

## WL2820D

**Low noise, High PSRR, High speed, CMOS LDO**

[Http://www.sh-willsemi.com](http://www.sh-willsemi.com)

### Descriptions

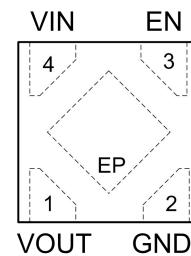

The WL2820D series is a high accuracy, low noise, high speed, low dropout CMOS Linear regulator with high ripple rejection. The devices offer a new level of cost effective performance in cellular phones, laptop and notebook computers, and other portable devices.

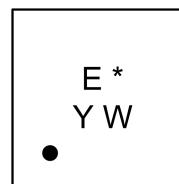

DFN1X1-4L

The WL2820D has the fold-back maximum output current which depends on the output voltage. So the current limit functions both as a short circuit protection and as an output current limiter.

The WL2820D regulators are available in standard DFN1x1-4L Package. Standard products are Pb-free and Halogen-free.
