryllium copper seal and particularly environmentally friendly as no metal reinforced plastics are required.

Slim-Line outdoor filter fan

Optimised design for compact cabinets where space is a premium. Suitable for indoor and outdoor use due to IP55 protection and the use of UV-resistant plastic.

Roof filter fans

Ideal for indoor use in tight spaces. Optimised air flow and temperature distribution, protection according to IP33 or IP54 and high UV resistance.

Control Cabinet heating, for when it is cold outside

Heating solutions from Weidmüller

Large temperature differences can lead to condensation in the control cabinet. To avoid the resulting dangers such as corrosion and short circuits, we offer various radiant heaters and fan heaters to meet all of your requirements.

Radiant heater

Radiant heater RH-CBCO

For localised heating and small heating requirements. Compact form makes it ideal for confined spaces.

Radiant heater RH-TCO

Our standard radiant heater for all applications with a wide power range and various connection options. Ideal for confined spaces.

Compact fan heater

Compact fan heater FH-TCO

Our new generation of fan heaters with PTC technology (positive temperature coefficient) are suitable for all applications within the cabinet. Thanks to its particularly fast heating effect, it is ideal for all systems that need to be heated quickly, e.g. in wind power generation. Designed in a robust and compact plastic housing.

Compact fan heater FH-TH

The modern PTC fan heater with integrated thermostat and fast heating effect. As no additional thermostat is necessary, an ideal solution for compact cabinets. It comes with automatic temperature control for high energy efficiency and a robust plastic housing.

Radiant heater

Perfectly regulate temperature and humidity

Thermostats and humidistats from Weidmüller

G

A good climate in your control cabinet supports a safe and reliable operation of all your installed components. To make the control and regulation of temperature or humidity as easy as possible, we offer you our thermostats and humidistats.

Compact Fan Heater

Thermostat THSW

Our standard solution for heater and filter fan control. Provides protection for heating systems and helps to save energy. Suitable for all industrial applications.

Twin Thermostat

Twin Thermostat THSA

Space-saving combination for simultaneous switching of two devices in different temperature ranges. Suitable for all industrial applications.

Humidistat

Humidistat HYSA

Humidity control and condensation protection, especially in high humidity environments. Suitable for all industrial applications.

Incorporate the structures for flexibility within the cabinet

Cable ducts as the basis for ordered cable routing

Additional Structure brings Added Value

Increasing trends in digitalisation require higher packing densities in the cabinet. To maintain order within the cabinet, a clear and space-saving cable routing system is required. This is more than just an optical aspect, because orderly cable routing saves time and money. It facilitates maintenance and repair work and increases general operational safety.

As a partner for Industrial Connectivity, we know the challenges faced and provide you with a comprehensive range of cable ducts and accessories for all applications. Practical details like wire holding lugs for the fixing of already installed wires, as well as precisely punched holes according to DIN EN 50085-2-3, facilitate accurate installation. The clever closing mechanism allows easy latching and ensures a secure fit when closing the lid.

Together, we create sustainable structures with added value. We support you in all work steps from planning through to implementation and ongoing operation. Let's connect.

Metric

**Halogen-free
-25 to 105 °C**

DIN

**EX-Area
-25 to 105 °C**

Corner cable duct

**Halogen-free
-25 to 120 °C**

Protective tube

Perfectly coordinated complete system

Our product range includes cable ducts in metric versions as well as corner and DIN ducts. There are also variants made of halogen-free material. The range is supplemented by protective tubes, holders, separators, and professional marking solutions.

Equipment

Your easy way to flexible and durable cable routing

The complete range of cable ducts from a single source

Orderly and flexible cable routing in the cabinet not only gives a good impression, but is also essential for functional and safe operation. With our cable ducts, we offer you a complete range from one source. Benefit from our sturdy, torsion-free cable ducts with clever details for quick and efficient installation.

G

Our wide range of cable routing systems include metric cable ducts, DIN cable ducts and corner cable ducts.

Cable ducts

Our cable ducts are available in two basic versions: Metric and DIN. They differ in the slit width and the distance of slots. Ducts with finer slit width are advantageous for applications with small cable cross-sections in conjunction with terminal blocks. The variants designed as corner channels are particularly suitable for control cabinets with limited space and a high line density.

