

## ■ Product Introduction

LM2674 series is a DC/DC switching buck converter controlled by a fixed frequency of 260kHz PWM. It is mainly composed of internal frequency compensation, fixed frequency oscillator, built-in overcurrent protection, power switch control and other circuits. It can drive 500mA load with high efficiency, low ripple, good linearity and load adjustment ability. Only a few external components are needed to realize the function of DC/DC voltage reduction and stabilization, which is very simple and practical. PWM control circuit can adjust the duty cycle from 0 according to the load To 100% to achieve high work efficiency. It has an external enabling control opening function, which can realize the controllable switch between standby and work, making the application more flexible.

Top View SOP-8

## ■ Product features

- Built in overtemperature shutdown function
- Built in overcurrent protection function
- Internal integrated efficient power switch
- Good linearity and load adjustment capability
- ON/OFF pin with hysteresis function
- TTL shutdown capability
- high efficiency
- Simple periphery
- Wide input voltage range: 7V~40V
- Fixed output voltage: 3.3V, 5V, 12V,
- Adjustable output voltage range: 1.21V~37V (adjustable)
- High precision output:  $\pm 2\%$
- Fixed switching frequency: 260 kHz
- Maximum output current capacity: 500mA
- Minimum linear drop voltage drop: 1.5V
- Package form: SOP-8

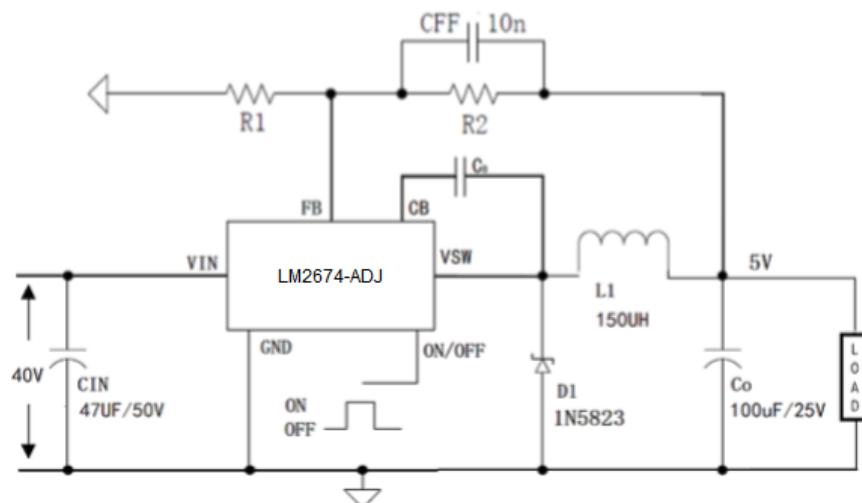

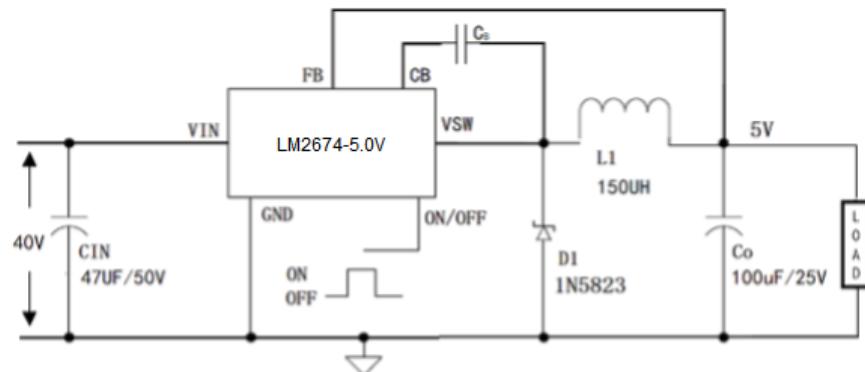

## ■ Packaging form and pin function definition

Pin serial number	Pin definition	Function description
SOP-8		
1	CB	Boost capacitance terminal
2	NC	Empty port
3	NC	Empty port
4	FB	Feedback control terminal
5	ON/OFF	Enable terminal High=ON and low=OFF
6	GND	Power supply ground terminal
7	VIN	Positive terminal of power supply
8	VSW	Power switch output terminal (SW)

## ■ Product use

- LCD and LCD TV
- ADSL modem
- LED lights, LED backlight
- Digital photo frame
- Telecommunication/network equipment

## ■ Application circuit

$$V_{OUT} = V_{REF} \left( 1 + \frac{R_2}{R_1} \right)$$

$C_B : 103/50V$

### ■ Limit parameter

project	Symbol	explain	Limit value	Company
Voltage	VIN	Input terminal voltage	-0.3~42	V
	VFB	FB feedback terminal voltage	-0.3~VIN	V
	V <sub>VSW</sub>	Switch output terminal voltage	-1~VIN	V
	V <sub>ON-OFF</sub>	Enable enabling terminal voltage	-0.3~6	V
Maximum power consumption	PD	SOP8 package	500	mW
thermal resistance	R <sub>JA</sub>	Put in air without external heat sink	30	°C/W
temperature	T <sub>j</sub>	Operating temperature range	-40—125	°C
	T <sub>c</sub>	Storage temperature range	-40—150	
	T <sub>h</sub>	welding temperature	260	°C,10s

Note: Limit parameter refers to the limit value that cannot be exceeded under any conditions. Once the limit value is exceeded, it may cause physical damage such as product deterioration; At the same time, the chip can not be guaranteed to work normally under the limit parameters.

### ■ electrical properties

◆ LM2674-3.3V ( Ta=25°C)

project	Symbol	Test conditions		minimum value	Typical value	Maximum	Company
output voltage	V <sub>out</sub>	V <sub>in</sub> =7V to 40V, I <sub>out</sub> =20MA to500MA		3.234	3.3	3.366	V
Enable shutdown current	I <sub>STB</sub>	V <sub>in</sub> =40V, V <sub>ON-OFF</sub> =0V		-	100	200	uA
