#### RE0805 / RE1206

Either resistance in E-24 or E-96: 4 digits

RE

SERIES

First three digits for significant figure and 4th digit for number of zeros

#### RE0603

1%, 0.5%, 0.1% E24 exception values 10/11/13/15/20/75 of E24 series

1%, 0.5%, 0.1% E96 refer to EIA-96 marking method, including values 10/11/13/15/20/75 of E24 series

#### RE0201/0402

No marking

For further marking information, please see special data sheet "Chip resistors marking".

#### CONSTRUCTION

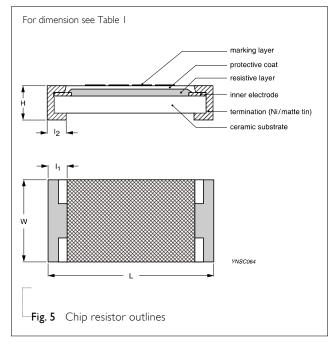

The resistors are constructed out of a high-grade ceramic body. Internal metal electrodes are added at each end and connected by a resistive layer. The resistive layer is adjusted to give the approximate required resistance and laser cutting of this resistive layer that achieves tolerance trims the value. The resistive layer is covered with a protective coat and printed with the resistance value. Finally, the two external terminations (matte tin) are added. See fig. 5.