Halogen-free cable ducts offer you more operational safety in areas of increased fire protection

Halogen-free cable ducts

In applications where increased fire protection is required, our halogen-free cable ducts offer a higher level of operational safety. They are mainly used in traffic engineering, but also in tunnel systems or for building infrastructure. Our halogen-free materials are characterised by low smoke development and non-toxic waste gases.

Your advantages with Weidmüller wiring conduits

- Sturdy cable ducts without torsion
- Wire holding lugs as a fixation aid
- Precisely punched bottom holes according to DIN EN 50085-2-3
- Secure fitting lid thanks to an optimum locking mechanism

Spiral and webbing hoses bundle and protect your cables.

Cable protection conduits

Spiral and webbing hoses are particularly suitable for the construction of space-saving cable routing systems in switch gears and control cabinets. They are used for guiding, protecting and bundling cables and wires - for example, in the transition between the enclosure interior and the door.

More flexibility and efficiency with holders and separators for simple assembly.

Accessories

With our practical accessories, you can prevent already installed cables and wires from falling out of the cabinet. This simplifies assembly and saves time. Data and power cables can be separated from each other with dividers in the same channel. The covers are also available as accessories and can be ordered individually if required.

Our expertise for your requirements

Service connects – worldwide

Automation technology functions are becoming more complex in a globally-oriented world facing ambitious targets in terms of energy efficiency and smart production. We are your equal partners for the best connections in Industrial Connectivity.

Our personal support can answer any questions reliably and expertly. Our online services are available 365 day a year around the clock to provide answers to your questions on our products - from user documentation through software to planning tools.

In short: Weidmüller's global service combines our expertise with your requirements.

Your way to our service

www.weidmueller.com/service

Engineering support and customised assembly

Automation engineering and connectivity consulting belongs to our services as well as assembly of engineered products. We also support the process from the idea to the product with our Weidmüller Configurator and the Configure-to-Order process.

Consulting and engineering

The challenge for you is reducing costs and increasing efficiency. This requires intelligent, individual solutions. Whether it is modified products, pre-fitted mounting rails or complete small cabinets - our application centres provide a highly qualified custom-made engineering and production service.

Connectivity Consulting

Alongside our product offering, we support you with our range of services through all the phases of machine construction. The result of this collaboration is a reduction of up to 30% in cycle times, up to 20% more space in the control cabinet and significant fault reduction. Our experienced Connectivity Consulting team delivers a practical impetus rather than just abstract theories.

Fitted mounting rails

Your processes in panel building have to be fast, flexible and productive. This is the only way you can cut your costs and increase efficiency. Depending on the application in question, you will have different requirements with respect to the engineering service, delivery speed and flexibility to be provided.

Processed and assembled enclosures

To compete internationally, your plants need to satisfy high standards of safety, quality and performance. The smart combination of consultation, application expertise and industry know-how is our key to finding a custom-fit solution for your application. Reduce costs and increase efficiency

Personal support

Exactly the right help and information on our solutions and products

If our products are used in your automation technology applications, you need the best possible individual support, from planning through installation to operation. For every stage of your application, we can offer the right tools and information for our products and solutions. Up-to-date, uncomplicated, comprehensive and around the clock via our service portal at www.weidmueller.com/support.

V

Your way to your local personal support

www.weidmueller.com/support

Technical downloads

All information, such as technical data, manuals, certificates and much more for the appropriate use of our products and solutions in your application

Engineering data

For the quick integration of our products into your design, there are a lot of digital product data for engineering systems like EPLAN, Zuken E3.series, WSCAD and many others available for download.

Product software

Our software makes using and configuration of our products easier for you when it comes to operation, configuration and monitoring

Approvals, certificates & declaration of conformity

We supply product- or company-related approvals and certificates for your documentation

Security advisory board

Our Product Security Incident Response Team (PSIRT) continuously informs you about possible security-related vulnerabilities of our products

Let's connect.

Alle Weidmüller Adressen sowie Ihren lokalen Ansprechpartner finden Sie im Internet unter:
www.weidmueller.com/countries

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media.

X All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.

Weidmüller – Your partner in Industrial Connectivity

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs. Together we set standards in Industrial Connectivity.
